Corporate Profile

CIBC is a leading North American financial institution celebrating 140 years of serving clients in Canada and around the world. Through our two distinct business lines, CIBC Retail Markets and CIBC World Markets, CIBC provides a full range of products and services to almost 11 million individual and small business clients and meets the financial needs of corporate and institutional clients. In 2007, revenue was \$12.1 billion and net income was \$3.3 billion. At year-end, market capitalization was \$34.2 billion and our Tier 1 capital ratio was 9.7%.

Consistent, sustainable performance over the long term

Who we are: CIBC is focused on helping clients meet their financial needs and achieve what matters to them. Our ability to develop deeper and long-lasting relationships with clients and to generate long-term growth for shareholders is driven by a business culture based on common values: Trust, Teamwork and Accountability.

Where we're going: Our vision is to be the leader in client relationships. Our mission is to fulfill the commitments we have made to each of our stakeholders:

- Help our **clients** achieve what matters to them
- Create a positive **employee** experience
- Make a difference in our **communities**
- Generate strong total returns for our **shareholders**

Creating value: CIBC's objective is consistent, sustainable performance over the long term. Our most important performance benchmarks are:

- Financial performance
- Governance
- Risk management
- Client satisfaction
- Employee experience
- Community investment

Strategic priorities: In 2008, we remain focused on our three priorities:

- Business strength
- Productivity
- Balance sheet strength and capital usage

Performance measurement: Disciplined measurement of our performance is critical to our long-term success. We have several measures to track our progress over the medium and longer term. Our balanced scorecard objectives and results are detailed on pages 6 and 7.

CIBC's share price appreciation of 163% over the past five years exceeded the appreciation of 134% for the broad market. When combined with dividend yield, CIBC's total return for the past five years was 211%.

CIBC's dividends per common share for 2007 were \$3.11 compared with \$2.76 in 2006.

2007 Accomplishments

Financial performance

- Total shareholder return of 20.2%, highest among the major Canadian banks
- Diluted earnings per share growth of 24% and return on equity of 28.7% exceeded our medium-term targets
- Non-interest expenses were lower than our 2007 target

Governance

- Awarded a 2007 *Governance Gavel Award for Excellence in Director Disclosure Honourable Mention* by the Canadian Coalition for Good Governance
- Recognized by the Institute of Corporate Directors Blue Ribbon Commission for best practices in disclosure

Risk management

- Implemented risk management systems and processes required for adoption of Basel II

Client satisfaction

- We surpassed a significant milestone of over one million CIBC Financial HealthCheck assessments completed for our personal banking clients, enhancing client satisfaction and loyalty
- CIBC's public website www.cibc.com topped this year's ranking among the large Canadian banks in an independent report by Forrester Research, Inc.

(Source: '2007 Canadian Bank Public Web Site Rankings', Forrester, April 2007)

Employee experience

- Achieved workforce representation goals for four designated groups: women, members of visible minorities, Aboriginal peoples and persons with disabilities
- Attained highest employee commitment index (ECI) score since its introduction in 1998

Community investment

- Canadian Breast Cancer Foundation CIBC Run for the Cure raised \$26.5 million to fight breast cancer
- Raised \$12.7 million globally, including more than \$3.7 million in Canada, through the CIBC World Markets Miracle Day in December 2006

Financial Highlights 2007

As at or for the year ended October 31

	2007	2006 ⁽¹⁾	2005 ⁽¹⁾	2004 ⁽¹⁾	2003 ⁽¹⁾
Common share information					
Per share					
– basic earnings (loss)	\$ 9.30	\$ 7.50	\$ (0.46)	\$ 5.60	\$ 5.21

(1) Certain comparative information has been restated to conform with the presentation adopted in the current year.

(2) In case of a loss, the effect of stock options potentially exercisable on diluted earnings (loss) per share will be anti-dilutive; therefore, basic and diluted earnings (loss) per share will be the same.

(3) For additional information, see the "Non-GAAP measures" section of the MD&A.

(4) Retail includes CIBC Retail Markets and commercial banking (reported as part of CIBC World Markets). Wholesale reflects CIBC World Markets, excluding commercial banking. The ratio represents the amount of capital attributed to the business lines as at the end of the year. For additional information, see the "Non-GAAP measures" section of the MD&A.

n/m – not meaningful due to the net loss in the year.

Earnings (loss) per share (EPS)
(\$)

Diluted EPS was \$9.21 in 2007, compared with \$7.43 in 2006. Diluted EPS is calculated as net income less preferred share dividends and premium on redemptions, divided by the weighted-average number of diluted common shares.

Return on equity (ROE)
(%)

ROE was 28.7% in 2007, compared with 27.9% in 2006. ROE is a key measure of profitability. It is calculated as net income less preferred share dividends and premium on redemptions, expressed as a percentage of average common shareholders' equity.

Tier 1 capital ratio
(%)

CIBC's Tier 1 capital ratio was 9.7% in 2007 compared with 10.4% in 2006, ahead of CIBC's target of 8.5% and ahead of the regulatory requirement of 7.0%. The Tier 1 capital ratio is calculated by dividing Tier 1 capital by risk-weighted assets.

Chairman's Letter

William A. Etherington
Chairman of the Board

In 2007, CIBC once again delivered the highest total shareholder return among the major Canadian banks, resulting in a five-year total shareholder return of 211.2%, also the highest.

This reflects CIBC's focus to deliver consistent and sustainable performance over the long term. It also reflects the day-to-day commitment and diligence of all CIBC employees.

Committed to boardroom transparency

As fellow shareholders, I know you are looking for more than just good performance and effective leadership from your ownership in CIBC. You are also looking for transparency and strong governance from your Board, and we are fully committed to both of these objectives.

In recent years, we have taken a number of steps to broaden our disclosure and to increase its transparency. We introduced considerable new voluntary disclosure into our annual management proxy circular to increase your understanding of our decision-making processes. For example, we now include an enhanced description of the process for determining executive compensation for the Chief Executive Officer and other senior officers. CIBC demonstrates its commitment to paying for performance by disclosing performance targets, actual results against those targets and how the results impact compensation. We also disclose full details of compensation paid to executives by providing the dollar value of each compensation component awarded in a given year.

We continue to strengthen our oversight of executive compensation. We defer the determination of any cash or equity incentives (other than options) provided to the Chief Executive Officer for one year, giving us the opportunity to re-evaluate performance and take into account any post year-end events. Our Management Resources and Compensation Committee retains an independent compensation advisor to provide advice on executive compensation matters. To support transparency, the work performed by the advisor and the related fees are disclosed every year.

We are proud that the steps we have taken to enhance executive compensation disclosure and transparency have been recognized as "innovative" by the Canadian Coalition for Good Governance and "best practice" by the Institute of Corporate Directors Blue Ribbon Commission.

Recognized for sustainability practices

CIBC has a longstanding commitment to strong governance principles, which include sustainability. Over the years, our leadership in social responsibility and climate change has been recognized by a number of renowned global indices that assess responsible business policies and practices.

We are pleased that this recognition has continued throughout 2007. The Carbon Disclosure Project honoured CIBC this year with "best in class" for our approach to climate change disclosure. For another consecutive year, CIBC has maintained its constituency on the Dow Jones Sustainability World Index, the FTSE4Good Index and the Jantzi Social Index, all indices which assess the performance of the leading sustainability-driven companies.

Focused on our shareholders

Your Board is pleased with what CIBC accomplished in 2007, both in terms of financial performance as well as strong corporate governance.

We remain focused on our shareholders and are committed to engaging you in ongoing thoughtful discussions. We carefully monitor developments in the area of governance and will respond quickly to ensure we remain at the leading edge of governance best practice while delivering sustainable shareholder value.

On behalf of the Board, I would like to extend our appreciation to Gerry McCaughey, his executive team and all employees for steering a successful course over the past year.

Chief Executive Officer's Letter

Gerald T. McCaughey
President and
Chief Executive Officer

CIBC delivered good results in 2007, with earnings of \$3.3 billion.

Diluted earnings per share were \$9.21 up 24% from 2006, and return on equity was 28.7%. Our Tier 1 capital ratio at the end of the year was 9.7%.

These results were well above our medium-term objectives and supported a total shareholder return in fiscal 2007 of 20.2%, highest among the major Canadian banks.

I outlined in my 2006 letter our intention to remain focused on our three priorities:

- Business strength
- Productivity
- Balance sheet strength and capital usage

In 2007, we made progress against our priorities and built on the foundation we established in 2006. This progress is another important step forward for CIBC.

However, the mark-to-market write-downs we took in our structured credit business were not in line with our strategic imperative of consistent and sustainable performance.

These write-downs were precipitated by the rapid deterioration of credit market conditions in the second half of 2007, particularly for securities related to the U.S. residential mortgage market.

Against this backdrop, let me review our performance in 2007.

Business strength

CIBC's retail businesses continued to perform well overall in 2007.

CIBC Retail Markets net income was \$2,580 million, up 39% from 2006. This result includes the gain we recorded in the fourth quarter on Visa's worldwide restructuring. Volume growth, the expansion of our ownership interest in FirstCaribbean International Bank, as well as discipline in the areas of expenses and credit also contributed to CIBC Retail Markets' growth in profitability.

Within a highly competitive environment, we maintained and enhanced our position in a number of key areas of our retail business.

We increased our market share in mortgages and deposits, maintained our market leading position in cards, and strengthened our asset management business.

In the area of unsecured personal lending, our risk posture was reflected in good loan loss performance, but lower market share.

While improving our performance in 2007, we continued to invest for future growth.

We completed a multi-year project to upgrade our ABM network across Canada, expanded branch hours and announced our commitment to open 16 new branches over the next two years. We also supported our team of over 2,000 fully-licensed advisors with product and technology enhancements to meet their clients' needs.

The completion of our FirstCaribbean acquisition expands our footprint in the Caribbean region and provides a further source of growth for CIBC Retail Markets.

FirstCaribbean net income was US\$256 million, up 61% from 2006.

We continue to support FirstCaribbean's strategy to grow its business organically and through acquisition opportunities within its core markets.

CIBC World Markets net income was \$601 million, down 7% from 2006.

In Canada, we had good performance in key areas such as equity underwriting and M&A, with improving productivity. In the U.S., some businesses, particularly real estate finance and merchant banking, had good results, with other areas showing improvement.

Our overall performance in CIBC World Markets was affected by the mark-to-market write-downs in our structured credit business.

With the possibility of more challenging market conditions in the second half of 2007 continuing

into 2008, we are refocusing our attention on our wholesale business activities to ensure they are aligned with our strategic imperative.

In early November, following our fiscal year-end, we announced an agreement to sell some of our CIBC World Markets U.S. business to Oppenheimer Holdings Inc.

Productivity

In 2007, CIBC continued to make progress towards our medium-term objective of a median efficiency ratio among our Canadian bank peer group.

After achieving our 2006 target of \$250 million of expense reductions, we set a new target in early 2007 to hold our expenses flat relative to the annualized 2006 fourth quarter expenses (\$7,568 million), excluding FirstCaribbean. We achieved our 2007 goal, reporting non-interest expenses for 2007 of \$7,612 million (including \$325 million attributable to FirstCaribbean).

Expense reductions combined with revenue growth resulted in an improvement of our efficiency ratio to 63.1%, from 66.0% in 2006.

In 2008, our focus will remain on productivity improvement that achieves an effective balance between revenue growth and expense discipline. Over the long term, we believe this balance is the best formula to achieve sustainable growth.

Balance sheet strength and capital usage

Our Tier 1 capital ratio is a primary measure of our balance sheet strength.

Our objective is a target Tier 1 ratio of 8.5%. During the year, our ratio declined from 10.4% to 9.7%, primarily due to the completion of our FirstCaribbean acquisition.

In terms of capital usage, our priority is to invest in core businesses where we have scale, expertise, and the best prospects for growth. Beyond this, our objective is to balance capital usage among dividend growth, share repurchases and acquisition opportunities.

In 2007, we made progress in each of these areas.

Early in the year, we completed our FirstCaribbean acquisition, increasing our ownership interest to over 91%.

At the end of the second quarter, we recommenced our share repurchase program and

have extended that program through the end of next year.

We increased our quarterly dividend twice – from 70 to 77 cents per share in the second quarter and from 77 to 87 cents in the fourth quarter. Together, this represents a 24% increase.

We have a stated objective in our scorecard to pay out between 40% and 50% of our earnings in dividends. While we made progress in 2007 towards achieving this objective, we will continue to review dividend increases in 2008, as our payout ratio remains below our target range.

In summary, our progress against our priorities in 2007 supported good overall performance.

Looking forward

It is difficult to anticipate when the weaker market conditions experienced in the second half of 2007 may stabilize or improve.

In 2008, we will remain focused on our priorities of business strength, productivity, as well as balance sheet strength and capital usage, with a particular emphasis on balance sheet strength given the current environment.

Celebrating 140 years

As you may have noticed on the cover of this year's Annual Accountability Report, 2007 marks CIBC's 140th anniversary.

Over that time, CIBC has forged a strong history of meeting the financial needs of our clients in Canada, the U.S. and around the world.

On behalf of CIBC's leadership team, I would like to thank all of our employees – past and present – for their professionalism, dedication and contribution to 140 years of achievement. We continue to owe our success to the commitment of our people to CIBC's core values of trust, teamwork and accountability.

Chief Financial Officer's Report

Tom D. Woods
Senior Executive Vice-President and
Chief Financial Officer

In 2007, CIBC delivered record net income and the highest total shareholder return among the major Canadian banks.

A summary of CIBC's financial results

(\$ millions)		2007	2006
We earned interest on loans and other products		\$ 15,781	\$ 13,269
We incurred interest on deposits and other liabilities		11,223	8,834
We earned Net interest income		4,558	4,435
We also earned revenue (non-interest income) on investment products, financial services and other products		7,508	6,916
Total revenue was	(A)	\$ 12,066	\$ 11,351
The risk associated with our credit products resulted in loan losses of	(B)	603	548
We invested in our people and our franchise:			
Salaries and benefits		4,392	4,288
Our people need technology		1,104	1,111
A place to work and		602	562
Other support		1,545	1,556
We incurred income taxes		524	640
This added up to	(C)	\$ 8,167	\$ 8,157
Leaving us with Net income of	(A)-(B)-(C)	\$ 3,296	\$ 2,646

Our Balanced Scorecard

Financial Measures

	Medium-term objectives	2007 Results ⁽¹⁾	Comments
Earnings Per Share (EPS) Growth	Our previously stated objective was diluted EPS growth of 10% per annum, on average, over the next 3–5 years. Our objective moving forward is diluted EPS growth of 5%–10% per annum, on average, over the next 3–5 years.	Year-over-year diluted EPS growth of 24%	EPS growth was above our medium-term target.
Return on Equity (ROE)	Return on average common equity of at least 20% through the cycle (<i>calculated as net income less preferred share dividends and premium on redemptions expressed as a percentage of average common shareholders' equity</i>).	28.7%	ROE was above our target.
Capital Strength	Tier 1 capital ratio of 8.5%. Total capital ratio of 11.5%.	Tier 1 capital ratio – 9.7% Total capital ratio – 13.9%	Capital ratios were above our targets.
Business Mix⁽²⁾	Our previously stated objective was 65%–75% retail/25%–35% wholesale (<i>as measured by economic capital</i>). Our objective moving forward is at least 75% retail.	73%/27% retail/wholesale	Business mix was within our target range.
Risk	Maintain provision for credit losses as a percentage of loans and bankers' acceptances, net of reverse repurchase agreements (loan loss ratio) between 50 and 65 basis points through the business cycle. Our previously stated objective was to maintain the carrying value of our merchant banking portfolio below \$1.4 billion. Our objective moving forward is to maintain the carrying value below \$1.2 billion.	Loan loss ratio – 37 basis points Merchant banking portfolio – \$1.1 billion	Loan loss performance was better than our medium-term objective. The carrying value of our merchant banking portfolio continued to decline.
Productivity	Achieve a median ranking within our industry group, in terms of our non-interest expenses to total revenue (cash efficiency ratio (TEB) ⁽²⁾). Our 2007 target was to hold expenses flat relative to annualized 2006 fourth quarter expenses (\$7,568 million), excluding FirstCaribbean. Our 2008 target is flat expenses relative to annualized 2006 fourth quarter expenses, excluding FirstCaribbean, and our U.S. restructuring.	Cash efficiency ratio (TEB) ⁽²⁾ – 61.3% Non-interest expenses of \$7,612 million (including FirstCaribbean expenses of \$325 million)	CIBC's efficiency ratio has improved relative to the median of our industry group. We achieved our 2007 goal.
Dividend Payout Ratio	40%–50% (<i>common share dividends paid as a percentage of net income after preferred share dividends and premium on redemptions</i>).	Dividend payout ratio – 33.4%	CIBC's dividend payout ratio was below our target range.
Total Shareholder Return (TSR)	Outperform the S&P/TSX Composite Banks Index (dividends reinvested) on a rolling five-year basis.	Five years ended – October 31, 2007: CIBC – 211.2% Bank Index – 154.4%	CIBC delivered the highest TSR for the year, as well as the past five years, among the major Canadian banks.

(1) Results were affected by items discussed in the "Overview" section of the MD&A.

CIBC Retail Markets

Strategy

CIBC Retail Markets' objective is to be the primary financial institution for our clients.

Our strategy is to deepen client relationships by meeting more of our clients' financial needs.

To do this, we will continue to leverage our broad advisory capabilities as our key differentiator, while delivering a consistent client service experience and financial products and solutions that meet our clients' needs.

Priorities

- Strong advisory solutions
- Consistent client service experience
- Client-focused financial products and solutions

CIBC Retail Markets comprises CIBC's retail and wealth management businesses. We provide a full range of financial products and services to almost 11 million personal, wealth and small business clients, as well as investment management services globally to retail and institutional clients. In addition, we offer a full range of financial services to clients in 17 regional markets in the Caribbean through FirstCaribbean International Bank.

Our objective is to be the primary financial institution for our clients.

We have been working together across Retail Markets to build strong relationships with our clients. Our key priorities are to provide our clients with strong advisory solutions, continue to enhance the client service experience and offer client-focused financial products and solutions.

Strong advisory solutions

Advisory solutions are increasingly important to Canadians when it comes to meeting their financial goals.

CIBC has built broad advisory capabilities and tools across all our channels.

Our focus on building strong advisory solutions to help our clients through every life stage is a key differentiator for CIBC. With our advisory teams aligned under a single management structure, our integrated approach enables us to introduce our clients to the most relevant offers and help them continue to make the best financial choices as their needs evolve.

Our in-branch CIBC advisors conduct a CIBC Financial HealthCheck for clients to understand their financial needs and recommend relevant solutions. In mid-2007, we surpassed a significant milestone, completing one million CIBC Financial HealthCheck assessments for our personal banking clients. We introduced a small business CIBC Financial HealthCheck planning tool this year to help small business owners meet both their personal and small business financial needs.

We also launched CIBC Financial HealthCheck Tips on our website, www.cibc.com, to provide clients with helpful advice on how to achieve their financial goals and how to select and get the best value from financial services options at CIBC.

For more comprehensive financial advisory solutions and planning, CIBC clients have access to more than 3,400 CIBC Advisors including CIBC Account Managers, Imperial Service Financial Advisors, CIBC Wood Gundy Investment Advisors, Private Banking Advisors and Investment Counsellors. This network of professionals, which includes more than 2,400 IDA-licensed advisors and close to 800 MFDA-licensed advisors, offers clients financial expertise and a wide range of services tailored to meet our clients' needs.

We continue to enhance our ability to provide holistic financial planning and advisory solutions to clients. Over the past two years, we have expanded CIBC Imperial Service, which is our branch-based financial planning and advisory offer, into additional markets. Clients experience a comprehensive approach to financial planning, working closely with a dedicated advisor. They benefit from a personalized financial plan to help them achieve their financial and retirement goals.

Strong, long-term relationships with advisors are fundamental to building client loyalty and satisfaction. We continue to enhance our advisor development and compensation programs to ensure we can attract and build specialized expertise and retain the best advisors.

In 2008, we will continue to enhance our strong advisory capabilities, integrated approach and emphasis on financial planning to deepen our client relationships and attract new clients.

We will introduce more specialized tools to address the complex financial needs of our affluent clients. This includes providing additional retirement planning tools in CIBC Imperial Service to address growing retirement planning needs and equipping our CIBC Wood Gundy advisors with more robust planning tools.

On May 15th 2007, CIBC marked its 140th Anniversary with celebrations in branches across Canada. At CIBC's Main Branch in Commerce Court, Toronto, James Rowan celebrated 62 years as a CIBC client. He is pictured here with Ursula Cosford, a 43-year CIBC employee.

Consistent client service experience

A key priority for CIBC is to ensure we are offering clients a consistent high-quality experience.

Clients want access, flexibility and choice. Our investment in strengthening CIBC's broad distribution network enables us to offer clients the flexibility to transact through the channels most convenient to them.

Enhancements to our branch network include 70 strategic branch expansions, relocations and new builds planned over the next five years, including 26 underway in 2007. These investments are aligned with our focus on high-growth markets across Canada. In addition, we continued to upgrade and maintain our existing branches to improve the banking experience for our clients through significantly increased year-over-year investment in 2007.

CIBC's public website www.cibc.com topped this year's ranking among the large Canadian banks in an independent report by Forrester Research, Inc., excelling in many of the key assessment areas, including website navigation and presentation, along with providing strong product content and tools. (Source: '2007 Canadian Bank Public Web Site Rankings', Forrester, April 2007.)

In 2007, CIBC completed a multi-year \$90 million upgrade to our 3,730 ABM network across Canada

to offer better access for persons with disabilities, enhanced security and new transaction features.

Finally, we continue to focus on providing a more consistent telephone banking experience for CIBC clients. Our Interactive Voice Response (IVR) system has been rated #1 in client satisfaction in North America for the past two years by Service Quality Measurement Group Inc. (SQM).

With approximately 240,000 newcomers entering Canada annually, CIBC is proactively addressing the financial needs of these clients. This year, we made it easier for newcomers to Canada to access financial services at CIBC by enhancing our website with information and advice. We also continued to enhance credit policies to address the specific needs of newcomers to Canada.

In 2007, CIBC introduced new electronic signature capabilities that make it easier and faster for clients to complete transactions. We also implemented the first stage in the development of a consolidated client information system.

In 2008, our focus will be on continuing to improve the client experience by enhancing our advisory and service capabilities; increasing accessibility for our clients by making continued investment in our branches, ABMs, telephone banking and online banking capabilities; and improving operational processes and technological capabilities.

Client-focused financial products and solutions

We continue to introduce competitive products and enhance existing ones to attract more of our clients' business to CIBC, whether they are looking for a mortgage, managing their credit, running a business or investing for their future.

Enhancements for our clients in 2007 included:

- Introducing 117 mortgage specialists into the CIBC branch network to offer specialized mortgage expertise to clients.
- Introducing free added-value features on all CIBC credit cards through CIBC CreditSmart, which helps clients track and manage their spending, monitor changes to their credit reports, be aware of potential fraudulent uses of their credit cards and deal with identity theft.
- Introducing the CIBC Aeroplan Mileage Multiplier to enable clients to earn Aeroplan miles faster with 1.5 miles for every dollar spent on gas, groceries and drug store purchases.

- Enhancing our credit card products to provide additional value to clients. For example, our no annual fee CIBC Platinum Visa® Card launched in fall 2006 has attracted new clients to our franchise in a highly competitive market.
- Helping clients build their savings by introducing product enhancements to our savings account products, as well as promotions that enabled clients to earn Aeroplan miles for switching to select CIBC banking products.
- Streamlining and enhancing our range of investment solutions by combining two of our mutual fund families under the Renaissance Investments brand to simplify investment decision-making for clients.
- Launching premium classes on two additional mutual funds to offer clients increased earnings

potential. Together with premium classes previously introduced, assets under management in the premium class have grown to over \$2 billion.

- Launching a flexible and competitive flat-fee offer to provide added value and convenience for online brokerage clients. The new CIBC Edge Advantage enables clients who trade frequently to benefit from lower pricing without restrictions on when or how they trade, or without a minimum asset threshold.

In 2008, we will sustain our focus on meeting more of our clients' needs in support of our goal to be the primary financial institution for our clients and deliver strong, consistent growth for our shareholders.

FIRSTCARIBBEAN
INTERNATIONAL BANK

FirstCaribbean International Bank

In 1920, CIBC established its first branches in the Caribbean marking the beginning of a strong relationship between the bank and the Caribbean region that continues to this day. For eight decades CIBC's presence across the Caribbean continued to grow, culminating in the combination of CIBC's Caribbean operations with those of Barclays Bank PLC in 2002, and the establishment of FirstCaribbean International Bank (FirstCaribbean). CIBC's commitment to the Caribbean was strengthened in 2007 by becoming the controlling shareholder of FirstCaribbean.

FirstCaribbean is one of the region's leading commercial financial institutions with an extensive presence of more than 100 branches and offices in 17 Caribbean countries, offering retail banking, corporate banking, international wealth management, capital markets, credit cards and treasury sales and trading services to more than 800,000 active client accounts.

Traded on the Barbados, Jamaica, Trinidad and Tobago and the Eastern Caribbean stock exchanges, FirstCaribbean is the largest regionally-listed bank in the English-speaking Caribbean, with assets of US\$12 billion and market capitalization of US\$3 billion.

In 2007, CIBC completed the acquisition of a controlling interest in FirstCaribbean International Bank bringing our current ownership to 91.4%. The FirstCaribbean acquisition is consistent with CIBC's priority to enhance our core business strength. FirstCaribbean's businesses are well established and align with CIBC's core businesses.

CIBC World Markets

Strategy

CIBC World Markets' objective is to maintain and build its strength as a leading broad-based investment bank in Canada, with targeted capabilities in the U.S., Europe and Asia.

Our strategy is to provide client solutions that facilitate credit and capital markets access as well as to provide advisory capabilities. We will accomplish this by emphasizing profitability and risk management in all of our activities.

We are committed to building value for our clients through leading industry expertise, product innovation and a consistent client focus.

Priorities

- Strong franchise value in our core Canadian businesses
- Regional capabilities that connect specific client opportunities in the U.S., Europe and Asia to our core platform
- Targeted capabilities in select businesses that are a good strategic fit and offer an appropriate balance of risk and return

CIBC World Markets is the wholesale and corporate banking arm of CIBC, providing a range of integrated credit and capital markets, investment banking, and merchant banking products and services to clients in key financial markets in North America and around the world. We provide innovative capital solutions and advisory expertise across a wide range of industries as well as top-ranked research for our corporate, government and institutional clients.

We are focused on providing client solutions that facilitate credit and capital markets access as well as providing advisory capabilities. We are committed to building value for our clients through leading industry expertise, product innovation and a consistent client focus.

Market leadership in Canada

CIBC World Markets is a leading provider of advisory expertise and financing for companies in Canada and in select markets around the globe. Our Canadian M&A business is consistently recognized for its strength and market leadership. We participated in some of the most notable deals of 2007 and are currently advising BCE Inc. on what would be the largest leveraged buyout in global history.

In 2007, CIBC World Markets demonstrated its strength in leading innovative full capital solutions as lead advisor, credit provider and underwriter to Fortis Inc. on its purchase of Terasen Inc.'s gas distribution business. The transaction, valued at \$3.7 billion, is the largest domestic utility distribution acquisition on record and included the third largest fully-paid bought deal in Canadian history.

This year, CIBC World Markets also participated in one of the largest debt transactions in Canadian history as lead manager for a \$9.0 billion bond issued by the Canada Mortgage Bond Program for Canada Housing Trust No. 1.

CIBC World Markets is a leading bank in Canadian equities and is recognized as the cross-border execution specialist for clients outside of Canada. Our range of product offerings and ability to leverage the distribution capabilities of CIBC's broad network is a competitive advantage that enables us to deliver exceptional value for our clients. Our partnership with other Canadian financial institutions

in a new proposed Alternative Trading System announced earlier this year will further support our strong domestic equities platform.

For our commercial banking clients, we offer connectivity with CIBC's wholesale franchise to support growing Canadian businesses. We continue to make changes in our business to provide a truly integrated set of products and services including our financial advisory, credit, cash management, trade finance and deposit capabilities.

At the forefront of new markets

CIBC World Markets is committed to providing focus and support to all of its clients across Canada. To help our clients take better advantage of opportunities in the marketplace, CIBC World Markets opened an investment banking office in Winnipeg becoming Canada's only major bank to have a dedicated investment banking office serving Manitoba and Saskatchewan.

We are committed to delivering industry leading products and services to meet the evolving needs of our clients and changing market conditions. We continue to invest and enhance our competitiveness in non-traditional service areas including our electronic trading capabilities and prime brokerage activities.

This year, we enhanced our leadership in retail structured products by offering Principal-at-Risk Notes (PAR) in addition to our successful Principal Protected Notes (PPN) business in Canada. We also expanded our cross-asset distribution expertise of structured equity-linked notes into new markets.

Targeted strength in global markets

CIBC World Markets continues to maximize value for its shareholders through operational effectiveness and strategic enhancements to our platform. This

includes the agreement CIBC announced subsequent to year-end to sell our U.S. investment banking, equity and leveraged finance businesses, as well as related capital markets businesses in Israel, Europe and Asia, to Oppenheimer Holdings Inc.

We will retain our other U.S. wholesale businesses, including our real estate finance, equity and commodity structured products, merchant banking and oil and gas advisory businesses.

In 2007, our U.S. real estate finance business continued to perform well, as the group co-led on four commercial mortgage-backed securities (CMBS) offerings this year totalling US\$5 billion, including our largest CMBS offering to date.

Looking forward, CIBC World Markets is well positioned in the U.S. to focus on our key competencies including real estate finance, merchant banking and equity and commodity structured products. It is also positioned to enable a network, services and lending capability aligned to meet the international needs of our Canadian clients.

CIBC World Markets is committed to supporting its clients through strong connectivity among its businesses, both domestically and in select markets around the world. This integrated approach has been key to our leadership on many of the world's largest mining transactions in recent years, including our role in 2007 as a principal advisor to Rio Tinto PLC on its announced US\$38.1 billion acquisition of Alcan Inc.

In Europe and the Asia-Pacific region, we are focused on developing regional capabilities that connect specific client opportunities in these markets to our core platform. Our partnership with The Balloch Group and the anticipated opening of our

investment banking office in Beijing will continue to support growth in this region.

Adapting to changing market conditions

In the second half of 2007, the rapid deterioration of the U.S. subprime residential mortgage market and the dislocation in the Canadian asset-backed commercial paper market significantly altered the landscape within which CIBC World Markets and other wholesale banks operate.

These difficult market conditions contributed to challenges specifically related to one area of our structured credit business, where we recorded mark-to-market write-downs on particular positions of our portfolio with exposure to the U.S. residential mortgage market.

We are retaining our capability to manage existing exposures and to service client needs in our structured credit business, while refining our focus to ensure our activities are in line with our strategic imperative of consistent and sustainable performance.

A leading voice on what matters

CIBC World Markets' economics team works to identify trends, risks and opportunities that affect the Canadian and global economies – and ultimately, our clients' businesses. We are recognized as a key definer of critical economic trends including oil prices, stock values, currency spreads and interest rates, and have a long and well-earned reputation for being ahead of the curve.

In 2007, CIBC World Markets' ahead-of-the-curve calls on the Canadian dollar, price of oil and role of Canada's oil sands in meeting future global demand helped our clients to navigate through a complex and changing marketplace.

This year, CIBC World Markets' Chief Economist and Strategist Jeff Rubin identified the emerging "Carbon Wars" – the response by North American governments to reduce carbon emissions and address public concerns about global warming. His analysis forecasts a government response that will have a significant impact on industries in Canada and it points to the need for companies to establish strategies to get ahead of the issues.

Overall, the group's research and analysis on this key economic issue, among others, has attracted the attention of industry, investors and governments across the globe.

CIBC World Markets' economics team works to identify trends, risks and opportunities, including the increasing importance of Canada's oil sands for companies, as well as the Canadian and global economy.

On September 30, 2007, Kayla and Angelica were among approximately 170,000 participants taking part in the 2007 Canadian Breast Cancer Foundation CIBC Run for the Cure.

Public Accountability Statement

This statement has been published by CIBC and the following affiliates of CIBC: CIBC World Markets Inc.; CIBC Inc.; CIBC World Markets Corp.; CIBC Mortgages Inc.; CIBC Life Insurance Company Limited; CIBC Trust Corporation; CIBC Securities Inc.; CIBC Investor Services Inc.; CIBC Global Asset Management Inc.; CIBC Global Asset Management (USA) Ltd.; CIBC Private Investment Counsel Inc.; CIBC Asset Management Inc.; CIBC BA Limited.

Our Clients

CIBC is committed to providing accessible, affordable banking, while protecting our clients and shareholders through strong governance practices. Being the leader in client relationships includes providing advisory solutions, products and services that address the needs of our diverse clients.

Providing accessible banking services

CIBC offers a wide range of products and services tailored to meet our clients' needs.

Our clients tell us they want to be able to meet their financial needs through many different channels. To accommodate their preferences, CIBC has one of the largest multi-channel networks of the Canadian banks. We provide 24/7 access to our financial services through ABMs, online banking, online brokerage and telephone banking.

CIBC has the second largest number of ABMs among the Canadian banks with more than 3,700. In 2007, CIBC completed a \$90 million upgrade to our ABM network to offer better access for persons with disabilities, enhanced security and new transaction features.

Through our 1,048 branches across the country, CIBC offers convenient access with extended banking hours and a strong presence in rural communities. In 2007, CIBC announced plans to open 16 new full-service branches across Canada in 2008 – 2009 to provide clients with greater flexibility, access and choice. These branches are part of CIBC's strategic plan to build, relocate and expand over 70 branches across the country by 2011. CIBC also announced that it would introduce Sunday branch hours in select urban branches beginning in the fall of 2007. We also serve clients through 80 CIBC Wood Gundy locations and more than 200 President's Choice Financial pavilions.

CIBC Telephone Banking provides 24/7 service in English, French, Cantonese and Mandarin, as well as an award-winning Interactive Voice Response (IVR) system that offers self-service convenience in these four languages. Existing clients can access information on most types of accounts by phone, including chequing, savings, mortgages, lines of credit and loans and investments.

Serving clients with special needs

Since the commencement of the branch accessibility survey program in mid-2005, we have surveyed most of our branches, including 371 in 2007, to better understand our clients' accessibility experience. We are using this information to improve accessibility, including parking, building and vestibule access, main branch circulation and counter access.

CIBC's *Access for All* ABM program, now available in almost all CIBC branches, is making banking easier for visually impaired clients, the elderly and persons with restricted mobility.

We also offer statements to clients in Braille and large print formats at their request, and advanced speech recognition and teletype (TTY) technology through Telephone Banking. CIBC's websites are designed to make access as easy as possible for hearing- and visually-impaired clients.

Through the mobile HLC Home Loans Canada mortgage sales force and our CIBC mortgage specialists, we can provide advice to clients on mortgages at their

CIBC's public website www.cibc.com topped this year's ranking among the large Canadian banks in an independent report by Forrester Research, Inc., excelling in many of the key assessment areas, including website navigation and presentation, along with providing strong product content and tools. (Source: "2007 Canadian Bank Public Web Site Rankings", Forrester, April 2007.)

In 2007, President's Choice Financial was ranked "Highest in Customer Satisfaction with Midsize Retail Banks", according to an independent study conducted by J.D. Power and Associates. (See page 161 for more information.)

CIBC Telephone Banking agents assist clients 24/7 through call centres across Canada. The service also helps clients with special needs who bank by phone.

home or office if they have mobility restrictions or if they prefer the added convenience.

Aboriginal banking solutions

CIBC is committed to providing comprehensive financial services to meet the personal and business financial needs of the Aboriginal community.

CIBC serves the Aboriginal community through our national network including seven on-reserve branches and an on-reserve agency. In addition, dedicated advisors offer clients informed advice and integrated financial solutions to meet their specialized requirements.

In 2007, CIBC contributed more than \$900,000 to organizations and programs that support Aboriginal communities.

We continue to support the development of financial literacy, offering a Personal Financial Planning program* in several Aboriginal communities.

Providing affordable banking solutions

CIBC provides a range of products and services to help make banking more affordable for our clients. Whether they are opening an account, getting a mortgage or choosing a credit card, CIBC offers clients low-cost solutions to meet their needs – from the low fee CIBC Everyday chequing account, to competitive

* Known as Personal Planning program in Quebec

mortgage rates, to no annual fee credit cards.

Our clients also have access to a low-cost banking alternative through President's Choice Financial, with in-store pavilions, ABMs, online banking and telephone banking. This year, President's Choice Financial representatives delivered more than 90 free mortgage seminars to homebuyers across the country.

CIBC introduced two new mortgage offers to make home buying more affordable for clients. Homebuyers with a 20% down payment can now save money on mortgage insurance premiums, which can be applied against their mortgage principal or fund other home buying expenses. CIBC also launched extended amortizations to make home ownership more affordable today while giving homebuyers the flexibility of shortening their amortization period through increased payments in the future.

Children, youth and students

To help young people get an early start on saving, CIBC offers free banking to clients under 19 years of age through the CIBC SmartStart program. Students can access funds for education expenses with the CIBC Education Line of Credit and discounted fees with CIBC Advantage for students. Those working towards certain professional designations can access competitive lending rates and flexible options through the Professional Edge Student Line of Credit.

Access for All ABMs in Branches – 3 year trend

CIBC's Access for All ABMs are installed at wheelchair accessible height and include headphone jacks for audio access; grab bars for persons with mobility impairments; and improved lighting to assist seniors and partially-sighted clients.

Seniors – The CIBC 60 Plus Advantage

For clients who are 60 years of age or older, the CIBC 60 Plus Advantage program offers special benefits, such as free transactions and no monthly fee on the CIBC Everyday Chequing Account.

Committed to small businesses

Small businesses are a vital part of Canada's economy. CIBC is committed to helping small business owners succeed by providing tailored banking solutions to help them achieve their business and personal goals.

We know that convenience is an important consideration for our small business clients. Small business owners can open business accounts in any CIBC branch, pay bills, transfer funds and apply for credit through remote channels, or assign routine financial transactions to delegates through our CIBC Small Business Customized Access feature. We also offer a choice of no annual fee and annual fee-based small business Visa cards.

In 2007, we introduced a consolidated online account view for small business owners, including their personal accounts, and we enhanced our capabilities to enable cheque reordering and address changes through remote channels. A new cash back offer enables small business and agricultural clients to invest in their business while receiving a competitive interest rate.

CIBC continues to support the small business and agriculture industries through investment in the Advancing Canadian Entrepreneurship (ACE) Student Entrepreneur of the Year Award, Canada's Outstanding Young Farmers Program, the Canadian Junior Achievement Conference and Women in a Home Office (WHO).

Respecting our clients

We are committed to treating our clients with respect, providing products and services in a professional manner and safeguarding our clients' personal information and privacy.

Our Service Commitment to You, available in branches and online, outlines our commitment to high-quality client service, fee transparency, privacy protection and confidentiality. The CIBC Code of Conduct for employees and comprehensive ongoing training programs include a strong focus on maintaining our clients' privacy and confidentiality as well as on detecting fraud and money laundering.

With the rising frequency and complexity of fraudulent activity faced by Canadian businesses,

CIBC Commercial Banking has been working with its clients to help safeguard their businesses against fraud. Sessions were held with business leaders across the country to help them understand and avoid issues such as cheque fraud, internal fraud, transaction fraud and loss or theft of important data.

In 2007, CIBC introduced enhanced security features like a new online security guarantee, anti-skimming devices on all ABMs and innovative CIBC CreditSmart features on CIBC credit cards that include spend and fraud alerts.

Resolving client complaints at the first point of contact continues to be a priority at CIBC. If a satisfactory resolution is not reached, the client is first referred to a trained Customer Care specialist, and then to the CIBC Ombudsman's office.

CIBC will continue to invest in enhanced programs, procedures and training to ensure we continue to fulfill our commitment to clients.

For information on branch openings and closings, ABM installations and removals and listed affiliates' debt financing to firms in Canada, please refer to pages 151 to 153.

The CIBC Spirit of Leadership Community Award continues to recognize CIBC Commercial Banking clients who show leadership in their communities through corporate giving. This year's recipient is Edmonton-based Spruceland Millworks, whose employees have helped raise more than \$10 million over the last 10 years for the Ben Sawatzky Foundation, helping underprivileged families around the globe.

Our Employees

CIBC Asian Employee Network members, one of eight Affinity Groups, participated in CIBC's 15th annual Diversity Month kick-off event on June 1, 2007.

CIBC's vision, mission and values are at the centre of our commitment to create a positive employee experience and a diverse, supportive, results-oriented work environment.

We believe that by creating opportunities to enhance knowledge and skills, providing a safe and healthy workplace, and encouraging a positive work/life balance, our employees will be able to perform at their best, contribute to their communities, and fulfill CIBC's vision to be the leader in client relationships.

"CIBC has made significant progress in increasing Aboriginal participation in its workforce. Of particular note is CIBC's ongoing commitment to advancing Aboriginal youth through the promotion of education and scholarships. Through efforts like these, I am confident that we can look forward to the day when Aboriginal people are actively engaged in all areas of financial management."

*Brenda Nadjiwan, Regional Coordinator,
Aboriginal Workforce Participation Initiative, Indian and Northern Affairs, Canada*

Creating a positive employee experience

Our employees are the most important element of CIBC's strategy to deliver consistent, sustainable performance over the long term. Our priority is to create a positive employee experience and a supportive work environment where our employees can excel and fulfill CIBC's vision of being the leader in client relationships.

In 2007, we began seeking feedback from our employees annually instead of every two years through our Employee Survey. Feedback about what employees are experiencing and how they view the organization is important because it provides information to help make CIBC the best place to work, learn, contribute and succeed. Participation in the 2007 survey was 86%. The Employee Commitment Index, which measures the strength of the overall relationship between employees and the organization, was at its highest level since the index was introduced in 1998. Results further indicated that for a strong majority of employees and leaders, support for CIBC's values of trust, teamwork, and accountability was high within their teams.

CIBC's Code of Conduct is one of the ways we promote CIBC's values. It guarantees every employee the right to be respected, to receive fair and equitable treatment, to be free from harassment or discrimination, and to be protected from retaliation if they report a contravention of the Code. All employees are required to complete annual certification and testing on the Code.

We are continuing our focus on training and development as a critical element of our employees' success and CIBC's success. To help our employees grow, develop and achieve their full potential, we enhanced our Corporate Training and Development group, which is responsible for providing corporate-wide training and development programs in the areas of People Management, Regulatory and Mandatory Training, new employee orientation and core capabilities such as project management and presentation skills.

In 2007, we invested approximately \$54 million globally on training, including governance and regulatory compliance, client service, product knowledge and a broad range of business and technical skills. Training is accessible for all employees through a web-based learning management system.

We consolidated numerous regulatory training courses into one annual mandatory training program for employees. The annual program incorporates training with respect to CIBC's vision, mission and values. Additional vision, mission and values training is provided to managers to ensure a healthy, safe and secure workplace.

CIBC recognizes the importance of retaining and developing our future leaders. In 2007, we created a Talent Management group to identify critical talent and design and deliver talent management programs that will position CIBC to better know our employees and develop them appropriately.

Senior management representation rates and goals (as at Dec. 31, 2006)

%	Rate	Goal
Women	29.0	25.1
Visible minorities	10.9	8.2
Persons with disabilities	5.4	1.9
Aboriginal peoples	0.5	2.6

Workforce representation rates and goals (as at Dec. 31, 2006)

%	Rate	Goal
Women	68.2	62.4
Visible minorities	21.8	20.9
Persons with disabilities	3.9	3.9
Aboriginal peoples	1.6	1.6

CIBC achieved workforce representation goals for women, members of visible minorities, Aboriginal peoples and persons with disabilities.

Ontario's Lieutenant Governor, the Honourable David C. Onley, presents the 2007 CIBC Diversity Awards to recipients.

CIBC is committed to building a workforce that reflects the clients and communities we serve. Our eight Affinity Groups, representing more than 2,200 employees, have helped create a workplace that provides equity and opportunity for everyone. By the end of 2006, CIBC had met or exceeded workforce representation goals for the four designated employment equity groups: women, members of visible minorities, Aboriginal peoples and persons with disabilities. Representation goals are based on national labour market availability rates provided by Statistics Canada for each designated group. We are focused on maintaining and growing our representation levels for all groups.

In 2007, CIBC convened its second National Employment Equity and Diversity Congress. The Congress reviewed the accomplishments of the first year of the current three-year plan and identified key strategies for year two. June 2007 marked CIBC's 15th annual Diversity Month. During the month, CIBC employees organized more than 150 events, including panel discussions, employee workshops, open houses and cultural festivals.

On CIBC's Board of Directors, women hold five of the 17 positions. As part of our ongoing Board renewal program, we regularly assess the skills and characteristics of CIBC Board members against current and anticipated needs, enabling the Board to maintain the appropriate skill set to oversee CIBC's businesses and performance.

CIBC is the first Canadian bank to integrate the Skills International online résumé database of internationally trained professionals into its recruitment management system. This enables access to a pool of internationally educated newcomers to Canada. CIBC's online career site provides resources to assist newcomers in their job search, including how to obtain foreign credential assessment, tips on effectively communicating education, skills, and work experience, and listings of government and community resources.

In 2007, CIBC was recognized with a Top Employers for Workplace Diversity award by *Canadian Immigrant* magazine.

A focus on performance

Managing performance is key to building long-term, sustainable growth for our employees, clients and shareholders.

CIBC's backup child care program provides emergency child care services to employees in Canada and the United States.

CIBC's Performance Management and Measurement (PMM) process ensures employees are clear about expectations and how their individual goals support the goals of their business and CIBC overall. In addition to goals specific to their roles and line of business, all executives and employees have common goals related to CIBC's vision, mission and values.

The overall process, which includes goal setting, a mid-year check and a final year-end performance review, provides the opportunity for managers and employees to:

- Share ownership for success which includes measures to address developmental needs
- Have an ongoing dialogue about progress against goals and how to build on success or address any shortfalls
- Engage in a final year-end review and arrive at a final performance rating

Pay-for-performance is the foundation of CIBC's compensation philosophy. Most employees participate in variable compensation programs with individual awards based on i) the employee's results against their scorecard goals; ii) line of business results; and iii) CIBC's overall performance. Managers assess and evaluate employee performance against both their goals and their contribution relative to their peer group.

In 2007, the CIBC group of companies paid almost \$2.4 billion in base salaries and benefits to our Canadian workforce. Approximately 69% of CIBC employees participate in the employee share purchase plan which allows employees to participate

as a shareholder of CIBC through investment in common shares.

CIBC recognizes and rewards employees who consistently make an outstanding contribution through our Achievers program. Achievers exemplify CIBC's values of trust, teamwork and accountability. Formal recognition takes place through Quarterly and Annual Awards where top performers are formally recognized for their accomplishments.

Health and well-being

Creating a safe and healthy work environment where all employees can balance their work and life and contribute to their communities is very important. CIBC is committed to providing a comprehensive range of benefits and programs that support the overall health, wellness and long-term financial security of employees.

To assist in managing rising health care costs, CIBC advocates a smart consumer approach to employee health care. Employees are encouraged to take advantage of CIBC-negotiated discounts, use generic drugs and use pharmacies with lower dispensing fees to proactively manage costs for themselves and for CIBC.

CIBC also uses an innovative, preventative health care program called Wellness Checkpoint, a confidential, online assessment tool that identifies health risks and provides information about achieving a healthier lifestyle and general health resources. Launched in 2001, more than 11,000 employees have completed the Wellness Checkpoint.

Our Employee Assistance Program offers advice and assistance in resolving personal and workplace issues, and provides information about community services to help employees balance work and family responsibilities.

In 2007, CIBC introduced Personal Days to provide employees and managers an additional three days to better balance work and personal obligations. Personal Days cover such things as accommodation for religious holidays, caring for ill family members and other personal/family emergencies and responsibilities.

CIBC continues to lead the industry with Employment Insurance top-up benefits during maternity, parental, adoption and compassionate care leave. In 2007, CIBC announced the introduction of top-up benefits for birth fathers, which will take effect in May 2008.

In 2007, CIBC launched its updated and streamlined online health and safety training and required all managers and supervisors to complete the training.

In 2007, CIBC reported a Disabling Injury Incidence Rate of 0.15, which indicates the number of disabling and fatal injuries on the job, per 100 employees, in Canada. CIBC's global turnover rate for permanent employees, excluding retirees, was 15.8%.

For detailed employment figures, see page 154.

Number of employees completing assessment questionnaire on Wellness Checkpoint
(as at Oct. 31)

Short- and long-term disability new cases/ 1,000 employees

	STD	LTD
New cases/ 1,000 employees	97.1	13.5

CIBC's industry-leading disability management process encourages communication between managers and employees on disability leave and facilitates their return to work.

In 2007, our campus recruitment program hired 106 summer students and 81 full-time recent graduates – CIBC's highest recorded number of on-campus hires.

Our Communities

2007 CIBC Youthvision
Scholarship recipients –
Ontario region

As a leader in community investment, CIBC is committed to supporting causes that matter to our clients, our employees and our communities. We aim to make a difference through corporate donations, sponsorships and the volunteer spirit of employees. With a strategic focus on youth, education and health and employee support for causes including the Canadian Breast Cancer Foundation CIBC Run for the Cure, the CIBC World Markets Children's Foundation and the United Way, CIBC is investing in the social and economic development of communities across the country.

"It was daunting when I thought about the debt load for the years of school I would need. Even with working, saving, student loans and bursary applications, there was still a gap. The CIBC Youthvision Scholarship was a positive turning point in my life. I'll always be grateful to CIBC for the opportunity that was given to not only me, but to others like me."

Kristopher Keen, CIBC Youthvision scholarship recipient 2000, BA Honours, 2006, Brandon University

Making a difference

In 2007, the CIBC group of companies contributed more than \$36 million globally to charitable and non-profit initiatives. Of this, more than \$27 million was invested in Canada, including more than \$20 million in charitable donations, supporting a wide variety of national, regional and local organizations. To see examples of CIBC’s contributions to community organizations by province, see page 155. For information on taxes paid in Canada, see page 154.

Youth

Helping young people achieve their full potential is a priority for our community investment program.

CIBC World Markets Children’s Foundation

On the first Wednesday of December every year, CIBC World Markets sales and trading professionals and CIBC Wood Gundy Investment Advisors in Canada and around the world help create miracles for children. On this day, fees and commissions are donated to children’s charities dedicated to improving the health, well-being and education of children. On December 6th, 2006, CIBC World Markets Miracle Day raised \$12.7 million globally. In Canada, Miracle Day generated \$3.7 million to support more than 400 children’s charities in communities across the country. Since 1984, Miracle Day has raised more than \$180 million to benefit children in our communities around the world.

In addition to Miracle Day, the CIBC group of companies contributed more than \$4 million in 2007 to hundreds of initiatives that support mentoring, skills development, financial literacy training, nutrition and health, anti-bullying, youth shelters and programs for young people with disabilities.

Education

CIBC is committed to investing in the education of Canada’s young people.

CIBC Youthvision Scholarship Program

Through a unique partnership with Big Brothers Big Sisters of Canada and YMCA Canada, CIBC provides funding for scholarships and internships to help young Canadians prepare for their future. Thirty scholarships, valued at up to \$34,000 each, are awarded annually to Grade 10 students enrolled in mentoring programs with these two community partners. In addition to tuition support, recipients may participate in summer internships at YMCA agencies across the country after completing Grade 11. This program represents a multi-year commitment of more than \$10 million. To date, 270 CIBC Youthvision Scholarships have been awarded across Canada.

On October 1, 2007, Canada Company announced a new educational scholarship fund to support the post-secondary education of children of fallen soldiers. CIBC is providing leadership funding of \$1 million over 10 years to this fund.

As a designated Imagine Caring Company, CIBC consistently exceeds the target of 1% of pre-tax profits – the benchmark for corporate giving established by Imagine Canada.

Charitable donations by category in Canada

With a strategic focus on youth, education and health, CIBC is making a difference in communities where our clients and employees live and work.

Through the work of the CIBC World Markets Children’s Foundation, funds raised on Miracle Day support a wide range of children’s charities. In Canada, over 400 organizations received funding this year.

CIBC was the title sponsor of the Tour CIBC Charles Bruneau, a bicycle trip across the province of Quebec to raise funds to help children in their fight against cancer. The tour goal of \$500,000 was raised during the 600 km, four-day event. Pierre Bruneau, Chairman of the Board of Directors, Fondation Centre de cancérologie Charles Bruneau and Sylvain Vinet, Senior Vice-President, CIBC Retail Markets, Eastern Canada are shown at the Trois-Rivières stop on the Tour.

In addition, CIBC contributes \$100,000 each year to the National Aboriginal Achievement Foundation for bursaries and scholarships in post-secondary education. The purpose is to meet the financial needs of First Nations, Inuit and Métis students in their pursuit of excellence in all academic disciplines.

CIBC's multi-year commitments to universities and colleges across Canada total almost \$18 million. Of this, more than \$6 million is directed to bursaries and scholarships to enable students to pursue post-secondary studies.

Health

CIBC contributes to organizations that promote the health and well-being of Canadians.

Canadian Breast Cancer Foundation

CIBC Run for the Cure

On September 30, 2007, \$26.5 million was raised by more than 170,000 participants in 53 communities in the 16th annual Canadian Breast Cancer Foundation CIBC Run for the Cure. This is the largest, one-day fundraising event for breast cancer in Canada. We are proud of the contribution our employees have made to the Canadian Breast Cancer Foundation (CBCF) over the past 16 years. CBCF is the leading volunteer-led organization in Canada dedicated to creating a future without breast cancer. It was the commitment of CIBC employees to this cause that convinced CIBC to become title sponsor of this event in 1997, a role we have maintained for 11 years.

Close to 10,000 people participated on Team CIBC in 2007, raising \$2.7 million. In addition to this

CIBC employees in British Columbia and the Territories raised more than \$395,000 for the 2007 BC Children's Hospital Campaign. Pictured are Rob Nunn and Michael Goerzen, CIBC employee campaign chairs and their children.

CIBC Run for the Cure funds raised
(\$ millions)

Over the past 16 years, the Run has raised more than \$170 million with the aim of creating a future without breast cancer.

Employee as Ambassador Program participation
(# of participants)

Year-over-year, CIBC employees and retirees demonstrate their volunteer spirit in the communities where they live and work.

Team CIBC members walked over 60 km on the July 28th weekend in support of the Calgary Weekend to End Breast Cancer. Close to \$12,000 was raised in support of the Alberta Cancer Foundation by the individuals shown above: Grant Williams, Cathy Stretch, Liz Stretch, Sandra Graf and Tom Weber.

In 2007, Donna Aylward of St. John's received a donation in support of Big Brothers Big Sisters of Eastern Newfoundland through the Employee as Ambassador Program. Donna, now in her fifth year as a volunteer with the in-school mentoring program, is shown above with her mentee, Natalie.

fundraising achievement, more than 6,000 CIBC employees volunteered in various roles to support the Run at 53 run sites across Canada.

Further contributions to the health of Canadians include multi-year commitments of more than \$19 million to hospitals and health research facilities across Canada. Many of our contributions in health care fund the research and treatment of breast cancer.

Employee as Ambassador Program

CIBC encourages volunteerism among its employees and retirees and supports their commitment to local activities through the Employee as Ambassador Program. Through this initiative, CIBC will donate up to \$1,000 to charitable and not-for-profit community organizations where employees volunteer their time and expertise. In 2007, 945 employees and retirees participated in this program, resulting in contributions of more than \$650,000. The value of grants made through this program in 2007 increased 13% from 2006.

United Way

As a leader in community investment, CIBC has a long tradition of supporting United Way. Each fall during our "Real Heroes" campaign, our employees and retirees demonstrate their support for local United Way agencies through their fundraising efforts and personal donations. The 2006 CIBC

United Way campaign raised \$7.8 million, with more than \$4.9 million resulting from the generosity and efforts of CIBC employees and retirees. These funds were distributed to 124 United Way agencies across Canada.

CIBC employees participated in a United Way Day of Caring at the Jane and Finch Boys and Girls Club in northwest Toronto. Volunteers helped in the renovation of "The Garage", an old garage that is being converted into 1,800 square feet of programming space for youth in this neighbourhood.

Our Environment

CIBC is committed to being an environmentally responsible organization. We demonstrate this through continued enhancements to our environmental risk management policies and procedures, initiatives to minimize CIBC's impact on the environment, promotion of environmental stewardship practices and support of strategically-aligned environmental organizations.

"CIBC took early action amongst its peers in the Canadian banking sector in examining the business risks arising from climate change. Through ongoing dialogue throughout the year, CIBC continues to be responsive to emerging environmental issues we have raised. They seek input from stakeholders on measures to reduce the bank's own footprint on the related issues of biodiversity protection and forest conservation."

Robert Walker, Vice President Sustainability, The Ethical Funds Company

Our commitment to environmental responsibility

CIBC has a longstanding commitment to being an environmentally responsible organization. Our Corporate Environmental Policy, originally approved by our Board of Directors in 1993 and last updated in 2007, tasks CIBC with responsible conduct in all activities to protect and conserve the environment, safeguard the interests of all stakeholders from unacceptable levels of environmental risk and to support the principles of sustainable development.

Through ongoing research and benchmarking on relevant environmental issues, CIBC has continued to respond to challenges arising from its business activities. For example, in 2006 we completed a major portfolio risk review related to potential regulatory requirements for mandatory greenhouse gas emission reductions in certain industries. In 2007, we used this study as the foundation for our ongoing research on climate change-related issues and initiatives both in terms of business opportunities and risks pertaining to our major businesses and operations.

Credit and investment risk management

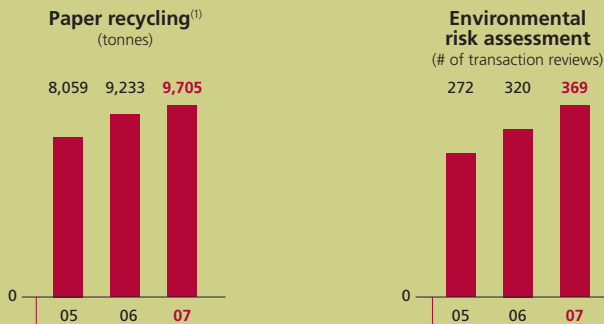

Environmental risk assessment has been incorporated in our commercial and small business credit adjudication processes since the early 1990s. The latest version of our environmental credit standards and procedures was rolled out in 2007 and adds guidance

for environmental due diligence on issues such as climate change and biodiversity. As well, it updates requirements for environmental risk assessments associated with client operations. Processes are also in place to ensure that environmental risk factors are appropriately considered in due diligence related to our merchant banking and investment banking activities. Our standards also include requirements for environmental and social risk assessments for project finance transactions in accordance with our commitment to the Equator Principles, to which CIBC has been a signatory since 2003. One new project finance transaction, to which the Equator Principles would apply, was undertaken in 2006.

Stakeholder engagement and disclosure

At CIBC, we recognize that stakeholder engagement is essential to facilitating a broader understanding of environmental issues. Building strategic partnerships, holding forums for multi-stakeholder dialogue and ongoing consultation are avenues we use to engage with our stakeholders. As an example, in 2007, we co-hosted a workshop on Social and Environmental Issues in Oil and Gas Development and Finance. We also continue to engage non-governmental organizations (NGOs) and investors on strategic key issues, including climate change and biodiversity.

CIBC participates in a variety of national and international environmental associations. In 2007, we continued to chair the North American Task Force

In 2007, 9,705 tonnes of paper products were recycled across CIBC's branch network and office buildings in North America, saving the equivalent of approximately 180,000 trees.

Since 2005, the number of transactions referred to CIBC Environmental Risk Management for specialized environmental credit reviews has increased by 35%.

The CIBC Enviro-Saver mortgage offers low cost, flexible financing plus a gift certificate towards an energy audit, giving home owners the tools needed to make energy and money saving improvements.

Apart from environmental risk assessment data, all metrics contained in this report have been provided by third-party service providers/suppliers, and are based upon best available data.
 (1) Numbers have been restated to reflect adjustment in supplier's methodology.

Since 1996, CIBC has been a founding sponsor of the Waterfront Regeneration Trust, an organization dedicated to the restoration and promotion of the Lake Ontario Waterfront Trail and Greenway.

of the United Nations Environment Programme's Finance Initiative (UNEP FI). We are also an active participating member of the Canadian Bankers Association Environmental Issues Specialist Group and the Environmental Bankers Association.

Our 'CIBC & the Environment' internal and external websites are the primary vehicles used to communicate our programs with all stakeholders, along with our environmental e-mail account that encourages dialogue with stakeholders and special interest groups.

CIBC is both a signatory to and participant in the Carbon Disclosure Project's fifth information request (CDP5). The CDP5, which represents a group of 315 institutional investors with \$41 trillion in assets under management, assesses how the largest companies in the world manage climate change issues. In 2007, CIBC was recognized as "best in class" as one of 68 FT500 companies and one of only 15 financial institutions included in the

Carbon Disclosure Project's global Climate Disclosure Leadership Index. In addition, the Conference Board of Canada selected CIBC as one of 16 Canadian corporations recognized as CDP 2007 – Canada 200 Carbon Disclosure Leaders.

CIBC World Markets provides extensive analyst coverage of industry segments, which helps build environmental awareness in various markets. In addition, in 2007, articles such as *Evaluating Carbon Risk in the Canadian Economy* and *Weighing Carbon Costs in Canada* have provided valuable insight on climate change and its potential market and business impacts in terms of both risks and opportunities.

Minimizing our 'environmental footprint'

CIBC's Environmental Management Committee oversees environmental programs and initiatives to reduce the environmental impact of our operations and to verify the effectiveness of our environmental management system.

Under a program that commenced in 2005, environmental site inspections have been carried out at 1,115 branches across Canada, including 460 in 2007, with the objective of identifying and remediating hazardous materials and environmental risks.

CIBC participates in waste reduction programs to reduce, reuse and recycle wherever possible. For a fourth consecutive year, waste audits have been conducted across 50 pilot branch locations. Based on 2007 results, our estimated total waste generation across our branch network is 1,105 tonnes, compared to 1,182 tonnes last year. CIBC has a long history

Direct CO₂ emissions⁽¹⁾⁽²⁾
(thousands of tonnes)

CIBC's carbon dioxide (CO₂) emissions from the combustion of natural gas and fuel oil were comparable to 2005 levels.

Indirect CO₂ emissions⁽¹⁾⁽²⁾
(thousands of tonnes)

CIBC's carbon dioxide (CO₂) emissions from employee business travel and electricity purchases have decreased by 3% since 2005, primarily due to a reduction in employee business travel.

Energy consumption⁽²⁾
(thousands of gigajoules)

In 2007, CIBC consumed 808 thousand gigajoules (GJ) of energy, a reduction of approximately 11,000 GJ.

(1) All values for direct and indirect CO₂ emissions are based on the GHG Protocol Initiative. For CO₂ emissions from purchased electricity, Environment Canada's National Inventory Report 1990 – 2005 has also been used to calculate provincial greenhouse gas emissions conversion factors. As a result, 2005 and 2006 data has been restated accordingly.
(2) Energy consumption data (and its associated CO₂ emissions) is from CIBC's retail branch network and owned office buildings.

of actively reusing its office furniture. Since 2005, the first year we began monitoring such items, we have diverted 18,886 pieces of office furniture from landfills (7,028 pieces in 2007).

In an effort to provide an environmentally friendly workplace for our employees, we are integrating sustainable design criteria into our existing building standards. Our approach is to continue to evaluate and integrate all opportunities for the reduction and rationalization of energy and materials use within the physical building, interior and exterior, and mechanical and electrical systems. Our overall goal is to achieve a building design equivalent to or better than LEED (Leadership in Energy & Environmental Design) Certification.

In 2007, we implemented a new and sustainable mechanical and electrical design standard for CIBC, with our first pilot location using this standard scheduled to open by 2008. This design approach includes efficient management of energy and water resources, management of material resources and waste, protection of environmental quality, protection of health and indoor environmental quality and reinforcement of natural systems.

This year, we also started a program to replace old and inefficient heating, ventilation and air-conditioning systems. This program focuses on life-cycle analysis, identifying components past their operational life expectancy and replacing them with more efficient and environmentally friendly products and materials. Examples of the components included in this initiative are roofs, windows, flooring and furniture.

Our lighting technology undergoes continuous improvements to optimize energy savings, including the installation of daylight sensors for ABM lobby lighting, motion sensors in all back areas and timers for exterior signage. In any new builds or renovations, we specify low-E glass, along with proper blinds to reduce heat gain and solar glare and improve our energy savings. CIBC is also investigating the potential benefits of cool roofing systems.

Procurement

CIBC has integrated environmental considerations into its procurement activities in keeping with its objective of forming business relationships with suppliers who follow acceptable environmental management practices. CIBC's *Environmentally Responsible Procurement Standard*, formalized and published in 2007 following consultation with external stakeholders, outlines requirements for the integration of environmental criteria into all applicable procurement activities.

The Standard's environmental evaluation form used at the outset of a supplier relationship includes reporting criteria related to suppliers, environmental management systems as well as product-specific questions on energy efficiency, efficient use of natural resources, recycling options, product take-back options, and conditions to promote ecologically sustainable forest practices.

For more information on CIBC and the environment, visit www.cibc.com.

In 2007, CIBC purchased 1,750 tonnes of office paper, a reduction of 22% since 2005.

CIBC is a founding member and the largest corporate supporter of Industry Canada's Computers for Schools program. Since it was established in 1993, we have donated more than 38,500 computer components.

18 CIBC branches in the Vancouver area will offset 100% of their carbon dioxide emissions over the next two years through the purchase of BC Hydro Green Power Certificates.

Governance

Our commitment to strong governance principles and an effective implementation framework is a key underpinning to CIBC's long-term success. Under the strategic oversight of an experienced Board of Directors committed to leadership in corporate governance, this framework continues to evolve. Together with management, the Board actively sets the tone for a corporate culture that fosters accountability, openness and transparency.

Regular and candid interaction between the Board and management strengthens governance and supports the long-term interests of CIBC. Pictured is Jalynn Bennett, Chair of the Corporate Governance Committee, with Gerry McCaughey, President and Chief Executive Officer, and Bill Etherington, Chairman of the Board.

Demonstrating sustained leadership in governance practices

The Board of Directors and management of CIBC are committed to excellence in governance and recognize how our leadership in the area of governance contributes to CIBC's long-term success. Not only do we conduct regular reviews and assessments of governance trends and practices, but we listen to our shareholders and employees. Our objective is to continue strengthening our governance structure and processes. We are proud that external organizations are publicly acknowledging our governance achievements.

In 2007, the Canadian Coalition for Good Governance (CCGG) recognized CIBC for best practices in shareholder communications and compensation disclosure. In addition, CCGG identified CIBC as one of only four Canadian companies with an "innovative" disclosure practice. We are honoured that CCGG presented us with a *2007 Honourable Mention Governance Gavel Award for Excellence in Director Disclosure*.

In its June 2007 final report, the *ICD Blue Ribbon Commission on The Governance of Executive Compensation in Canada* listed CIBC as an example of "best practice" in compensation disclosure. CIBC continues to listen to shareholders and employees and participate in industry discussions on executive and director compensation disclosure proposals, as we strive to excel in this area.

CIBC maintains its inclusion on a number of global indices that assess responsible business policies and practices, including the Dow Jones Sustainability World Index, the FTSE4Good Index and the Jantzi Social Index.

Practicing independent assessment and oversight

The Board recognizes the importance of maintaining its independence. All but one of CIBC's directors are considered independent under the Board's Independence Standards which are derived from the Affiliated Persons Regulations under the Bank Act, the corporate governance rules of the New York Stock Exchange (NYSE) and the corporate governance guidelines of the Canadian Securities Administrators. Gerry McCaughey is not independent because he is CIBC's President and Chief Executive Officer. Our Board of Directors Independence Standards are available at www.cibc.com.

The Board's independent decision-making is not driven exclusively by the Board's annual determination

of each director's independence. The Board uses other tools to achieve independence as well. Every year the Board reviews, and discloses, any Board interlocks as well as a director's service on other public company audit committees. The Board also regularly reviews whether directors have a material interest in a CIBC transaction, with an affected director excusing himself or herself from the meeting at which the transaction is being considered and not voting on any resolution to approve that transaction. The Board and its committees may obtain the advice of external experts without involving management and conduct regular sessions without any members of management present. These tools assist the Board in making independent and effective decisions.

Guided by an effective governance framework and committee structure

CIBC's governance framework guides the Board and management in fulfilling their obligations to CIBC and its stakeholders. At the heart of this framework is a robust set of governance and control policies and procedures, overseen by a qualified and experienced Board of Directors with diverse backgrounds and skills; and supported by a constructive relationship between the Board and management.

The Board has established four committees to assist in carrying out its duties and to enhance governance. Management committees are in place to support the senior executive team on the governance and control activities of CIBC and various aspects of the oversight of CIBC's operations. (See table on page 34.)

Committed to transparent and timely reporting

The directors and management of CIBC are committed to promoting consistent disclosure practices aimed at accurate, timely and broadly disseminated disclosure of material information about CIBC. The *CIBC Disclosure Policy* sets standards for coordinating disclosure of material information about CIBC to the market. The policy is available at www.cibc.com and provides further details regarding communications with investors, analysts and media, as well as our process for earnings announcements.

Providing governance information to all our stakeholders

CIBC is committed to providing all our stakeholders with comprehensive and easily accessible information about governance. Further details regarding CIBC's

corporate governance are posted on our website at www.cibc.com. Please refer to any of the following documents for more information:

- CIBC's *Statement of Corporate Governance Practices*, which states our vision, describes our comprehensive governance framework, details the Board's responsibilities and describes Board policy on Board composition, responsibilities and performance evaluation; director nomination, tenure, independence and education; director and executive compensation; management succession and CIBC's codes of conduct and ethics.
- A summary of significant differences between CIBC's governance practices and those

required by U.S. domestic issuers listed on the New York Stock Exchange is available at www.cibc.com.

- CIBC's *Code of Conduct*, which promotes ethical decision-making for all employees and supports behaviour that is consistent with CIBC's core values of trust, teamwork and accountability. All employees are required to complete annual certification and testing on the *CIBC Code of Conduct* and directors certify annually on the *CIBC Code of Ethics*.
- CIBC's *Management Proxy Circular*, which provides information on each of our directors, reports on each of our Board Committees and offers a complete discussion on our corporate governance practices.

Board Committee	Key Responsibilities
Audit Committee	<ul style="list-style-type: none"> • Reviews the integrity of CIBC's financial statements, financial disclosures and internal control over financial reporting; • Monitors the system of internal control and CIBC's compliance with legal and regulatory requirements; • Selects the external auditors for shareholder approval; • Reviews the qualifications, independence and performance of the external auditors and CIBC's internal auditors; • Acts as the Audit Committee for certain federally regulated subsidiaries. <p><i>Members: J.H. Bennett, G.F. Colter (Chair), I.E.H. Duvar, C.M. Trudell, R.W. Tysoe</i></p>
Corporate Governance Committee	<ul style="list-style-type: none"> • Assists the Board of Directors in fulfilling its corporate governance oversight responsibilities. It also acts as the conduct review committee of CIBC under the Bank Act (Canada). <p><i>Members: J.H. Bennett (Chair), G.F. Colter, G.D. Giffin, J.S. Lacey, C. Sirois</i></p>
Management Resources and Compensation Committee	<ul style="list-style-type: none"> • Assists the Board of Directors in fulfilling its supervisory responsibilities in relation to CIBC's human resource policies and practices, including the oversight of the CIBC pension plans. <p><i>Members: W.L. Duke, M.A. Franssen, L.S. Hasenfratz, J.S. Lacey, C. Sirois (Chair)</i></p>
Risk Management Committee	<ul style="list-style-type: none"> • Assists the Board of Directors in fulfilling its responsibilities in relation to the identification, measurement, monitoring and controlling of CIBC's principal business risks. <p><i>Members: B.S. Belzberg, G.D. Giffin, J.P. Manley, L. Rahl, S.G. Snyder (Chair)</i></p>
	<i>G.T. McCaughey and W.A. Etherington are invited to attend meetings of these committees and attend as many meetings as possible.</i>
Management Committee	Key Responsibilities
Capital and Risk Committee	<ul style="list-style-type: none"> • Oversees credit, liquidity, market and operational risks and matters relating to the composition and usage of CIBC's balance sheet (including capital) and the measurement, monitoring and control of related resources.
Disclosure Committee	<ul style="list-style-type: none"> • Assists the Chief Executive Officer and Chief Financial Officer in fulfilling their oversight responsibility for the accuracy, completeness and timeliness of CIBC disclosure. • The purpose of the committee is to promote consistent disclosure practices aimed at accurate, complete, timely and broadly disseminated disclosure of material information about CIBC to the market in accordance with applicable laws and stock exchange requirements.
Reputation and Legal Risks Committee	<ul style="list-style-type: none"> • Provides management oversight of all reputation risks and legal risks associated with transactions between CIBC and its clients.
Governance and Control Committee	<ul style="list-style-type: none"> • Acts as the most senior point of management review, counsel and input on the design and assessment of CIBC's governance and internal control structure, within the parameters and strategic objectives established by the Chief Executive Officer and direction provided by the Board.

Functional Groups

Priorities

Administration, Technology & Operations (AT&O)

The AT&O group is comprised of more than 10,000 employees in the areas of technology infrastructure and solutions, operations, human resources, and communications and public affairs. These people manage and enhance the technology and operational processes that run CIBC's businesses worldwide, as well as providing specialized service and advice to our business partners. In addition, our subsidiary company, INTRIA Items Inc., provides items processing, currency and print services to CIBC and to other Canadian companies. The AT&O team made a meaningful contribution to CIBC's productivity improvements in 2007, while meeting our targets for CIBC client service. We also led many employee and communications initiatives to improve the effectiveness of CIBC employees in all of our businesses.

- Simplify complex technology and operational processes to improve effectiveness and efficiency
- Maintain robust and secure operating platforms for all of our clients
- Enhance CIBC's reputation through continued improvement in controls and security

Corporate Development

Corporate Development is a key participant in creating long-term value for CIBC and its shareholders and in directing CIBC's strategic planning process. The group works to maximize the value of CIBC's portfolio of businesses through the identification, assessment and execution of strategic transactions. During 2007, the Corporate Development group was integral in CIBC's completion of the acquisition of Barclays Bank PLC's interest in FirstCaribbean, which resulted in CIBC having more than 91% ownership interest of the largest regionally-listed bank in the English-speaking Caribbean. The group was also active in managing CIBC's interests in and strategic relationship with both FirstCaribbean and CIBC Mellon. Corporate Development also partnered with CIBC's lines of business in identifying opportunities for growth and increasing the value of existing businesses.

- Grow FirstCaribbean and CIBC Mellon earnings
- Develop alternatives for non-core and/or under-performing businesses
- Develop options for growth for CIBC

Finance

The Finance group provides financial services to CIBC's businesses through effective governance and decision support processes. These services include financial, management and regulatory reporting, maintenance of accounting records and internal controls, financial analysis and planning, tax planning and compliance, global sourcing and payment processing, regular reviews of business line performance, corporate real estate and liaison with CIBC's investors. In addition, Finance provides financial advice regarding CIBC's business opportunities and transactions. During the year, Finance continued to make progress on CIBC's business priorities by leading bank-wide cost management initiatives, enhancing corporate and financial disclosure to investors, and integrating and strengthening control processes. During the year, CIBC's Treasury operations were moved into Finance. Treasury manages CIBC's funding and capital position, while also measuring, monitoring and controlling interest rate and liquidity resources.

- Continue to improve and strengthen control systems and processes
- Develop and lead initiatives across CIBC to achieve long-term cost efficiencies
- Prepare for change to International Financial Reporting Standards
- Maintain CIBC's Tier I capital ratio in line with our stated target of 8.5%

Legal and Regulatory Compliance

The Legal and Regulatory Compliance group handles the legal, compliance, corporate secretary, internal audit, corporate security, ombudsman, and privacy functions within CIBC. Collectively, this group provides leadership on governance and regulatory requirements and engages in a wide range of support services. During the year, the group led a number of initiatives designed to further reduce operating risks, comply with expanded regulatory oversight, improve efficiency of client dispute resolution, and further improve the quality of support provided to other areas within CIBC.

- Maintain focus on mitigating future risks for CIBC
- Work across CIBC to help further safeguard our clients' information and provide an effective process for client dispute resolution
- Streamline our interface with the other strategic business units by increasing effectiveness and eliminating duplication

Risk Management (RM)

CIBC's RM group measures, monitors and controls risks in accordance with established risk tolerance limits. The management of risk is a fundamental element of CIBC's objective of consistent and sustainable performance over the long term. In 2007, RM supported its internal business partners in achieving their financial results and client satisfaction targets in a challenging credit environment through ongoing enhancements to CIBC's credit risk infrastructure and independent due diligence and analysis. RM also continued to play a lead role in implementing and preparing CIBC's Basel II program for regulatory approval in December 2007, and in closing CIBC's purchase of FirstCaribbean International Bank.

- Manage and re-allocate risk resources to higher return and/or strategic growth activities to support CIBC's objectives
- Ongoing measurement, monitoring and control of credit, market, liquidity and operational (including reputation and legal) risks

Management's Discussion and Analysis

Management's discussion and analysis (MD&A) should be read in conjunction with the audited consolidated financial statements included in this Annual Accountability Report. The consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) and are expressed in Canadian dollars. The effect of significant differences between Canadian and U.S. GAAP is disclosed in Note 28 to the consolidated financial statements. Certain comparative amounts have been reclassified to conform with the presentation adopted in the current year. This MD&A is current as of December 6, 2007. Additional information relating to CIBC is available on SEDAR at www.sedar.com and on the U.S. Securities and Exchange Commission's (SEC) website at www.sec.gov. No information on our website (www.cibc.com) should be considered incorporated herein by reference. A glossary of terms used in the MD&A and the consolidated financial statements is provided on pages 149 and 150 of this Annual Accountability Report.

A NOTE ABOUT FORWARD-LOOKING STATEMENTS: From time to time, we make written or oral forward-looking statements within the meaning of certain securities laws, including in this Annual Accountability Report, in other filings with Canadian securities regulators or the U.S. Securities and Exchange Commission and in other communications. These statements include, but are not limited to, statements made in the "Chief Executive Officer's Letter", "Balanced Scorecard", "Overview", "Financial performance review – Taxes" and "Business line overview" sections, of this report and other statements about our operations, business lines, financial condition, risk management, priorities, targets, ongoing objectives, strategies and outlook for 2008 and subsequent periods. Forward-looking statements are typically identified by the words "believe", "expect", "anticipate", "intend", "estimate" and other similar expressions or future or conditional verbs such as "will", "should", "would" and "could". By their nature, these statements require us to make assumptions, including the economic assumptions set out in the "Outlook for 2008" section of this report, and are subject to inherent risks and uncertainties that may be general or specific. A variety of factors, many of which are beyond our control, affect our operations, performance and results, and could cause actual results to differ materially from the expectations expressed in any of our forward-looking statements. These factors include: credit, market, liquidity, strategic, operational, reputation and legal, regulatory and environmental risk discussed in this MD&A; legislative or regulatory developments in the jurisdictions where we operate; amendments to, and interpretations of, risk-based capital guidelines and reporting instructions; the resolution of legal proceedings and related matters; the effect of changes to accounting standards, rules and interpretations; changes in our estimates of reserves and allowances; changes in tax laws; that our estimate of sustainable effective tax rate will not be achieved; political conditions and developments; the possible effect on our business of international conflicts and the war on terror; natural disasters, public health emergencies, disruptions to public infrastructure and other catastrophic events; reliance on third parties to provide components of our business infrastructure; the accuracy and completeness of information provided to us by clients and counterparties; the failure of third parties to comply with their obligations to us and our affiliates; intensifying competition from established competitors and new entrants in the financial services industry; technological change; global capital market activity; interest rate and currency value fluctuations; general economic conditions worldwide, as well as in Canada, the U.S. and other countries where we have operations; changes in market rates and prices which may adversely affect the value of financial products; our success in developing and introducing new products and services, expanding existing distribution channels, developing new distribution channels and realizing increased revenue from these channels; changes in client spending and saving habits; and our ability to anticipate and manage the risks associated with these factors. This list is not exhaustive of the factors that may affect any of our forward-looking statements. These and other factors should be considered carefully and readers should not place undue reliance on our forward-looking statements. We do not undertake to update any forward-looking statement that is contained in this Annual Accountability Report or in other communications except as required by law.

Overview

CIBC is a leading North American financial institution. Through our two distinct strategic business lines, CIBC Retail Markets and CIBC World Markets, we provide a full range of products and services to almost 11 million individual and small business clients, and meet the financial needs of corporate and institutional clients.

Vision, mission and values

Our vision is to be the leader in client relationships. In support of this vision, our mission is to fulfill the commitments we have made to each of our stakeholders:

- Helping our clients achieve what matters to them
- Creating a positive employee experience
- Making a difference in our communities
- Generating strong total returns for our shareholders

Our vision and mission are supported by a culture based on three simple values – trust, teamwork and accountability.

Objective, strategy and business priorities

Our vision, mission and values provide an important framework within which we execute our strategic business plan.

Our objective is consistent, sustainable performance over the long term. We believe that achievement of our objective will ensure a premium valuation for CIBC and provide maximum strategic flexibility.

To support our objective, CIBC identified three key priorities:

- Business strength
- Productivity
- Balance sheet strength and capital usage

CIBC will remain focused on these priorities in 2008.

Performance measurement

Disciplined measurement of our performance is important to our long-term success. Our balanced scorecard contains several financial and non-financial measures of our progress against our vision, mission and strategic business plan.

Our financial measures include earnings per share growth, return on equity, capital strength, business mix, risk, productivity, dividend payout ratio and total shareholder return.

Our non-financial measures include client satisfaction, employee experience, community investment, environmental responsibility and leading governance practices.

2007 performance

In 2007, we made progress against all three of our priorities:

Business strength

CIBC's core franchise remains well positioned for growth.

CIBC Retail Markets, consisting of our retail banking and wealth management operations, continued to perform well overall in 2007. Volume growth, the expansion of our ownership interest in FirstCaribbean International Bank (FirstCaribbean), as well as discipline in the areas of expense and credit management all contributed to our profit growth. In Canada, we experienced solid volume growth while growing market share in many key areas. In our unsecured lending business, our risk posture has been reflected in lower market share but improved loan loss performance. Our lending business is well positioned for improving performance as the portfolio grows from a stronger base. The completion of our FirstCaribbean acquisition expands our operations in the Caribbean region and provides a further source of

growth for CIBC Retail Markets. We are focused on strengthening our client relationships and investing in our core retail businesses in Canada and the Caribbean to maintain and enhance our position.

CIBC World Markets had good performance in Canada in key areas such as equity underwriting and merger and acquisition (M&A) activity, with improving productivity. In the U.S., real estate finance and merchant banking reported good results, with other areas showing improvement. Good performance in these areas was offset by the mark-to-market losses in our structured credit assets on collateralized debt obligations (CDOs) and residential mortgage-backed securities (RMBS) related to the U.S. residential mortgage market. We are refocusing our attention on our wholesale business activities to ensure they are aligned with our strategic imperative of consistent and sustainable performance. The proposed sale of some of our U.S. businesses to Oppenheimer Holdings Inc. (Oppenheimer) will improve the productivity of our wholesale business and help build our balance sheet strength, while allowing us to redeploy capital over time to further support CIBC's core Canadian, U.S. and international operations.

Productivity

We continued to make progress in 2007 towards our strategic objective of a median efficiency ratio among our Canadian bank peer group. We achieved our 2007 productivity goal, which was to hold our expenses flat to the fourth quarter of 2006, excluding FirstCaribbean, while also lowering our efficiency ratio closer to the median. Our focus will remain on productivity improvement that achieves an effective balance between revenue growth and expense discipline. Over the long term, we believe this balance is the best formula to achieve sustainable growth.

Balance sheet strength and capital usage

Our Tier 1 capital ratio is a primary measure of our balance sheet strength. Our objective is a target Tier 1 ratio of 8.5%.

During the year, our ratio declined from 10.4% to 9.7%, primarily due to the completion of our FirstCaribbean acquisition.

In terms of capital usage, our priority is to first invest in core businesses, and then balance other deployment opportunities. During the year, we completed our FirstCaribbean acquisition, increasing our ownership level to over 91%. We recommenced our share repurchase program and, subsequent to year-end, announced a continuation of our program through October 31, 2008. We also increased our quarterly dividend twice, from \$0.70 per share to \$0.77 per share in the second quarter and from \$0.77 per share to \$0.87 per share in the fourth quarter, representing a 24% increase to our dividend from the end of 2006. We will continue to review dividend increases in 2008 as our payout ratio remains below our target range of 40%–50%.

Economic and market environment

CIBC benefited from a continued North American economic expansion in 2007 despite credit issues arising from the U.S. residential mortgage market. In Canada, strong domestic demand was sustained by an unprecedented employment rate, as hiring in construction, resources, services and government offset job losses in manufacturing. Western Canada, helped by buoyant prices for oil and metals, continued to outperform national growth measures. Central Canadian manufacturers remained challenged by a strong Canadian dollar and only moderate growth in the U.S. economy.

Rising housing costs and increasing wage pressures in some regions kept core inflation measures somewhat above the Bank

of Canada's 2% target for much of the year. The Bank of Canada, however, opted for only a 25 basis point rise in its overnight interest rate target, relying on the strengthening Canadian dollar and a forecast U.S. slowdown to moderate growth and inflation risks ahead. This helped Canadian consumer and mortgage credit demand to remain strong. Healthy labour markets held Canadian personal bankruptcies and mortgage arrears at low levels. Long-term interest rates rose in Canada throughout much of the year, but then declined in tandem with U.S. rates, as expectations for further rate increases by the Bank of Canada diminished. The yield curve remained flat for much of the year, encouraging a shift to fixed-rate mortgages.

Canadian corporate earnings saw healthy gains, leading to a strong year for equities, which were also supported by M&A activity. Credit spreads widened globally on the spill-over from rising U.S. residential mortgage market defaults, on increased debt taken on to finance leveraged buyouts, and on a lack of liquidity for asset-backed commercial paper (ABCP). This liquidity crunch caused several financial institutions, including CIBC, to enhance liquidity facilities provided to some of their sponsored conduits, and purchase ABCP from their sponsored conduits. However, these did not result in a significant impact to our liquidity position.

The general deterioration in credit markets led to wider financing spreads and reduced interest margins for the Canadian banking sector in the last quarter of the year.

Financial overview

\$ millions, except per share amounts, as at or for the year ended October 31	2007	2006	2005
Total revenue	\$ 12,066	\$ 11,351	\$ 12,498
Net income (loss)	3,296	2,646	(32)
Per share – basic earnings	9.30	7.50	(0.46)
– cash basic earnings ⁽¹⁾	9.38	7.56	(0.44)
Per share – diluted earnings	9.21	7.43	(0.46) ⁽²⁾
– cash diluted earnings ⁽¹⁾	9.30	7.49	(0.44)
Dividends per share	3.11	2.76	2.66

Return on equity	28.7%	27.9%	(1.6)%
Efficiency ratio	63.1%	66.0%	86.9%
Cash efficiency ratio (TEB) ⁽¹⁾	61.3%	64.4%	85.5%
Total shareholder return	20.2%	25.6%	1.3%
Share price	102.00	87.60	72.20
Tier 1 capital ratio	9.7%	10.4%	8.5%
Total capital ratio	13.9%	14.5%	12.7%

(1) For additional information, see the "Non-GAAP measures" section.

(2) In case of a loss, the effect of stock options potentially exercisable on diluted earnings (loss) per share is anti-dilutive; therefore, basic and diluted earnings (loss) per share are the same.

Net income for the year was \$3,296 million, up \$650 million or 25% from 2006. Our results for 2007 and 2006 were affected by the following items:

2007

- \$777 million (\$507 million after-tax) mark-to-market losses, net of gains on related hedges, on CDOs and RMBS related to the U.S. residential mortgage market (see page 40 for additional details);
- \$456 million (\$381 million after-tax and minority interest) Visa gain (see page 40 for additional details);
- \$139 million of favourable tax-related items;
- \$102 million (\$92 million after-tax) net reversal of litigation accruals;
- \$98 million (\$64 million after-tax) positive impact of changes in credit spreads on the mark-to-market of our corporate loan credit derivatives;

- \$47 million (\$26 million after-tax) of expenses related to the proposed sale of some of our U.S. businesses; and
- \$24 million (\$17 million after-tax) reversal of the general allowance for credit losses.

2006

- \$149 million of favourable tax-related adjustments; and
- \$64 million (\$42 million after-tax) reversal of the general allowance for credit losses.

Revenue increased \$715 million or 6%. CIBC Retail Markets revenue was up \$1,124 million or 14%, largely due to the FirstCaribbean acquisition, and the Visa gain noted above. Volume growth in cards, deposits and mortgages and higher securitization revenue were partially offset by spread compression. CIBC World Markets revenue was down \$421 million or 16% as it was adversely affected by the mark-to-market losses on CDOs and RMBS noted above. Revenue benefited from higher merchant banking gains net of write-downs, and higher investment banking and credit products revenue, resulting largely from gains associated with corporate loan hedging programs.

Provision for credit losses increased \$55 million or 10%, resulting mainly from a lower reversal of the general allowance noted above.

Non-interest expenses increased \$124 million or 2%, mainly due to the FirstCaribbean acquisition and expenses related to the proposed sale of some of our U.S. businesses noted above. These were offset in part by the net reversal of litigation accruals noted above, and lower performance-related compensation, pension costs and computer expenses.

Income tax expense was down \$116 million or 18%, primarily due to an increase in the relative proportion of earnings subject to lower rates of tax, as discussed in the "Financial performance review" section.

Significant events

FirstCaribbean acquisition

On December 22, 2006, we obtained control of FirstCaribbean by acquiring a further 39.3% ownership interest from Barclays Bank PLC (Barclays). After completing the transaction, we owned approximately 83.0% of the common shares of FirstCaribbean with the remaining common shares held by both Barclays and other minority shareholders. The transaction took place at a share price of US\$1.62 plus accrued dividends with a total transaction value of US\$989 million (\$1,153 million), which we paid in cash to Barclays. In addition, we incurred transaction costs, net of tax, of US\$7 million (\$8 million).

On February 2, 2007, pursuant to a tender offer at the same price for the remaining common shares held by Barclays and the other minority shareholders, we acquired an additional 8.5% interest in FirstCaribbean in exchange for additional cash consideration of US\$212 million (\$250 million), bringing our total ownership to 91.5%. In addition, we incurred additional transaction costs, net of tax, of US\$2 million (\$2 million).

As a result of subsequent transactions, including the sale of two million shares of our holding to FirstCaribbean's compensation trusts, our ownership interest as at October 31, 2007 declined to 91.4%.

For additional details, see Note 3 to the consolidated financial statements.

Proposed sale of some of our U.S. businesses

Subsequent to year end, on November 2, 2007, we signed an agreement to sell our U.S. based investment banking, equities, leveraged finance and related debt capital markets businesses, our Israeli investment banking and equities business, and certain of our other U.S. capital markets related businesses located in the U.K. and Asia to Oppenheimer.

The impact to our statement of operations in 2007 is limited to an \$18 million severance charge related to employees that will not be transferred to Oppenheimer and a \$29 million leasehold improvement write-off related to office space that we will abandon. Further amounts will be recognized when the transaction closes, which is expected in the first quarter of 2008.

We will recognize reimbursements from Oppenheimer for CIBC restricted share awards held by employees transferred to Oppenheimer that will continue to vest in accordance with their original terms. The contingent portion of the deferred purchase price will be recognized at the end of the five year period of the arrangement.

The disposition, which remains subject to regulatory approval, is not expected to have a significant impact on our ongoing results of operations.

U.S. subprime residential mortgage market

We have exposure to the U.S. residential mortgage market through investments in and other transactions with entities with exposure to this market. During the year, we had realized and unrealized losses, net of gains on related hedges, of \$777 million (\$507 million after-tax) on these exposures. As at October 31, 2007, our gross unhedged notional positions of CDOs and RMBS related to the U.S. residential mortgage market was approximately US\$1.6 billion. We have taken mark-to-market adjustments on these positions such that the net unhedged exposure is approximately US\$784 million (\$741 million). Mitigating this exposure are subprime index hedges of notional US\$300 million (\$283 million), with a fair value of US\$126 million (\$119 million) as at October 31, 2007. We have recognized a gain of US\$89 million (\$88 million) from the hedges.

In addition, we have exposures to the U.S. subprime residential mortgage market through derivative contracts which are hedged with investment-grade counterparties. As at October 31, 2007 the notional amounts of these derivatives were US\$9.8 billion (\$9.3 billion) with fair values of US\$4.3 billion (\$4.0 billion). Management has assessed the credit exposure relating to these contracts in determining their fair value. Market and economic conditions relating to these counterparties may change in the future, which could result in significant future losses. Distribution of the notional amounts by counterparty rating is noted in the table below:

As at October 31, 2007

Counterparty ratings	Notional (%)
AAA ⁽¹⁾	47 %
AA ⁽²⁾	18
A ⁽³⁾	35
	100 %

(1) Five U.S. financial guarantors.

(2) Two counterparties (a large European multi-national bank, and a large American diversified multi-national insurance and financial services company) with which CIBC has market standard collateral arrangements.

(3) One U.S. financial guarantor.

These derivative contracts included notional amounts of US\$8.1 billion (\$7.6 billion) with fair values of US\$3.5 billion (\$3.3 billion) hedged with U.S. financial guarantors.

Liquidity facilities to ABCP conduits

Problems originating in the U.S. subprime mortgage market in the spring of this year spread to cause global market credit issues and a withdrawal of liquidity that affected the entire asset-backed securities (ABS) market. As a result of liquidity tightening during the second half

of 2007, we purchased ABCP issued by our sponsored conduits and our holdings were \$3.1 billion as at October 31, 2007. We also had par value holdings of \$358 million as at October 31, 2007 in non-bank sponsored ABCP which are subject to the "Montreal Accord". We recognized losses in the consolidated statement of operations of \$18 million on certain of these non-bank sponsored ABCP. The remainder had adverse changes in estimated fair value of \$43 million in accumulated other comprehensive income (AOI).

As at October 31, 2007, the total backstop liquidity facilities committed by CIBC to asset-backed conduits was \$17.3 billion. Of these committed facilities, approximately 92% of the amount was for the benefit of our sponsored Canadian ABCP conduits. See "Off-balance sheet arrangements" section for additional details.

Visa gain

We recorded a gain of \$456 million (\$381 million after-tax and minority interest) with respect to the worldwide restructuring of Visa. This restructuring resulted in Visa Canada, Visa USA and Visa International becoming wholly owned subsidiaries of a newly formed entity, Visa Inc. The gain has been recorded in the cards and FirstCaribbean business lines within CIBC Retail Markets, and is based upon our estimate of the fair value of the shares of Visa Inc. we received on October 2, 2007, in exchange for certain membership interests in Visa Canada and Visa International. We have classified our Visa Inc. shares as available-for-sale private equity securities. The Visa restructuring is subject to a final adjustment process which may positively or negatively impact the number of shares we own, thereby increasing or decreasing the value of our total shareholdings. The value of our shares may also be impacted positively or negatively by the outcome of Visa Inc.'s anticipated initial public offering.

We expect that this restructuring will not have a significant ongoing impact on the results of operations of our cards business.

Outlook for 2008

Economic growth is expected to remain moderate in Canada, with the U.S. likely to see slower growth over the next several quarters but avoid recession as the Federal Reserve decreases interest rates. Tax cuts, strong global resource markets, and a healthy mortgage market are expected to allow the Canadian economy to outperform the U.S. economy. Canadian interest rates are expected to decline modestly.

CIBC Retail Markets should benefit from a continuation of low unemployment rates and strong housing markets, supporting lending and deposit growth. A slower pace of real estate price increases may moderate mortgage growth rates.

For CIBC World Markets, the Canadian M&A and equity pipelines and current market level of equity issuance activity appear promising going into 2008. However, the challenges in the U.S. residential mortgage market and the prevailing credit and liquidity concerns may persist in the near term, and may impact the wider economy and constrain growth. We expect the current low level of corporate defaults is likely not sustainable over the longer term and loan demand should increase due to a reduced investor appetite for commercial paper to fund business and consumer activity. We also expect to see lower merchant banking revenue opportunities as the size of our merchant banking portfolio continues to decrease.

Improvements in the risk profile of the unsecured retail lending portfolio should continue to realize benefits. Slower U.S. growth and a strong Canadian dollar could entail a less favourable period for corporate credit risks in vulnerable parts of the Canadian economy.

Financial Performance Review

Net interest income and margin

\$ millions, for the year ended October 31	2007	2006	2005
Average assets	\$ 328,520	\$ 291,277	\$ 288,845
Net interest income	4,558	4,435	4,937
Net interest margin	1.39%	1.52%	1.71%

Net interest income was up \$123 million or 3% from 2006, primarily due to the FirstCaribbean acquisition and volume growth in cards, deposits and mortgages. Fee income on mortgages refinanced before maturity was also higher. These increases were partially offset by increased trading-related funding costs and spread compression on retail products. During the year, we de-designated certain fair value hedges under the new financial instruments standards. Since the net unrealized gains on those derivative instruments are now recorded in foreign exchange other than trading, and other non-interest income, net interest income declined accordingly.

Additional information on net interest income and margin is provided in the "Supplementary annual financial information".

Non-interest income

\$ millions, for the year ended October 31	2007	2006	2005
Underwriting and advisory fees	\$ 745	\$ 619	\$ 730
Deposit and payment fees	791	778	794
Credit fees	287	334	343
Card fees	270	251	317
Investment management and custodial fees	535	479	420
Mutual fund fees	872	799	739
Insurance fees, net of claims	234	224	212
Commissions on securities transactions	875	869	912
Trading revenue	328	1,129	801
Available-for-sale/investment securities gains, net	521	71	601
FVO revenue	156	n/a	n/a
Income from securitized assets	489	484	338
Foreign exchange other than trading	390	300	555
Other	1,015	579	799
	\$ 7,508	\$ 6,916	\$ 7,561

Non-interest income was up \$592 million or 9% from 2006.

Underwriting and advisory fees were up \$126 million or 20%, primarily due to higher new issue activity and M&A fees.

Credit fees were down \$47 million or 14%, primarily due to lower loan fees in Europe and the U.S., resulting from lower syndication activity.

Investment management and custodial fees were up \$56 million or 12%, resulting from a higher level of assets under management.

Mutual fund fees were up \$73 million or 9%, primarily due to increased sales net of redemptions, and higher asset values resulting from market appreciation.

Trading revenue was down \$801 million or 71%, driven largely by the mark-to-market losses on CDOs and RMBS. See "Trading activities" section which follows for further details.

Available-for-sale (AFS)/Investment securities gains, net includes realized gains and losses on disposals, net of write-downs to reflect other-than-temporary impairments in the value of the securities. It also includes gains and losses on limited partnerships, which were included in other non-interest income in the prior year. Revenue was up \$450 million, primarily due to higher gains net of write-downs, including gains of \$273 million on limited partnerships. The prior year gains on limited partnerships of \$211 million were included in other non-interest income.

FVO revenue represents revenue from financial instruments designated at fair value and related hedges. It includes mainly revenue from U.S. real estate finance (included in trading revenue in the prior year) and net unrealized gains on our inventory of mortgage-backed securities (MBS) to support our ongoing CIBC originated residential mortgage securitization program and seller swaps (included in other non-interest income in the prior year). Net unrealized gains on seller swaps resulting from increasing interest rates and higher levels of mortgage securitized assets were partially offset by net unrealized losses on associated hedges and lower net unrealized gains on MBS noted above. See Note 13 to the consolidated financial statements for further details on our FVO financial instruments.

Foreign exchange other than trading was up \$90 million or 30%, largely due to net unrealized gains on the de-designation of certain fair value hedges noted above and the impact of the FirstCaribbean acquisition. The prior year included \$47 million of foreign exchange revenue on the repatriation of capital and retained earnings from our non-U.S. foreign operations.

Other includes gains and losses on the disposal of fixed assets, sales of subsidiaries and corporate assets, realized gains and losses on sales and write-downs of equity-accounted investments, and other commissions and fees. Other was up \$436 million or 75%, mainly due to the \$456 million Visa gain and gains associated with corporate loan hedging programs, offset in part by the reclassification of gains on limited partnerships to net realized gains on AFS securities, as noted above.

Trading activities

\$ millions, for the year ended October 31	2007	2006	2005
Trading (loss) income consists of:			
Net interest (expense) income	\$ (638)	\$ (444)	\$ 19
Non-interest income	328	1,129	801
	\$ (310)	\$ 685	\$ 820

Trading loss was \$310 million compared to income of \$685 million in 2006. Net interest expense was up \$194 million or 44%, resulting from increased funding costs on trading positions. Non-interest income was down \$801 million or 71%, largely due to the mark-to-market losses of \$777 million on CDOs and RMBS, lower revenue from other credit trading portfolios, and the reclassification of U.S. real estate securitization revenue to FVO revenue.

Further details on the composition of our trading income by product type is provided in Note 12 to the consolidated financial statements.

Provision for credit losses

\$ millions, for the year ended October 31	2007	2006	2005
Specific			
Consumer	\$ 580	\$ 585	\$ 668
Business and government	51	27	88
	631	612	756
General	(28)	(64)	(50)
	\$ 603	\$ 548	\$ 706

The provision for credit losses was up \$55 million or 10% from 2006, mainly due to a lower reversal of the general allowance. The specific provision was up \$19 million or 3%, mainly due to increased losses in the cards portfolio driven by volume growth, the impact of the FirstCaribbean acquisition, and lower recoveries and reversals in the corporate lending portfolio, offset in part by improvements in the personal lending portfolio.

Non-interest expenses

\$ millions, for the year ended October 31	2007	2006	2005
Employee compensation and benefits			
Salaries	\$ 2,258	\$ 2,076	\$ 2,220
Incentive bonuses	926	971	912
Commissions	613	609	590
Benefits	595	632	602
	4,392	4,288	4,324
Occupancy costs	602	562	641
Computer and office equipment	1,104	1,111	1,166
Communications	317	297	324
Advertising and business development	246	222	260
Professional fees	178	163	325
Business and capital taxes	137	135	118
Other	636	710	3,707
	\$ 7,612	\$ 7,488	\$ 10,865

Non-interest expenses were up \$124 million or 2% from 2006.

Employee compensation and benefits were up \$104 million or 2%, primarily due to the impact of the FirstCaribbean acquisition and normal salary increases, offset in part by lower performance-related compensation and pension expense.

Occupancy costs were up \$40 million or 7%, *communications* were up \$20 million or 7%, *advertising and business development* were up \$24 million or 11%, and *professional fees* were up \$15 million or 9%, all related to the FirstCaribbean acquisition.

Computer and office equipment was down \$7 million or 1%, as a result of lower technology spending. However, this was largely offset by the impact of the FirstCaribbean acquisition.

Other, comprising outside services, operational losses, other personnel costs and donations, was down \$74 million or 10%, mainly due to the \$102 million net reversal of litigation accruals, offset in part by the expenses related to the proposed sale of some of our U.S. businesses.

Taxes

\$ millions, for the year ended October 31	2007	2006	2005
Income tax expense	\$ 524	\$ 640	\$ 789
Indirect taxes			
GST and sales taxes	165	219	250
Payroll taxes	211	188	211
Capital taxes	125	129	112
Property and business taxes	53	43	45
Total indirect taxes	554	579	618
Total taxes	\$ 1,078	\$ 1,219	\$ 1,407
Income taxes as a percentage of net income before income taxes and non-controlling interests	13.6%	19.3%	85.1%
Total taxes as a percentage of net income before deduction of total taxes and non-controlling interests	24.5%	31.3%	91.1%

Income taxes include those imposed on CIBC as a Canadian legal entity, as well as on our domestic and foreign subsidiaries. Indirect taxes comprise goods and services tax (GST) and sales, payroll, capital, and property and business taxes. Indirect taxes are included in non-interest expenses.

Total income and indirect taxes were down \$141 million or 12% from 2006.

Income tax expense was down \$116 million or 18%, primarily due to an increase in the relative proportion of earnings subject to lower rates of tax, including the lower tax rate on the Visa gain and higher tax-exempt income, offset in part by the impact of higher pre-tax earnings.

Indirect taxes decreased by \$25 million or 4%. GST and sales taxes decreased by \$54 million or 25%, primarily due to the favourable resolution of tax audits and the full year impact of the 1% reduction in the GST rate to 6% on July 1, 2006.

For a reconciliation of our income taxes in the consolidated statement of operations with the combined Canadian federal and provincial income tax rate, see Note 22 to the consolidated financial statements.

The adjusted effective tax and taxable equivalent (TEB) rates for the year ended October 31, 2007 were 19.7%⁽¹⁾ and 25.5%⁽¹⁾, respectively.

While rates will vary from quarter to quarter, our current estimate is that the adjusted sustainable effective tax rate will be in the 20–23% range and the adjusted sustainable TEB tax rate will be in the 24–27% range. These rates are determined based on the estimated earnings in various jurisdictions over the near term and the expected enacted tax rates in these jurisdictions. The impact of one-time items is excluded.

Foreign exchange

In 2007, the Canadian dollar appreciated 3% on average relative to the U.S. dollar from the prior year, resulting in a \$63 million decrease in the translated value of our U.S. dollar functional earnings.

(1) For additional information, see the "Non-GAAP measures" section.

– diluted EPS	\$ 2.53	\$ 2.31	\$ 2.27	\$ 2.11	\$ 2.32	\$ 1.86	\$ 1.63	\$ 1.62

Compared with Q4/06

Net income was up \$65 million or 8% from the fourth quarter of 2006.

Net interest income was up \$110 million or 10%, primarily due to the FirstCaribbean acquisition, volume growth in cards, deposits and mortgages, and higher dividends on trading securities. These were partially offset by spread compression in retail lending products.

Non-interest income was down \$54 million or 3%, primarily due to lower trading revenue, resulting from the mark-to-market losses on CDOs and RMBS and lower revenue from other credit trading portfolios. This was offset partially by the gain on the Visa restructuring and higher merchant banking gains net of write-downs. Gains associated with corporate loan hedging programs and foreign exchange other than trading were also higher.

Provision for credit losses was up \$40 million or 43%, primarily due to a reversal of the general allowance in the fourth quarter of 2006.

Non-interest expenses were down \$18 million or 1%, primarily due to lower performance-related compensation, litigation costs and staff benefits, offset partially by the impact of the FirstCaribbean acquisition and expenses related to the proposed sale of some of our U.S. businesses.

Income tax expense was down \$42 million or 48%, primarily due to an increase in the relative proportion of earnings subject to lower rates of tax, including the Visa gain and higher tax-exempt income. These were partially offset by lower tax recoveries and a \$22 million income tax expense on the repatriation of capital from a foreign operation.

Non-controlling interests were up \$11 million, mainly due to the FirstCaribbean acquisition.

Compared with Q3/07

Net income was up \$49 million or 6% from the prior quarter.

Net interest income was up \$60 million or 5%, primarily due to higher dividends on trading securities, offset in part by spread compression in mortgages and personal lending.

Non-interest income was down \$93 million or 5%, primarily due to lower trading revenue, resulting mainly from the higher mark-to-market losses on CDOs and RMBS and lower revenue from other credit trading portfolios. Gains associated with corporate loan hedging programs and revenue on FVO financial instruments were also lower. These factors were partially offset by the Visa gain.

Provision for credit losses was down \$30 million or 19%, primarily due to improvements in the personal lending portfolio and higher recoveries and reversals in the corporate lending portfolio.

Non-interest expenses were up \$55 million or 3%, primarily due to a lower net reversal of litigation accruals, expenses related to the proposed sale of some of our U.S. businesses and expenses related to a foreign payroll tax reassessment, offset in part by lower performance-related compensation.

Income tax expense was down \$112 million or 71%, primarily due to an increase in the proportion of earnings subject to lower rates of tax, including the Visa gain and higher tax-exempt income, partially offset by the income tax expense on the repatriation of capital from a foreign operation.

Non-controlling interests were up \$5 million, mainly due to higher earnings in FirstCaribbean.

Quarterly trend analysis

Our quarterly results are modestly affected by seasonal factors. The first quarter is normally characterized by increased credit card purchases over the holiday period. The second quarter has fewer days as compared with the other quarters, generally leading to lower earnings. The summer months (July – third quarter and August – fourth quarter) typically experience lower levels of capital markets activity, which affects our brokerage, investment management and wholesale activities.

Revenue

CIBC Retail Markets revenue increased during 2007 as a result of the FirstCaribbean acquisition. Continued strength in cards and deposits also contributed to revenue growth in the past few quarters. The Visa gain led to particularly high revenue in the fourth quarter of 2007.

CIBC World Markets revenue is influenced to a large extent by capital markets conditions and the opportunity for merchant banking divestitures. Mark-to-market losses on CDOs and RMBS resulted in lower revenue in the last two quarters of 2007, while increased capital markets volumes led to higher revenue in the first quarter of 2007.

Corporate and Other revenue is affected by the impact of significant items not included in the other business lines. Revenue in the third quarter of 2006 was lower due to the deconsolidation of a variable interest entity (VIE). Foreign exchange revenue on the repatriation of capital and retained earnings from our foreign operations led to an increase in revenue in the second quarter of 2006.

Provision for credit losses

The provision for credit losses is dependent upon the credit cycle in general and on the credit performance of the loan portfolio. Retail lending provisions increased slightly in 2007 largely due to higher losses in the cards portfolio, resulting from volume growth, and the impact of the FirstCaribbean acquisition. Corporate lending recoveries and reversals have decreased from the high levels in the past. Reversals of the general allowance were included in the second quarters of 2007 and 2006 and the fourth quarter of 2006.

Non-interest expenses

Non-interest expenses were higher in 2007 as a result of the FirstCaribbean acquisition. The net reversal of litigation accruals and lower performance-related compensation led to a decrease in non-interest expenses in the third and fourth quarters of 2007.

Income taxes

Income taxes vary with changes in income subject to tax and the jurisdictions in which the income is earned. It can also be affected

by the impact of significant items. Income tax recoveries related to the favourable resolution of various income tax audits and reduced tax contingencies were included in the last three quarters of 2007 and 2006. Tax-exempt income has generally been increasing over the period, with larger tax-exempt dividends received in the fourth quarters of 2007 and 2006. The last quarter of 2007 benefited from a lower tax rate on the Visa gain and the last two quarters of 2007 benefited from a lower tax rate on the net reversal of litigation accruals. Income tax expense on the repatriation of capital and retained earnings from our foreign operations was also included in the fourth quarter of 2007 and second quarter of 2006.

Non-controlling interests

Non-controlling interests were higher in 2007 due to the consolidation of FirstCaribbean resulting from our acquisition. During the first three quarters of 2006, we deconsolidated certain VIEs which resulted in a decrease in non-controlling interests. In the first quarter of 2006, we acquired the remaining non-controlling interest in INTRIA Items Inc.

Review of 2006 financial performance

\$ millions, for the year ended October 31		CIBC Retail Markets	CIBC World Markets	Corporate and Other	CIBC Total

	Net income (loss)	\$ 1,573	\$ (1,671)	\$ 66	\$ (32)

Our results of operations for 2006 are compared to 2005 in the following discussion:

Overview

Net income was \$2,646 million, compared with a net loss of \$32 million for 2005, mainly as a result of a \$2,830 million (\$2,533 million after-tax) provision related to our Enron settlement and a \$108 million (\$55 million after-tax) provision related to our hedge funds settlement, both included in 2005.

Revenue by segments

CIBC Retail Markets

Revenue was down \$58 million or 1% from 2005, mainly due to gains on sales of holdings in Republic Bank (\$85 million both pre- and after-tax) and ACE Aviation Holdings Inc. (ACE) (\$34 million pre-tax, \$22 million after-tax), both included in 2005. Volume growth, higher treasury revenue allocations, and favourable deposit spreads were offset in part by spread compression in lending.

CIBC World Markets

Revenue was down \$724 million or 21% from 2005, largely due to lower revenue from merchant banking as 2005 included gains on sales of \$294 million (\$241 million after-tax) on our holdings in Global Payments Inc. (GPI) and Shoppers Drug Mart Corporation (Shoppers). Investment banking and credit products revenue was also lower.

Corporate and Other

Revenue was down \$365 million or 39% from 2005, as a result of lower foreign exchange revenue arising on the repatriation of capital and retained earnings from our foreign operations noted below. A gain of \$115 million (\$64 million after-tax) on the sale of Juniper Financial Corp. (Juniper) was included in 2005.

We repatriated capital and retained earnings from our foreign operations, both in 2006 and 2005. Accumulated balances of \$47 million in 2006 and \$301 million in 2005, previously recorded in the "Foreign currency translation adjustments" component of AOCI were reversed and recognized in "Foreign exchange other than

trading" in the consolidated statement of operations. In addition, we recognized an income tax expense of \$47 million in 2006 and \$375 million in 2005 related to the repatriations.

Consolidated CIBC

Net interest income

Net interest income was down \$502 million or 10% from 2005, primarily due to increased trading-related funding costs. Spread compression in retail lending products and the impact of higher levels of securitized assets in cards also contributed to the decrease. These factors were partially offset by higher interest and dividend income on trading securities and loans, volume growth in cards, deposits and mortgages, and lower hedge costs on seasonal mortgage refinancings.

Non-interest income

Non-interest income was down \$645 million or 9% from 2005, largely due to the merchant banking gains on GPI and Shoppers included in 2005. Lower foreign exchange revenue on the repatriation of capital and retained earnings noted above also contributed to the decline. In addition, 2005 also included the gains on the Juniper, Republic Bank and ACE sales noted above. These factors were offset in part by higher trading revenue in 2006.

Provision for credit losses

The provision for credit losses was down \$158 million or 22% from 2005.

The specific provision was down \$144 million or 19%. The specific provision related to consumer lending was down \$83 million, primarily due to the impact of higher levels of securitized assets in cards and improvements in personal lending. The specific provision related to the business and government loan portfolio was down \$61 million, primarily due to recoveries and reversals in agriculture and large corporate loans.

A reversal of the general allowance of \$64 million was included in 2006, compared with \$50 million in 2005.

Non-interest expenses

Non-interest expenses were down \$3,377 million or 31% from 2005, primarily due to the provisions for Enron and hedge funds settlements noted above, both included in 2005.

Income taxes

Despite higher income, income taxes were down \$149 million or 19% from 2005. The decrease was mainly due to the income tax recovery on the Enron-related provision being limited to \$297 million in 2005. Lower repatriation of capital and retained earnings noted above, higher tax recoveries related to the favourable resolution of income tax audits and reduced tax contingencies also contributed to the decrease.

Non-controlling interests

Non-controlling interests were down \$141 million or 83% from 2005, primarily due to the deconsolidation of certain VIEs of which we were no longer considered to be the primary beneficiary.

Non-GAAP measures

We use a number of financial measures to assess the performance of our business lines. Some measures are calculated in accordance with GAAP, while other measures do not have a standardized meaning under GAAP and, accordingly, these measures, described below, may not be comparable to similar measures used by other companies. Investors may find these non-GAAP financial measures useful in analyzing financial performance.

Net interest income, taxable equivalent basis (TEB)

We evaluate net interest income on an equivalent before-tax basis. In order to arrive at the TEB amount, we gross up tax-exempt income on certain securities to the equivalent level that would have incurred tax at the statutory rate. Meanwhile the corresponding entry is made in the income tax expense. This measure enables comparability of net interest income arising from both taxable and tax-exempt sources. Net interest income (TEB) is used to calculate the efficiency ratio (TEB) and trading revenue (TEB). We believe these measures permit uniform measurement, which may enable users of our financial information to make comparisons more readily.

Economic capital

Economic capital provides the financial framework to evaluate the returns of each business line, commensurate with the risk taken. See the "Capital resources" section for details on the definition and calculation of economic capital. Economic capital is a non-GAAP measure and there is no comparable GAAP measure.

Economic profit

Net income, adjusted for a charge on capital, determines economic profit. This measures the return generated by each business line in excess of our cost of capital, thus enabling users of our financial information to identify relative contributions to shareholder value.

Segmented return on equity

We use ROE on a segmented basis as one of the measures for performance evaluation and resource allocation decisions. While ROE for total CIBC provides a measure of return on common equity, ROE on a segmented basis provides a similar metric related to the capital allocated to the segments. We use economic capital to calculate ROE on a segmented basis. As a result, segmented ROE is a non-GAAP measure.

Retail/Wholesale ratio

While we manage commercial banking operations within CIBC World Markets, some financial institutions include commercial banking in their retail operations. From time to time, some measures, such as Retail/Wholesale ratio, will be presented on the basis of CIBC Retail Markets and commercial banking operations, for comparison purposes.

Adjusted income taxes

Adjusted effective tax rate is calculated by adjusting the tax expense for significant tax recoveries and other tax adjustments. The adjusted effective tax rate (TEB) is calculated by also grossing up income and tax expense with the tax-exempt income to an equivalent before-tax basis. We believe that the adjusted effective tax and TEB rates provide a fuller understanding of our effective tax rates. Investors may find this non-GAAP financial measure useful in analyzing financial performance.

Cash basis measures

Cash basis measures are calculated by adjusting the amortization of other intangible assets to net income and non-interest expenses. Management believes these measures permit uniform measurement, which may enable users of our financial information to make comparisons more readily.

Managed loans

Loans on a managed basis exclude the impact of securitizations. Through securitizations, we sell groups of loans to VIEs that issue securities to investors. The loans are removed from the consolidated balance sheet. We use this measure to evaluate the credit performance and the overall financial performance of the underlying loans.

The following table provides a reconciliation of non-GAAP to GAAP measures related to consolidated CIBC. The reconciliations of non-GAAP measures of business lines are provided in their respective sections.

Statement of operations measures

\$ millions, for the year ended October 31		2007	2006	2005	2004	2003

Business Line Overview

CIBC Retail Markets

Overview	CIBC Retail Markets comprises CIBC's retail and wealth management businesses. We provide a full range of financial products and services to almost 11 million personal, wealth and small business clients, as well as investment management services globally to retail and institutional clients. In addition, we offer a full range of financial services to clients in 17 regional markets in the Caribbean through FirstCaribbean International Bank.
Objective	CIBC Retail Markets' objective is to be the primary financial institution for our clients.
Strategy	Our strategy is to deepen client relationships by meeting more of our clients' financial needs. To do this, we will continue to leverage our broad advisory capabilities as our key differentiator, while delivering a consistent client service experience and financial products and solutions that meet our clients' needs.
2007 in Review	<ul style="list-style-type: none"> • Completed a \$90 million upgrade to our ABM network across Canada • Invested in strengthening our branch network • Enhanced our leading credit card offer, including the introduction of CIBC CreditSmart security and credit management features on all CIBC cards and the Aeroplan Mileage Multiplier on the CIBC Aerogold VISA • CIBC Wood Gundy achieved a record high in year-end assets under administration of \$118.6 billion • President's Choice Financial ranked "Highest in Customer Satisfaction with Midsize Retail Banks" by J.D. Power and Associates (See page 161 for more information) • With year-over-year mutual fund net sales growth of \$1.75 billion, CIBC Asset Management surpassed \$51 billion in retail assets under management • CIBC became the controlling shareholder of FirstCaribbean International Bank
2008 Priorities	<ul style="list-style-type: none"> • Strong advisory solutions • Consistent client service experience • Client-focused financial products and solutions

CIBC World Markets

Overview	CIBC World Markets is the wholesale and corporate banking arm of CIBC, providing a range of integrated credit and capital markets, investment banking, and merchant banking products and services to clients in key financial markets in North America and around the world. We provide innovative capital solutions and advisory expertise across a wide range of industries as well as top-ranked research for our corporate, government and institutional clients.
Objective	CIBC World Markets' objective is to maintain and build its strength as a leading broad-based investment bank in Canada, with a specialized focus on targeted capabilities in the U.S., Europe and Asia.
Strategy	Our strategy is to provide client solutions that facilitate credit and capital markets access as well as to provide advisory capabilities. We will accomplish this by emphasizing profitability and risk management in all of our activities.
2007 in Review	<ul style="list-style-type: none"> • Achieved the leading market position in our Canadian M&A business • Advising Rio Tinto on the world's largest mining transaction valued at US\$38.1 billion • Advising BCE Inc. on the world's largest leveraged buyout valued at \$51.7 billion • Key lead advisor, credit provider and underwriter to Fortis Inc. on its \$3.7 billion purchase of Terasen Inc.'s gas distribution business; included the third largest fully paid bought deal in Canadian history • Led one of the largest debt transactions in Canada issued by the Canada Mortgage Bond Program and valued at \$9 billion • Became Canada's only major bank to have a dedicated investment banking office in Winnipeg • Like other wholesale banks, we experienced difficult market conditions in the U.S. subprime mortgage market as well as dislocation in the Canadian asset-backed commercial paper market
2008 Priorities	<ul style="list-style-type: none"> • Strong franchise value in our core Canadian businesses • Regional capabilities that connect specific client opportunities in the U.S., Europe and Asia to our core platform • Targeted capabilities in select businesses that are a good strategic fit and offer an appropriate balance of risk and return

(1) For additional segmented information, see Note 27 to the consolidated financial statements.

(2) Consistent with other businesses, revenue includes earnings on capital and internal funding charges.

(3) For additional information, see the "Non-GAAP measures" section.

Financial overview

Net income was up \$722 million or 39% from 2006. Revenue increased as a result of the FirstCaribbean acquisition, the Visa gain, volume growth in cards, deposits and mortgages, and higher securitization revenue, offset in part by spread compression. Non-interest expenses were up largely as a result of the FirstCaribbean acquisition.

Revenue

FirstCaribbean revenue is included from the date of acquisition on December 22, 2006. Prior to December 22, 2006, FirstCaribbean was equity-accounted and the revenue was included in "Other".

Revenue was up \$1,124 million or 14% from 2006.

Personal and small business banking revenue was up \$46 million, mainly due to volume growth, partially offset by lower internal sales commissions received from mortgages and personal lending.

Imperial Service revenue was up \$29 million, primarily due to higher revenue from investment product sales, offset in part by spread compression.

Retail brokerage revenue was up \$40 million, primarily due to higher fee income resulting from growth in asset values, partially offset by lower trading activity.

Cards revenue was up \$472 million, driven by the Visa gain of \$404 million. The growth in volume was offset in part by spread compression.

Mortgages and personal lending revenue was down \$26 million. Personal lending was adversely affected by lower spreads and volume. Mortgages benefited from higher securitization revenue, volume growth, and fee income from refinancings, offset in part by spread compression. Internal sales commissions paid were also lower, as noted above.

Asset management revenue was up \$16 million, largely due to higher fee income resulting from growth in average funds managed, partially offset by higher internal sales commissions paid to Imperial Service and retail brokerage.

Other revenue was up \$40 million, mainly due to higher treasury revenue allocations. The prior year included the equity-accounted revenue on FirstCaribbean, as noted above.

Provision for credit losses

Provision for credit losses was up marginally from 2006, as increased losses in the cards portfolio driven by volume growth and the impact of the FirstCaribbean acquisition were offset by improvements in the personal lending portfolio.

Non-interest expenses

Non-interest expenses were up \$329 million or 7% from 2006, largely due to the FirstCaribbean acquisition, which increased expenses by \$325 million.

Income taxes

CIBC Retail Markets conducts business in a number of tax jurisdictions that are subject to varying rates of taxation. As such, the aggregate tax expense recognized in each period is determined, in part, by the relative proportion of earnings generated in each tax jurisdiction.

Income taxes were up \$44 million or 7% from 2006, primarily due to an increase in income, partially offset by an increase in the relative proportion of earnings subject to lower rates of tax, including the lower tax rate on the Visa gain.

Non-controlling interests

Non-controlling interests represent the minority interest in FirstCaribbean.

Average assets

Average assets were up \$27.1 billion or 14% from 2006, primarily due to the FirstCaribbean acquisition and increases in mortgages and cards.

Regular workforce headcount

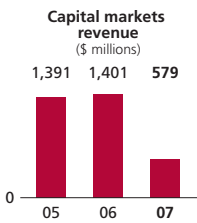

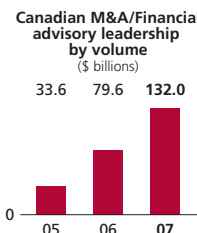

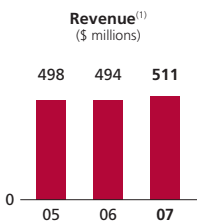

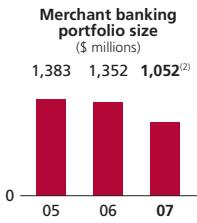

The regular workforce headcount was up 3,739 from 2006, largely due to the FirstCaribbean acquisition and a realignment of staff from Administration, Technology and Operations.

Assets under administration

\$ billions, as at October 31	2007	2006	2005
Individual	\$ 151.6	\$ 149.3	\$ 139.5
Institutions	74.4	72.2	60.9
Retail mutual funds	51.0	47.5	43.4
	\$ 277.0	\$ 269.0	\$ 243.8

Assets under administration were up \$8.0 billion or 3% from 2006, largely due to an increase in mutual funds, retail brokerage and the impact of the FirstCaribbean acquisition.

(2) For additional information, see the "Non-GAAP measures" section.

(3) Effective November 1, 2006, all cash management revenue previously allocated to investment banking and credit products was transferred to commercial banking on a retroactive basis.

Financial overview

Net income was down \$45 million or 7% from 2006. Revenue decreased due to lower capital markets revenue resulting mainly from the mark-to-market losses, net of gains on related hedges, of \$777 million (\$507 million after-tax) on CDOs and RMBS related to the U.S. residential mortgage market, partially offset by higher merchant banking and investment banking and credit products revenue. Non-interest expenses were lower as a result of the \$102 million (\$92 million after-tax) net reversal of litigation accruals.

Revenue

Revenue was down \$421 million or 16% from 2006.

Capital markets revenue was down \$822 million, driven by lower revenue in debt capital markets, primarily due to the mark-to-market losses on the CDOs and RMBS noted above and lower revenue from other credit trading portfolios, partially offset by higher revenue in equity and commodity structured products and Canadian equities.

Investment banking and credit products revenue was up \$204 million, primarily due to gains associated with corporate loan hedging programs and higher revenue in a consolidated VIE, partially offset by lower investment banking revenue.

Merchant banking revenue was up \$232 million, resulting from higher gains net of write-downs in both direct investments and third-party managed funds.

Non-interest expenses

Non-interest expenses were down \$158 million or 8% from 2006, mainly due to lower litigation expenses, including the net reversal of litigation accruals noted above, and lower performance-related compensation, partially offset by the expenses related to the proposed sale of some of our U.S. businesses.

Income taxes

CIBC World Markets conducts business in a number of tax jurisdictions that are subject to varying rates of taxation. As such, the aggregate tax expense recognized in each period is determined, in part, by the relative proportion of earnings generated in each tax jurisdiction.

Income taxes were down \$228 million from 2006, primarily due to lower pre-tax earnings and an increase in the relative proportion of earnings subject to lower rates of tax, including higher tax-exempt income.

Average assets

Average assets were up \$10.1 billion or 10% from 2006, primarily due to normal trading activities.

Regular workforce headcount

The regular workforce headcount was up 95 from 2006, primarily due to a realignment of staff from Administration, Technology and Operations into commercial banking.

Corporate and Other

Corporate and Other comprises the five functional groups – Administration, Technology and Operations; Corporate Development; Finance; Legal and Regulatory Compliance; and Risk Management – that support CIBC's business lines, as well as CIBC Mellon joint ventures, and other income statement and balance sheet items, including the general allowance, not directly attributable to the business lines. The general allowance applicable to FirstCaribbean is determined locally and is included in CIBC Retail Markets. The revenue and expenses of the functional groups are generally allocated to the business lines.

During the current year, we moved the Treasury function from Treasury and Risk Management (TRM) into Finance.

Regular workforce headcount	10,936	11,329	10,924

(1) For additional segmented information, see Note 27 to the consolidated financial statements.

Financial overview

Net income was down \$27 million or 19% from 2006, primarily due to lower income tax recoveries and reversal of the general allowance for credit losses, partially offset by higher revenue from treasury, CIBC Mellon joint ventures and lower project costs.

We repatriated capital from a foreign operation in the current year, which resulted in a \$22 million income tax expense. We also repatriated capital and retained earnings from our non-U.S. foreign operations in the prior year, which resulted in the reversal of related accumulated balances of \$47 million, previously recorded in AOCI. This balance was recognized in non-interest income and a related income tax expense of \$47 million was also recorded.

Revenue

Revenue was up \$12 million or 2% from 2006, primarily due to higher revenue from treasury and CIBC Mellon joint ventures. The prior year included foreign exchange revenue of \$47 million on the repatriations noted above and revenue from a VIE which was deconsolidated as of July 31, 2006.

Non-interest expenses

Non-interest expenses were down \$47 million or 10% from 2006, reflecting lower project costs largely due to the substantial completion of the Basel II project.

Income taxes

Income taxes were up \$68 million from 2006, primarily due to lower income tax recoveries and higher income subject to tax. The current year included an income tax expense of \$22 million (2006: \$47 million) on the repatriation noted above.

Non-controlling interests

Non-controlling interests in 2006 represents the minority interest in a consolidated VIE. The VIE was deconsolidated as of July 31, 2006.

Regular workforce headcount

The regular workforce headcount was down 393 from 2006, primarily due to the reduction of back office functions and the realignment of staff to the business groups. These decreases were partially offset by the transfer of staff from an external service provider relating to the repatriation of desktop support and related network management services to CIBC.

Assets

Total assets as at October 31, 2007 were up \$38.2 billion or 13% from 2006.

Cash and deposits with banks were up \$1.9 billion or 16%, mainly due to normal treasury funding requirements and the FirstCaribbean acquisition.

Securities were up \$3.0 billion or 4%, primarily due to higher MBS inventory to support our ongoing CIBC originated residential mortgage securitization program and the FirstCaribbean acquisition, partially offset by a decrease in trading securities in our wholesale banking, reflecting normal trading activities. Further details on the composition of securities are provided in Note 4 to the consolidated financial statements.

Securities borrowed or purchased under resale agreements were up \$8.6 billion or 34%, primarily due to normal client-driven activities.

Loans were up \$17.0 billion or 12%, primarily due to volume growth in residential mortgages (net of securitizations), the impact of the FirstCaribbean acquisition, and volume growth in the cards portfolio. A detailed discussion of the loan portfolio is included in the "Management of credit risk" section.

Derivative instruments were up \$7.0 billion or 41%, mainly due to higher mark-to-market gains on credit derivatives resulting from widening of the credit spreads. The increase was also due to the reclassification of hedging derivatives from other assets under the new financial instruments accounting standards, and higher gains in foreign exchange derivatives driven by the weakening of the U.S. dollar.

Other assets were up \$728 million or 4%, primarily due to an increase in acceptances, and goodwill and other intangible assets acquired with the FirstCaribbean acquisition. These increases were partially offset by the reclassification of hedging derivatives to derivative instruments and investment in limited partnerships to AFS securities, both under the new financial instruments accounting standards. In addition, as a result of obtaining majority control, our investment in FirstCaribbean is no longer included in other assets.

Liabilities

Total liabilities as at October 31, 2007 were up \$37.0 billion or 13% from 2006.

Deposits were up \$28.8 billion or 14%, mainly due to the FirstCaribbean acquisition, and volume growth in deposits attributed to funding requirements and client-driven activities. Further details on the composition of deposits are provided in Note 10 to the consolidated financial statements and in the "Supplementary annual financial information".

Derivative instruments were up \$9.4 billion or 54%, mainly due to higher mark-to-market losses on credit derivatives resulting from widening of the credit spreads. The increase was also due to the reclassification of hedging derivatives from other liabilities under the new financial instruments accounting standards, and higher losses in foreign exchange derivatives driven by the weakening of the U.S. dollar.

Obligations related to securities lent or sold short or under repurchase agreements were down \$2.1 billion or 5%, mainly due to normal client-driven and treasury funding activities, offset in part by the FirstCaribbean acquisition.

Other liabilities were up \$964 million or 5%, mainly due to an increase in acceptances, partially offset by the reclassification of hedging derivatives to derivative instruments under the new financial instruments accounting standards.

The increase in non-controlling interests of \$133 million mainly represents the minority interest in FirstCaribbean.

Shareholders' equity

Shareholders' equity as at October 31, 2007 was up \$1.2 billion or 9% from October 31, 2006, mainly due to an increase in retained earnings, partially offset by higher losses on the foreign currency translation adjustments component of AOCI resulting from the weaker U.S. dollar.

Capital Resources

Our capital strength protects our depositors and creditors from risks inherent in our businesses, allows us to absorb unexpected losses and enables us to take advantage of attractive business opportunities. It also enables us to maintain a favourable credit standing, to raise additional capital or other funding on attractive terms. Our objective is to maintain a strong and efficient capital base. We manage and monitor our capital to maximize risk-adjusted return to shareholders and to meet regulatory requirements.

Regulatory capital and ratios

Our minimum regulatory capital requirements are determined in accordance with guidelines issued by OSFI. The OSFI guidelines evolve from the framework of risk-based capital standards developed by the Bank for International Settlements (BIS).

BIS standards require that banks maintain minimum Tier 1 and Total capital ratios of 4% and 8%, respectively. OSFI has established that Canadian deposit-taking financial institutions maintain Tier 1 and Total capital ratios of at least 7% and 10%, respectively.

Total regulatory capital consists of Tier 1 and Tier 2 capital, less certain deductions. The components of our regulatory capital are shown in the following table.

\$ millions, as at October 31	2007	2006	2005
Tier 1 capital			
Common shares ⁽¹⁾	\$ 3,133	\$ 3,039	\$ 2,935
Contributed surplus	96	70	58
Foreign currency translation adjustments (component of AOCI)	(1,087)	(442)	(327)
Retained earnings	9,017	7,268	5,667
Non-cumulative preferred shares ⁽²⁾	2,931	2,981	2,472
Certain non-controlling interests in subsidiaries	136	1	27
Goodwill	(1,847)	(982)	(946)
	12,379	11,935	9,886
Tier 2 capital			
Perpetual subordinated indebtedness	285	338	377
Preferred shares – other ⁽³⁾	–	–	509
Other subordinated indebtedness (net of amortization)	5,098	5,257	4,725
Unrealized gains on AFS equity securities in OCI	31	–	–
General allowance for credit losses ⁽⁴⁾	890	900	975
	6,304	6,495	6,586
Total Tier 1 and Tier 2 capital	18,683	18,430	16,472
Securitization-related deductions	(123)	(124)	(45)
Investments in unconsolidated subsidiaries and other substantial investments	(802)	(1,723)	(1,656)
Total capital available for regulatory purposes	\$ 17,758	\$ 16,583	\$ 14,771
Regulatory capital ratios			
Tier 1 capital	9.7%	10.4%	8.5%
Total capital	13.9%	14.5%	12.7%
Assets-to-capital multiple	19.0x	18.0x	18.4x

(1) Does not include short trading positions of \$4 million (2006: \$6 million; 2005: \$17 million) in CIBC common shares.

(2) Includes non-cumulative preferred shares totalling \$600 million (2006: \$600 million; 2005: \$600 million) that are redeemable by the holders and as such, are shown as preferred share liabilities on the consolidated balance sheet.

(3) Represents the amount of non-cumulative preferred shares not included in Tier 1 capital. OSFI limits the amount of non-cumulative preferred shares that can be included in Tier 1 capital to 25% of Tier 1 capital; any excess can be included in Tier 2 capital.

(4) The amount of general allowance for credit losses eligible for inclusion in Tier 2 capital is the lesser of the total general allowance or 0.875% of risk-weighted assets.

Tier 1 capital increased by \$444 million from 2006, primarily due to internal capital generation, partially offset by higher losses on the foreign currency translation adjustments component of AOCI resulting from the weaker U.S. dollar, and an increase in goodwill arising from the FirstCaribbean acquisition. Including the effect of prescribed regulatory adjustments, our total regulatory capital increased by \$1,175 million, mainly due to the increase in Tier 1 capital noted above, and a reduction in the equity-accounted investment as a result of the FirstCaribbean acquisition.

Our capital ratios are strong and in excess of OSFI's minimum standard for Tier 1 and total capital ratios. During the year, we have complied in full with all of our regulatory capital requirements.

Capital management

Our capital management policies, established by the Board, relate to capital strength, capital mix, dividends and return of capital, and the unconsolidated capital adequacy of regulated entities. Each year a capital plan and three-year outlook are established, which encompass all the associated elements of capital: forecasts of sources and uses, maturities, redemptions, new issuances, corporate initiatives and business growth. The capital plan is stress-tested in various ways to ensure that it is sufficiently robust under all reasonable scenarios. We maintain a process which determines plausible but stressed economic scenarios, and then apply these stresses to the vast majority of our exposures to determine the impact on the consolidated statement of operations, risk-weighted asset requirements, and consequently key capital ratios. This helps us analyze the potential risks within our portfolios and establish prudent capital levels in excess of the regulatory minimum requirements. All of the elements of capital are monitored throughout the year, and the capital plan is adjusted as appropriate.

The following were the main capital initiatives undertaken in 2007:

Subordinated debt

- On March 23, 2007, FirstCaribbean International Bank (Trinidad & Tobago) Limited, a subsidiary of FirstCaribbean, issued TT\$195 million (\$30 million) principal amount of Guaranteed Subordinated Term Notes due 2017 guaranteed on a subordinated basis by FirstCaribbean;
- On June 22, 2007, our wholly-owned subsidiary CIBC World Markets plc issued €200 million (\$274 million) principal amount of Floating Rate Subordinated Step-up Callable Notes due 2017 guaranteed on a subordinated basis by CIBC;
- On August 14, 2007, CIBC World Markets plc redeemed all of its US\$300 million Floating Rate Subordinated Notes due 2012 at 100% of their principal amount plus accrued interest;
- On August 27, 2007, pursuant to our offer, the holders of \$31 million of 5.89% Debentures (subordinated indebtedness) due February 26, 2013, elected to convert their holdings to CIBC deposit notes; and
- During October 2007, we purchased and cancelled \$220 million par value of our 4.55% Medium Term Notes due March 28, 2016 (Subordinated Indebtedness).

Preferred shares

- On November 15, 2006, we issued 18 million 4.70% Non-cumulative Class A Series 31 Preferred Shares with a par value of \$25.00 each for an aggregate amount of \$450 million;
- On January 31, 2007, we redeemed all 16 million outstanding Non-cumulative Class A Series 24 Preferred Shares for an aggregate consideration of \$416 million;
- On February 14, 2007, we issued 12 million 4.50% Non-cumulative Class A Series 32 Preferred Shares with a par value of \$25.00 each for an aggregate amount of \$300 million; and
- On July 31, 2007, we redeemed all 16 million outstanding Non-cumulative Class A Series 25 Preferred Shares for an aggregate consideration of \$416 million.

Common shares

Pursuant to stock option plans, we issued 1.8 million new common shares for a total consideration of \$98 million for the year ended October 31, 2007.

On April 30, 2007, the Toronto Stock Exchange (TSX) accepted our notice of intention to commence a normal course issuer bid. Purchases under this bid commenced on May 2, 2007 and concluded on October 31, 2007. Under this bid, we repurchased and cancelled approximately 3.1 million shares at an average price of \$99.54 for a total amount of \$306 million.

Subsequent to year-end, on November 9, 2007, the TSX accepted our notice of intention to commence a normal course issuer bid. Purchases under this bid will conclude on the earlier of the termination of the bid, the date on which purchases under the bid have been completed, or October 31, 2008. Under this bid, from time to time, we may purchase for cancellation up to 9 million common shares.

Dividends

From the end of 2006, we increased our quarterly common share dividend from 70 cents per share to 87 cents per share. Common and preferred share dividends are declared quarterly at the discretion of the Board. In addition, the declaration and payment of dividends is governed by Section 79 of the Bank Act (Canada) and the terms of the preferred shares, as explained in Note 17 to the consolidated financial statements.

Economic capital

Economic capital provides the financial framework to evaluate the returns of each business line, commensurate with the risk taken. It comprises the capital required to protect against unexpected losses, in periods of near catastrophic "worst case" loss scenarios, while remaining an independent going concern. Economic capital is therefore an estimate of the amount of equity capital required by the businesses to absorb losses consistent with our targeted risk rating over a one-year horizon. The economic capital methodologies that we employ quantify the level of inherent risk within our products, clients and business lines, as required. This enables us to measure and compare risk-adjusted returns across products and business lines, and contributes to the analysis of where to direct the allocation of scarce balance sheet resources.

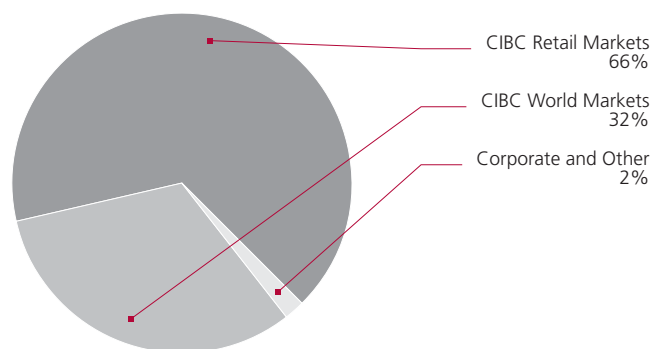

Our economic capital methodology comprises a number of key risk types including credit, strategic, operational and market risk capital.

- Credit risk is the risk of loss associated with a client default or other adverse credit conditions (including counterparty credit risk), leading to the client's inability to meet its financial obligations;
- Strategic risk reflects the risk of failure in strategic investments, either through acquisitions or organic growth;
- Operational risk is defined as the risk of direct or indirect losses from inadequacies or failures in people, processes, systems and external events; and
- Market risk is the risk of losses arising from changes in market prices such as interest rates, foreign exchange rates, equity prices, commodity prices, etc. and is captured for both trading and non-trading books.

Total economic capital by risk type

Total economic capital by segments

Risk-weighted assets

Risk weighted assets arising from credit risk are calculated by applying the weighting factors specified in OSFI guidelines to on-balance sheet assets and off-balance sheet instruments. Risk-weighted assets reflecting market risk in the trading portfolio are calculated based on our VaR models approved by OSFI.

\$ millions, as at October 31	Risk-weighted amounts			
	2007 Balance sheet amount	2007 Risk-weighted amount	2006	2005
On-balance sheet assets				
Cash and deposits with banks	\$ 13,747	\$ 792	\$ 884	\$ 788
Securities	86,500	4,034	1,992	3,213
Securities borrowed or purchased under resale agreements	34,020	1,558	564	551
Mortgage loans	97,368	23,587	25,413	27,939
Other loans and acceptances	65,286	59,681	58,728	58,736
Other assets	45,257	12,879	7,202	6,886
Total on-balance sheet assets	342,178	102,531	94,783	98,113
Off-balance sheet instruments				
Credit-related arrangements				
Lines of credit	58,013	8,444	7,305	6,828
Guarantees and letters of credit	6,625	3,226	2,785	2,973
Securities lending ⁽¹⁾⁽²⁾	69,221	512	220	141
Other	353	353	346	411
	134,212	12,535	10,656	10,353
Derivatives	1,221,416	8,506	5,130	4,320
Total off-balance sheet instruments	1,355,628	21,041	15,786	14,673
Total risk-weighted assets before adjustments for market risk		123,572	110,569	112,786
Add: market risk for trading activity		3,852	4,211	3,491
Total risk-weighted assets		\$ 127,424	\$ 114,780	\$ 116,277

(1) Includes the full contract amount of custodial client securities totalling \$51.7 billion (2006: \$44.6 billion) lent by CIBC Mellon Global Securities Services, which is a 50/50 joint venture between CIBC and The Bank of New York Mellon.

(2) Securities lending of \$4.9 billion (2006: \$5.4 billion) for cash is excluded from the table above because it is reported on the consolidated balance sheet as obligations related to securities lent or sold under repurchase agreements.

Outstanding share data

As at November 30, 2007	Shares outstanding		Conversion for common shares	
	No. of shares	\$ millions	CIBC's conversion date	Shareholders' conversion date

Stock options outstanding	7,156,410			

(1) On November 25, 2005, we announced our offer to repurchase for cancellation all outstanding Class A Series 28 Preferred Shares at a price of \$10.00 per share. The offer will expire on the earlier of June 17, 2009 or the date the offer is withdrawn by CIBC.

(2) Due to rounding.

(3) Includes treasury shares: 64,696, \$5 million.

As noted in the table above, certain series of Class A Preferred Shares provide CIBC, or CIBC and the shareholders, with the right to convert the shares to CIBC common shares on or after a specified conversion date. Each share is convertible into a number of common shares determined by dividing the then applicable cash redemption price by 95% of the average common share price (as defined in the relevant short form prospectus or prospectus supplement), subject to a minimum price of \$2.00 per share. Where shareholders exercise their conversion right, we have the right, subject to OSFI's consent, to elect to redeem for cash any shares tendered for conversion or to arrange for their cash sale to another purchaser.

Basel II

Effective November 1, 2007, CIBC is subject to new regulatory capital requirements. The International Convergence of Capital Measurement and Capital Standards: a Revised Framework, commonly known as Basel II, was developed under the auspices of the Basel Committee on Banking Supervision. The new framework is designed to improve bank safety and soundness by more closely linking a bank's regulatory capital requirements with its risk profile. For further details, see the "Management of risk" section.

Off-balance Sheet Arrangements

Off-balance sheet arrangements include securitizations, derivatives, credit-related arrangements, and guarantees. These off-balance sheet arrangements are either not recorded on the consolidated balance sheet or are recorded in amounts that differ from the full contract or notional amounts. They could have a current or future effect on our financial condition as they involve, among other risks, varying elements of market, credit and liquidity risk, as discussed in the "Management of risk" section. Off-balance sheet arrangements are generally undertaken both as a revenue-generating business activity and for risk management, capital management and/or funding management purposes.

Securitizations

Off-balance sheet arrangements may involve the use of VIEs. VIEs are an important part of the financial markets, providing market liquidity by facilitating investors' access to specific portfolios of assets and risks. VIEs are often used for securitizing our own assets or third-party assets and may be formed as corporations, partnerships, limited liability companies or trusts. In a securitization, an entity transfers assets to a VIE in exchange for cash. A VIE may also buy certain predefined assets for cash in the marketplace (where the seller may at times be CIBC). The VIE will fund these purchases by issuing ownership interests and debt securities in the form of commercial paper and other evidence of indebtedness to third-party investors. VIEs are generally structured to be bankruptcy remote, thereby insulating investors from creditors of other entities, including the asset seller. Investors can benefit from, and may have recourse to, the VIE assets, including a cash collateral account and over-collateralization in the form of excess assets, a liquidity facility or a guarantee or other forms of credit enhancements. Accordingly, the debt securities issued by the VIE may obtain a more favourable credit rating from rating agencies than the transferor could obtain for its own debt issuance, resulting in lower financing costs.

Securitization of our own assets

Securitization of our own assets provides us with an additional source of liquidity. It may also reduce our risk exposure and provide regulatory capital relief. Securitizations are accounted for as asset sales only when we surrender control of the transferred assets and receive consideration other than beneficial interests in the transferred assets. Accounting standards require a determination to be made as to whether the VIE that purchases these assets should be consolidated into our financial statements. We record the transaction as a sale of assets when the derecognition criteria are met, and when we are not required to consolidate the VIE. When such asset sales occur, we may retain residual components of the securitized assets, such as interest-only strips, one or more senior or subordinated tranches of debt and cash reserve accounts, all of which are considered retained interests in the securitized assets. We continue to service all securitized assets after transfer.

The following table provides details on our securitized assets. Further details on our securitization transactions are provided in Note 6 to the consolidated financial statements.

\$ millions, as at or for the year ended October 31		Residential mortgages	Commercial mortgages	Credit card
2007	Outstanding securitized assets⁽¹⁾	\$25,057	\$ 675	\$ 4,251
	Retained interests⁽²⁾	264	–	317
	Liquidity facilities⁽²⁾	671	–	–
	Securitization revenue⁽³⁾	94	(1)	396
2006	Outstanding securitized assets ⁽¹⁾	\$19,896	\$ 375	\$ 4,469
	Retained interests	236	–	336
	Liquidity facilities	866	–	–
	Securitization revenue ⁽³⁾	69	7	408

(1) Residential mortgages include \$249 million (2006: \$1,158 million) of fixed-rate mortgages securitized to a Qualifying Special Purpose Entity (QSPE).

(2) Residential mortgages retained interests include \$52 million of investment in one of our securitization vehicles. The liquidity facilities are net of that investment.

(3) Includes gain on sale of securitized assets of \$40 million (2006: \$35 million).

Credit card receivables

Credit card receivables are securitized through a trust, which is established to purchase co-ownership interests in the receivables with the proceeds of securities issued by the trust. We sell co-ownership interests in receivables to the trust on a non-recourse basis. We are one of several underwriters that distribute securities issued by the trust. We continue to maintain the credit card client account relationships and provide servicing for receivables sold to the trust. Our credit card securitizations are revolving securitizations, with new credit card receivables sold to the trust each period to replenish receivable amounts as clients repay their balances. This trust meets the criteria for a QSPE pursuant to the CICA Accounting Guideline (AcG) 12, "Transfers of Receivables", and, accordingly, we do not consolidate this trust.

We retain some risk of loss with respect to the receivables held by the trust to the extent of our retained interest. Our interest in the excess spread from the trust is subordinate to the trust's obligation to the holders of its asset-backed securities. The excess spread represents our participation in the residual income after all the interests and administrative expenses have been paid. As a result, excess spread absorbs losses with respect to credit card receivables before payments to the note-holders are affected. Subordinated notes, which we may retain, also absorb losses before payments to senior note-holders are affected.

Residential mortgage loans

We securitize insured fixed- and variable-rate residential mortgages through the creation of mortgage-backed securities. Substantially all of the securities are sold through the Canada Mortgage Bond Program, sponsored by Canada Mortgage and Housing Corporation (CMHC), to a trust that issues securities to investors. We maintain the client account relationships and continue to service the securitized loans. We also enter into swap arrangements with the trust to receive monthly principal and interest cash flows from the securitized assets and pay non-amortizing bond cash flows with fixed interest payments and principal at maturity. We also securitize uninsured fixed-rate mortgages to a QSPE which we are not required to consolidate.

Commercial mortgage loans

We also securitize certain commercial mortgages through a trust that issues securities. We retain no beneficial interest in these mortgages, but we continue to service these mortgages.

Securitization of third-party assets

CIBC sponsored multi-seller conduits

We sponsor several multi-seller conduits in Canada that purchase pools of financial assets from our clients, and finance the purchases by issuing commercial paper to investors. These conduits provide our clients with access to liquidity in the debt capital markets by allowing them to sell assets to the conduits. The sellers to the conduits may continue to service the assets and may be exposed to credit losses realized on these assets, typically through the provision of over-collateralization or another form of retained interest. The conduits may obtain credit enhancement from third-party providers.

We generally provide the conduits with commercial paper backstop liquidity facilities, securities distribution, accounting, cash management and operations services. Commencing September 17, 2007, the liquidity facilities for our sponsored ABCP programs in Crisp Trust, Franchise Trust, Franchise Trust II, Macro Trust, Safe Trust, Smart Trust and Sound Trust require us to provide funding, subject to the satisfaction of certain limited conditions with respect to the conduits, to fund non-defaulted assets. Prior to September 17, 2007, we provided liquidity facilities in the event that funding for such conduits became unavailable as a result of a general market disruption.

We may also act as the counterparty to derivative contracts entered into by a conduit in order to convert the yield of the underlying assets to match the needs of the conduit's investors or to mitigate the interest rate risk within the conduit. All fees earned in respect of these activities are on a market basis.

Revenue from the above activities amounted to approximately \$21 million (2006: approximately \$18 million).

CIBC structured collateralized debt obligation (CDO) vehicles

We act as structuring and placement agent for certain asset-backed investment vehicles known as CDO vehicles. Debt securities, such as collateralized loan obligations (CLOs), RMBS and ABCP, or credit derivatives are held by CDO vehicles which offer tranching securities to investors to match their investment needs and preferences. We receive market-rate fees for these activities. In addition, we may lend to, or invest in, the debt or equity tranches of these vehicles, and may act as a counterparty to derivative contracts. In a number of transactions structured on behalf of clients, we first purchase the assets and positions at their request and warehouse them until the CDO transaction is completed. CIBC or a third-party manager typically manages the CDO vehicles' assets and positions which act as collateral for the tranching securities issued by the vehicles. The creditors of the CDO vehicles have no recourse to our general credit except where we have provided liquidity or credit facilities, or are a counterparty to a derivative transaction involving a CDO vehicle.

Revenue from all of the above activities amounted to approximately \$21 million (2006: approximately \$10 million).

Third-party structured CDOs, CLOs, and other asset-backed vehicles

We may act as an administrator or financial advisor to third-party structured conduits including CDOs, CLOs and other asset-backed vehicles. We may provide liquidity facilities and credit enhancements to, hold notes in, and act as counterparty to derivative contracts entered into by third-party structured conduits. We also assume the risk of third-party structured vehicles through written credit derivatives with clients which we hedge through credit derivative transactions with investment-grade counterparties.

Our exposures to entities involved in the securitization of third-party assets (both CIBC sponsored/structured and third-party structured) are summarized in the table below:

\$ millions, as at October 31

	2007			2006		
	Investment and loans ⁽¹⁾	Undrawn liquidity and credit facilities	Written credit derivatives (notional) ⁽²⁾	Investment and loans ⁽¹⁾	Undrawn liquidity and credit facilities	Written credit derivatives (notional) ⁽²⁾
CIBC sponsored multi-seller conduits	\$ 3,029	\$ 12,092 ⁽³⁾	\$ –	\$ 40	\$ 13,413 ⁽³⁾	\$ –
CIBC structured CDO vehicles	320	154	1,031	636	367	417
Third-party structured vehicles	3,409	2,236	31,583	4,541	2,522	26,691

(1) Amounts are net of mark-to-market losses. Excludes securities issued by entities established by CMHC, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), and Student Loan Marketing Association (Sally Mae). \$2.0 billion (2006: \$1.5 billion) of the exposure was hedged by credit derivatives with investment-grade third parties.

(2) Comprises credit derivatives written options and total return swaps under which we assume exposures. The fair value recorded on the consolidated balance sheet was \$(3.8) billion (2006: \$58 million). Notional amounts of \$31.7 billion (2006: \$23.3 billion) were hedged with credit derivatives protection from investment-grade third parties, the fair value of these hedges was \$3.4 billion (2006: \$14 million). Accumulated fair value losses amount to \$484 million on unhedged written credit derivatives. Under certain credit derivative arrangements, we can be called upon to purchase the reference assets at par with the simultaneous termination of the credit derivatives; the notional amount of these trades totalled approximately \$6.5 billion (2006: \$3.8 billion) and the fair value was approximately \$(470) million (2006: \$6 million).

(3) Net of \$3,029 million (2006: \$40 million) of investment in CIBC sponsored multi-seller conduits.

Other financial transactions

We are the sponsor of several mutual and pooled funds, in the form of trusts. We are the administrator of these funds. In addition, we may act in other capacities, including custodian, trustee and broker. We earn fees at market rates from these trusts. We do not guarantee either principal or returns to investors in these funds, except in very limited circumstances.

We act as a trustee of a number of personal trusts and have a fiduciary responsibility to act in the best interests of the beneficiaries of the trusts. We earn a fee for acting as a trustee.

We participate in transactions to modify the cash flows of trusts managed by third-party asset managers to create investments with

specific risk profiles, or to assist clients in the efficient management of other risks. Typically, these involve the use of derivative products, which transfer the risks and returns to or from a trust.

Derivatives

We participate in the derivatives market, both as a market maker facilitating the needs of our clients and as a principal to manage the risks associated with our funding, investing and trading strategies. We enter into credit derivative contracts with clients to enable them to create synthetic exposures to meet their needs.

We also assume credit risks of clients through credit derivatives, and in turn offset these risks by entering credit derivative contracts with

third-party financial institutions; these are known as intermediation trades. Other than counterparty risk, we are not exposed to any form of credit or market risk on these intermediation trades.

All derivatives are recorded at fair value on our consolidated balance sheet; however, our exposures for certain derivatives, such as credit derivatives, can be up to the notional amount of the contracts.

See Notes 2 and 14 to the consolidated financial statements for details on derivative contracts and the risks associated with them.

Credit-related arrangements

We enter into various commitments to meet the financing needs of clients, which are summarized in the table below. For a detailed description of these arrangements, see Note 24 to the consolidated financial statements.

\$ millions, as at October 31	Contract amounts expiration per period				2007 Total	2006 Total
	Less than 1 year	1-3 years	3-5 years	Over 5 years

(1) Includes the full contract amount of custodial client securities totalling \$51.7 billion (2006: \$44.6 billion) lent by CIBC Mellon Global Securities Services Company, which is a 50/50 joint venture between CIBC and The Bank of New York Mellon.

(2) Securities lending of \$4.9 billion (2006: \$5.4 billion) for cash is excluded from the table above because it is reported on the consolidated balance sheet as obligations related to securities lent or sold under repurchase agreements.

(3) Includes irrevocable lines of credit totalling \$30.1 billion (2006: \$28.4 billion), of which \$18.5 billion (2006: \$14.8 billion) will expire in one year or less, and excludes personal lines of credit and credit card lines, which are revocable at our discretion at any time.

(4) Represents notional amount of asset/liability management (ALM) credit derivatives written options.

Guarantees

Guarantees include contracts that contingently require the guarantor to make payments to a guaranteed party based on (a) changes in an underlying economic characteristic that is related to an asset, liability or an equity security of the guaranteed party; (b) failure of another

party to perform under an obligating agreement; or (c) failure of a third party to pay its indebtedness when due.

For a detailed description of our guarantees, maximum potential future payments, and the liability recorded on the consolidated balance sheet, see Note 24 to the consolidated financial statements.

Management of Risk

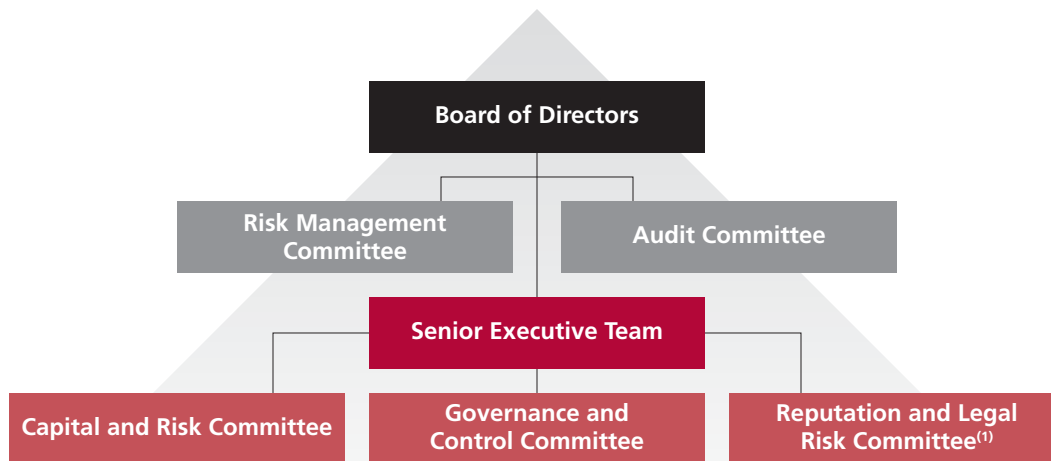

Risk Overview

We manage risk and related balance sheet resources within tolerance levels established by our management committees and approved by the Board of Directors and its committees. This is achieved through a comprehensive framework of measurement, monitoring and control policies, procedures and standards. Key risk management policies are approved or renewed by the applicable Board and management committees annually. Further details on the Board and management committees, as applicable to the management of risk, are provided in the "Governance" section included within the Annual Accountability Report.

Several groups within Risk Management (RM) and Finance, independent of the originating businesses, contribute to our management of risk, including:

- **Treasury** – provides enterprise-wide funding and asset/liability, liquidity, cash and collateral management; ensures that we are strongly and effectively capitalized; and manages capital in our subsidiaries, affiliates and legal entities;
- **Credit and Investment Risk Management groups** – provide independent, enterprise-wide oversight of the adjudication, management and monitoring of global credit risk; apply market-based techniques and models to the measurement, monitoring and control of risks in the credit portfolios and merchant banking investments;
- **Market Risk Management (MRM)** – provides independent, enterprise-wide oversight of the management and related measurement, monitoring and control of trading and non-trading market risk and trading credit risk;
- **Operational Risk Management** – provides independent identification, measurement, monitoring and control of operational risk enterprise-wide; and
- **Balance Sheet Measurement, Monitoring and Control** – oversees the balance sheet resource allocation process; and provides independent, enterprise-wide oversight of the measurement, monitoring and control of our balance sheet resources, economic capital, and model risk including independent validation of the risk-rating systems and parameters.

Risk Management Structure

(1) Previously named "Financial Transactions Oversight Committee" until October 31, 2007.

Basel II Capital Accord

On November 1, 2007, a new capital management framework, commonly called Basel II became effective, which is designed to enhance the risk sensitivity of regulatory capital. Under the new Basel II Framework, regulatory capital for the first time includes a charge for operational risk. In addition, the new rules permit wider discretion by bank regulators to increase or decrease capital requirements in line with the circumstances of individual banks. The new rules require greater transparency of risk management information intrinsic to underlying risks and capital adequacy.

The Basel II Framework consists of three pillars: Pillar 1 prescribes the risk-focused regulatory capital requirements, Pillar 2 deals with supervisory review, and Pillar 3 with market disclosure.

Credit risk

The Basel II Framework allows a financial institution to adopt one of two approaches to calculating regulatory capital: (a) the standardized approach which uses prescribed risk weights or (b) an internal ratings based (IRB) approach which allows the use of a bank's internal models to calculate some, or all, of the key inputs into the regulatory capital calculation. Under the standardized approach, risk weights determined by regulators are assigned to exposures and the amount of the exposure may be reduced by any eligible financial collateral that is held by the institution. Under the IRB option, an institution can adopt one of two approaches: (a) the "foundation approach" which uses an internal estimate for the probability of default (PD) and regulatory weights for loss given default (LGD) and exposure at default (EAD); or (b) the "advanced approach" (AIRB) which uses internal estimates for all three of the PD, LGD and EAD inputs to the calculation. The PD, LGD and EAD terms are defined further in the "Management of credit risk" section. The use of the more advanced methodology should result in capital requirement calculations that are more sensitive to the underlying risks.

OSFI has stated that all material portfolios must be reported on the AIRB basis unless OSFI has explicitly granted approval to use the standardized approach. Any portfolio which is reported on a standardized basis can remain on a standardized basis as long as it

is deemed immaterial. In the event that any one of the standardized portfolios becomes material, management will implement plans to transition it to an AIRB approach as required by OSFI.

Final approval of the use of the AIRB approach to the calculation of credit risk capital and any conditions attached thereto are expected to be received from OSFI by December 31, 2007.

Operational risk

For operational risk, the Basel II Framework allows a financial institution to adopt one of three approaches: (a) the basic indicator approach, which is based on a regulatory defined single percentage being applied to the annual gross income of the financial institution; (b) the standardized approach, which is the same as (a) except that multiple regulatory defined percentages are applied to the gross income on the basis of regulatory specified business lines; and (c) the advanced measurement approach (AMA), which is based on the application of quantitative and qualitative criteria encompassing internal and external historical data and scenario analysis.

OSFI permits the use of either the standardized or the AMA approach. CIBC has elected to use the AMA approach in the calculation of regulatory capital. On August 1, 2007, CIBC received Conditional Acceptance from OSFI to implement the AMA approach effective November 1, 2007. OSFI has set the target date for Formal Acceptance as December 31, 2008 or earlier.

Market risk

Market risks associated with the trading book are subject to the provisions of the Market Risk Amendment to the Basel Accord, which was originally issued in 1996 and subsequently revised in 1998. Basel II does not introduce a material change in the calculation of regulatory capital for market risk in the trading book and we continue to use the Internal Models Approach (IMA) approved by OSFI. Our economic capital assessment relies upon the same models, calibrated to a soundness standard of 99.865%, with differing holding periods for capital dependant upon the perceived liquidity of our various trading portfolios.

Credit Risk

Credit risk primarily arises from our direct lending activities, and from our trading, investment and hedging activities. Credit risk is defined as the risk of financial loss due to a borrower or counterparty failing to meet its obligations in accordance with agreed terms.

Governance

The Capital and Risk Committee (CRC) is responsible for the oversight of key credit policies and limits. These policies and limits are subject to annual review and approval by the Risk Management Committee (RMC) of the Board of Directors. The CRC is also responsible for ensuring that these policies are implemented and that procedures are in place to manage and control credit risk, as well as overseeing the quality of the credit portfolio in accordance with credit policies and limits.

Senior management reports to the RMC at least quarterly on material credit risk matters, including individual credit transactions, compliance with limits, portfolio trends, impaired loans and credit loss provisioning levels. Impaired loan balances, allowances and credit losses are reviewed by the RMC and the Audit Committee quarterly.

RM provides enterprise-wide adjudication and oversight of the management of credit risk in our credit portfolios. Adjudication and portfolio management decisions are based on our risk appetite, as reflected in our policies, standards and limits. Lending authorities are controlled to ensure decisions are made by qualified and experienced personnel.

Policies and standards

Our management of credit risk starts with the establishment of sound lending principles. A framework of documented policies, segment specific standards and guidelines, processes and controls, together with risk concentration limits are designed to reflect our risk appetite. Our policies, standards and procedures govern how credit risk is measured, monitored, reported and controlled.

Process and control

The credit approval process is centrally controlled, with all significant credit requests submitted to a credit risk management unit that is independent of the originating businesses. Approval authorities are well-defined, and are a function of the risk and amount of credit requested. In certain cases, credit requests must be referred to the RMC for approval.

After initial approval, individual credit exposures are monitored on an ongoing basis, with a full risk assessment including review of assigned ratings documented at least annually. Higher risk-rated accounts are subject to closer monitoring and are reviewed at least quarterly. Collections and specialized loan workout groups handle the day-to-day management of the highest risk loans to minimize losses.

We ensure diversification of the business and government loan portfolios by monitoring exposures against concentration limits established for individual borrowers or groups of related borrowers, industry sectors, countries and geographic regions and

selected products and/or types of lending, and by adhering to strict underwriting standards. Higher risk or concentrated positions are reduced through the use of direct loan sales, credit derivative hedges or structured transactions. Selected credit exposures are added to the portfolio to enhance diversification and increase overall return.

Credit derivatives

We use credit derivatives to mitigate industry sector concentrations and single-name exposures, or as part of portfolio diversification techniques. As at October 31, 2007, the notional amount of credit protection purchased against our business and government loan and counterparty exposures was \$5.9 billion (2006: \$5.7 billion). The largest sector concentrations hedged through these programs were oil and gas \$2.3 billion (2006: \$1.9 billion), mining \$659 million (2006: \$211 million), and financial intermediaries \$1.3 billion (2006: \$972 million). All counterparties from whom we have purchased credit derivative protection are investment-grade financial institutions or Canadian sovereign entities.

In addition, as at October 31, 2007, we have purchased credit index hedges for portfolio diversification totalling \$1.9 billion (2006: \$2.2 billion). We do not necessarily have exposure to the obligors referenced by the index. Virtually all of our credit protection is denominated in U.S. dollars, and overall the portfolio has decreased due to the strengthening of the Canadian dollar versus the U.S. dollar.

Guarantees

We obtain third party guarantees and insurance to reduce the risk in our lending portfolios. The most material amount of these guarantees relate to our residential mortgage portfolio, where these exposures are guaranteed by the Government of Canada or large highly rated counterparties.

Collateral

Collateral pledged in support of credit facilities is managed to ensure that its risk mitigation effects can be fully recognized and exercised. We have documented policies and standards regarding collateral management, including valuation, verification requirements and legal certainty. As well, systems are in place to capture key information regarding the tracking, management, valuation, maintenance and realization of collateral, with valuations updated periodically depending on the nature of the collateral.

The main types of collateral obtained are: cash or securities for securities lending and reverse repurchase transactions; charges over inventory, receivables and real estate properties for lending to commercial borrowers; mortgages over residential properties for retail lending; and operating assets for corporate and small business borrowers. We are satisfied that there is no undesirable concentration in the collateral supporting our credit exposure.

Risk measurement

Business and government portfolios (excluding scored small business) – risk rating method

The portfolio is relatively heterogeneous and comprises exposures to corporate, sovereign and bank obligors. These obligors are individually assessed and assigned a rating that reflects our estimate of the probability of default. Migration between categories occurs as our assessment of their probability of default changes. A mapping between our internal ratings and the long-term debt rating categories used by Standard & Poor's and Moody's is shown in the table below. Certain smaller exposures may be assessed on a simplified scale, but this simplified scale is mapped to the more detailed risk rating system for consolidation and reporting purposes.

CIBC internal rating scale and mapping to external rating agencies

Grade	CIBC rating	Standard & Poor's equivalent	Moody's Investor Services equivalent
Investment grade	00/10	AAA	Aaa
	21	AA+	Aa1
	24	AA	Aa2
	27	AA-	Aa3
	31	A+	A1
	34	A	A2
	37	A-	A3
	41	BBB+	Baa1
	44	BBB	Baa2
	47	BBB-	Baa3
	Non-investment grade	51	BB+
54		BB	Ba2
57		BB-	Ba3
61		B+	B1
64		B	B2
67		B-	B3
Watchlist	70	CCC+/CCC	Caa1/Caa2
	75	CCC/CCC-	Caa2/Caa3
	80	CC	Ca
Default	90	D	C

The methodologies we use to assign internal risk ratings are independent of the methodologies used by external rating agencies. While many of the same risk drivers are assessed, the concluded outcomes may be different. As part of our risk-rating methodology, the risk assessment must include a review of all external ratings of the borrower. The majority of our obligors are not rated by an external rating agency. The obligor rating assessment takes into consideration our financial assessment of the obligor, the industry, and the economic environment of the region in which the obligor operates. In certain circumstances, where a guarantee from a third party exists, both the obligor and the guarantor will be assessed.

We use quantitative modelling techniques to assist in the development of internal risk-rating systems. The risk-rating systems have been developed through analysis of internal and external credit risk data. The internal risk ratings standardize the quantification of risk across portfolios. They are also used in monitoring the portfolio, and are key inputs used in our risk-based models for the attribution of the credit risk component of economic capital. The risk ratings also impact pricing decisions, the level of seniority of approval required, and are critical to the limits that we use in managing our exposures to individual obligors and groups of related obligors. Over the past several years, we have continued to develop and improve our origination and tracking systems which collect data for future risk rating and parameter calibration.

We assess risk exposure along three dimensions:

- **Probability of default (PD)** – the probability that the obligor will default within the next 12 months. A default is considered to have occurred when we consider that the obligor is unlikely to pay its credit obligations in full, without recourse to the security held, or when the obligor is more than 90 days past due on any material credit obligation.
- **Exposure at default (EAD)** – the amount drawn by the obligor plus an estimate of the further amount which may be drawn by the time of default. For repos and securities lending activities, EAD is the amount that would be owed to us over the time it would take us to close out all transactions. Over-the-counter derivative exposure is determined by measuring the potential future credit exposure, taking into account any legally enforceable netting agreements based upon statistically driven simulation approaches, and any legally enforceable risk-mitigating arrangements for each obligor, such as netting and margin.
- **Loss given default (LGD)** – the expected severity of loss as the result of the default, expressed as a percentage of the amount outstanding when the default occurs. LGD ratings are assigned for each exposure taking into account the capital structure of the borrower, the type and quality of the collateral, as well as the quantity of collateral in relation to the secured debt.

Parameter estimates for each of these dimensions are long-term averages with appropriate adjustment for the impact of any potential change in the credit cycle. Expected loss for any given exposure is the product of the PD, EAD and LGD. Actual loan losses may vary significantly from expected losses due to changes in the economic environment and unpredictable external events. As well, expected loss is an estimate at the date of the consolidated balance sheet, and actual losses will be impacted by both growth in the portfolio, and changes in the portfolio composition.

The effectiveness of the risk rating systems and the parameters associated with the risk ratings are monitored regularly within RM and are subject to an annual review. The models used in the estimation of the risk parameters are also subject to independent validation by the RM validation group, which is independent of both the origination business and the model development process.

Canadian commercial mortgages which comprise non-residential mortgages and multi-family residential mortgages, are subject to a simplified risk-rating process. This process is focused on the factors that impact the credit risk for this product such as the debt servicing ratio, adequacy of the security, and mortgage insurance.

We have counterparty credit exposure that arises from our interest rate, foreign exchange, equity, commodity and credit derivatives trading, hedging and portfolio management activities, as explained in Note 14 to the consolidated financial statements. The probability of default of our counterparties is measured in the same manner as our direct lending activity.

Retail and scored small business portfolios – credit scoring method

Retail and scored small business portfolios are characterized by a large number of relatively small exposures and are managed as pools of homogenous risk exposures. External credit bureau scores are used along with our behavioural assessment to group exposures according to similar credit risk profiles. These pools are assessed through statistical techniques, such as credit scoring and computer-based models. Characteristics used to group individual exposures

vary by asset category; as a result, the number of pools, their size, and the statistical techniques applied to their management differ accordingly.

Total loans and acceptances

As at October 31, 2007, total loans and acceptances after allowance for credit losses totalled \$170.7 billion (2006: \$151.9 billion). Consumer loans (comprising residential mortgages, credit cards and personal loans, including student loans) constitute 75.7% (2006: 76.2%) of the portfolio, whereas business and government loans (including acceptances) constitute 24.3% (2006: 23.8%).

Consumer loans increased \$13.3 billion or 11.5% from the prior year, resulting mainly from volume growth and the acquisition of FirstCaribbean. The main increases were in: residential mortgages by \$10.3 billion or 12.7% (\$15.5 billion or 15.3% on a managed basis⁽¹⁾) and credit card loans by \$1.8 billion or 25.8% (\$1.6 billion or 13.9% on a managed basis⁽¹⁾). Residential mortgages constitute 71.0% (2006: 70.2%) of the total consumer loan portfolio and exhibit very low levels of credit risk.

The increase in the business and government loans (including acceptances) by \$5.4 billion or 15.1% from the prior year was largely due to the FirstCaribbean acquisition.

Concentration of loans and acceptances after allowance for credit losses

Concentration of credit risk exists when a number of counterparties are engaged in similar activities, or operate in the same geographical areas or industry sectors, and have similar economic characteristics so that their ability to meet contractual obligations is similarly affected by changes in economic, political or other conditions.

Business and government loans (including acceptances) by geographic distribution⁽²⁾

Business and government loans (including acceptances) by industry group

(1) For additional information, see the "Non-GAAP measures" section.

(2) Classification based upon country of ultimate risk.

(4) The related assets include loans, securities borrowed or purchased under resale agreements, and acceptances.

Impaired loans and allowance for credit losses

Impaired loans

During the year, approximately \$1.7 billion of loans were newly classified as impaired, up \$237 million from 2006. Overall, new Canadian classifications decreased by \$122 million, whereas new foreign classifications increased by \$359 million, largely related to the FirstCaribbean acquisition.

Reductions in gross impaired loans through remediation, repayment or sale were \$556 million, down \$310 million from 2006. The decrease comprised \$121 million in consumer loans and \$189 million in business and government loans. For the year, write-offs totalled \$861 million, down \$5 million from the prior year. Business and government loan write-offs decreased by \$33 million, while consumer loan write-offs increased by \$28 million.

Additional details on the geographic distribution and industry classification of our impaired loans are provided in the "Supplementary annual financial information".

Allowance for credit losses

The total allowance for credit losses comprises specific and general components carried on the consolidated balance sheet.

For a discussion on the methodologies used in establishing the allowance for credit losses, see the "Critical accounting policies and estimates" section. Breakdown of the allowance by geographic regions and industry classifications is provided in the "Supplementary annual financial information".

Total allowance for credit losses was \$1,443 million, down \$1 million from October 31, 2006.

Specific allowance for credit losses was \$553 million, up \$9 million or 2% from October 31, 2006. The increase was mainly in credit cards due to the growth in the portfolio.

General allowance was \$890 million, down \$10 million or 1% from October 31, 2006. The reversal of \$28 million of general allowance, and a transfer of \$5 million to the specific allowance related to the student loans portfolio were partially offset by the FirstCaribbean acquisition.

Management believes the total allowance for credit losses as at October 31, 2007 was appropriate in light of the composition of the credit portfolio, as well as continued positive economic performance in our major lending markets. Future changes to the allowance will be influenced by the continuing evaluation of risks in the loan portfolio and changing economic conditions.

Market Risk

Market risk arises from positions in securities and derivatives held in our trading portfolios, and from our retail banking business, investment portfolios and other non-trading activities. Market risk is defined as the potential for financial loss from adverse changes in underlying market factors, including interest and foreign exchange rates, credit spreads, and equity and commodity prices.

Governance

Market risk is managed through an integrated internal control framework, overseen by the CRC. Each business has a dedicated market risk manager, supplemented by regional risk managers located in all of our major trading centres, facilitating comprehensive risk coverage.

Policies and standards

We have comprehensive policies for market risk management related to identification and measurement of the various types of market risk, the eligibility of certain of those risks for inclusion in the trading and non-trading books, and to the establishment of limits within which we manage our overall exposures. We have explicit risk tolerance levels, expressed in terms of both statistically based Value-at-Risk (VaR) measures and potential worst-case stress losses.

We use a three-tiered approach to set market risk and stress limits on the amounts of risk that we can assume in our trading and non-trading activities, as follows:

- Tier 1 limits are our overall market risk and worst-case scenario limits.
- Tier 2 limits are designed to control the risk profile in each business.
- Tier 3 limits are at the desk level and designed to monitor risk concentration and the impact of book-specific stress events.

Tier 1 limits are established by the Chief Executive Officer consistent with the risk tolerance policies approved by the RMC; Tier 2 and Tier 3 limits are approved at levels of management commensurate with the risk taken.

Policies also outline requirements for yield curve and valuation model construction, and align with accounting policies with respect to mark-to-market and model valuation methodologies, the independent checking of the valuation of positions, and the establishment of valuation adjustments.

Process and control

Market risk exposures are monitored daily against approved risk limits, and control processes are in place to ensure that only authorized activities are undertaken. We generate daily risk and limit-monitoring reports, based on the previous day's positions. Summary market risk and limit compliance reports are produced and reviewed weekly with the Senior Executive Team (SET), and quarterly with the RMC.

Trading activities

We hold positions in traded financial instruments to meet client investment and risk management needs, and for proprietary trading purposes. Trading revenue (net interest income or non-interest income) is generated from these transactions. Trading instruments are recorded at fair value and include debt and equity securities, as well as interest rate, foreign exchange, equity, commodity, and credit derivative products.

Risk measurement

We use different risk measures:

- VaR, which enables the meaningful comparison of the risks in different businesses and asset classes; and
- Stress testing and scenario analysis, which provide insight into portfolio behaviour under extreme circumstances.

Backtesting validates the effectiveness of risk quantification through analysis of actual and theoretical profit and loss outcomes.

Value-at-Risk

Our VaR methodology is a statistically defined, probability-based approach that uses volatilities and correlations to quantify risk in dollar terms. VaR measures the potential loss from adverse market movements that can occur overnight with less than a 1% probability of occurring under normal market conditions, based on equally weighted historical data. VaR uses numerous risk factors as inputs and is computed through the use of historical volatility of each risk factor and the associated historical correlations among them, evaluated over a one-year period, and updated on a regular basis. Total VaR is determined by the combined modelling of VaR for each of interest rate, credit spread, equity, foreign exchange, commodity risks, along with the reduction due to the portfolio effect arising from the interrelationship of the different risks. Starting in the fourth quarter of 2007, we began including in VaR a measure of debt specific risk (DSR). DSR is the price volatility and credit event risk specific to each issuer for products such as bonds and credit derivatives. The new model simulates these risks across all issuers in our trading portfolios, and has been approved by OSFI for the calculation of minimum regulatory capital, replacing a previous, less sophisticated capital model.

Stress testing and scenario analysis

Stress testing and scenario analysis are designed to add insight to possible outcomes of abnormal market conditions, and to highlight possible risk concentrations.

Our stress testing measures the effect on portfolio values of a wide range of extreme moves in market prices. The stress test methodology assumes that no actions are taken during the stress event to mitigate risk, reflecting the decreased liquidity that frequently accompanies market shocks.

Our scenario analysis approach simulates the impact on earnings of extreme market events up to a period of one quarter. Scenarios are developed using actual historical market data during periods of market disruption, or are based on the hypothetical occurrence of economic events, political events and natural disasters suggested and designed by economists, business leaders and risk managers.

Among the historical scenarios used were the 1987 equity market crash, the 1994 period of U.S. Federal Reserve tightening, the 1998 Russian-led crisis, and the market events following September 11, 2001. The hypothetical scenarios used include potential market crises originating in North America and Asia.

Our core stress tests and scenario analyses are run daily, and further ad hoc analysis is carried out as required. Scenarios are reviewed and amended as necessary to ensure they remain relevant. Limits are placed on the maximum acceptable loss to the aggregate portfolio under any worst-case scenario and on the impact of stress testing at the detailed portfolio level and by asset class.

Backtesting

For each of our trading portfolios, and in aggregate, the backtesting process serves to confirm that actual profit and loss outcomes are consistent with the statistical assumptions of the VaR model. This process is further enhanced through the calculation of a hypothetical or static profit and loss. This represents the theoretical change in value of the prior day's closing portfolio due to each day's price movements, on the assumption that the contents of the portfolio remained unchanged. The comparison of the daily static profit and loss with VaR is required by OSFI.

The VaR by risk type table below shows the mix of market risks by type of risk and in aggregate. The risks are interrelated and the diversification effect reflects the reduction of risk due to portfolio effects among the trading positions. Our trading risk exposures to interest rates and credit spreads arise from activities in the global

debt and derivative markets, particularly from transactions in the Canadian, U.S. and European markets. The primary instruments are government and corporate debt, and interest rate and credit derivatives. The bulk of the trading exposure to foreign exchange risk arises from transactions involving the U.S. dollar, Euro, British pound, and Japanese yen, whereas the primary risks of loss in equities are in the U.S., Canadian and European markets. Trading exposure to commodities arises primarily from transactions involving North American natural gas and oil product indices. During 2007, aggregate risk levels were generally higher than in 2006, primarily due to higher levels of credit spread risk for structured credit assets in the second half of the year. Limitations on significant directional exposure and active securities inventory management were major components in constraining risk.

VaR by risk type – trading portfolio⁽¹⁾

Total risk with DSR	\$ 14.7	\$ 14.6	\$ 18.2	\$ 13.1				

(1) Trading portfolio is defined under CIBC policy, consistent with OSFI capital adequacy guidelines.

(2) Aggregate VaR is less than the sum of the VaR of the different market risk types due to risk offsets resulting from portfolio diversification effect.

(3) Not meaningful. It is not meaningful to compute a diversification effect because the high and low may occur on different days for different risk types.

(4) Not available, as the measure was not reported in 2006.

Trading revenue was \$(310) million (2006: \$685 million; 2005: \$820 million) and trading revenue (TEB)⁽¹⁾ was \$(18) million (2006: \$906 million; 2005: \$996 million). The trading revenue analysis below reflects trading revenue (TEB)⁽¹⁾ for 2007 excluding \$33 million (2006: \$25 million; 2005: \$181 million) related to the consolidation of VIEs, and \$(745) million (2006: nil; 2005: nil) related to reductions in fair value of structured credit assets, which cannot be meaningfully allocated to specific days. The histogram below presents the frequency

distribution of daily trading revenue (TEB)⁽¹⁾ for 2007. Trading revenue (TEB)⁽¹⁾ was positive for 75% of the days (2006: 79%; 2005: 81%). Trading losses did not exceed VaR for any day during the year. Average daily trading revenue (TEB)⁽¹⁾ was \$2.7 million (2006: \$3.4 million; 2005: \$3.1 million). The trading revenue (TEB)⁽¹⁾ and VaR backtesting graph on the following page compares the 2007 actual daily trading revenue (TEB)⁽¹⁾ with the previous day's VaR measures.

Frequency distribution of daily 2007 trading revenue (TEB)⁽¹⁾

(1) For additional information, see the "Non-GAAP measures" section. Trading revenue comprises both trading net interest income and non-interest income.

Backtesting of trading revenue (TEB)⁽¹⁾ vs. VaR

(1) For additional information, see the "Non-GAAP measures" section.

Non-exchange traded commodity derivatives

In the normal course of business, we trade non-exchange traded commodity derivative contracts. We control and manage our non-exchange traded commodity derivatives risk through the VaR and stress testing methodologies described above. We use modelling techniques or other valuation methodologies to determine the fair value of these contracts.

The following table provides the fair value, based upon maturity of non-exchange traded commodity contracts:

\$ millions, as at October 31, 2007

	Positive	Negative	Net
Maturity less than 1 year	\$ 556	\$ (482)	\$ 74
Maturity 1–3 years	701	(691)	10
Maturity 4–5 years	34	(40)	(6)
Maturity in excess of 5 years	85	(17)	68
Fair value of contracts	\$ 1,376	\$ (1,230)	\$ 146

Non-trading activities

Market risks also arise from our retail banking business, equity investments and other non-trading activities. We originate many retail products with market risk characteristics. Changes in market conditions, customer behaviour and competitive market pressures can have an impact on the market risk exposure and retail margins earned from these products. Foreign exchange exposures arising from net earnings from, and investments in, foreign operations are also included in non-trading activities.

Interest rate risk

Non-trading interest rate risk consists primarily of risk inherent in ALM activities and the activities of domestic and foreign subsidiaries. Interest rate risk results from differences in the maturities or repricing dates of assets and liabilities, both on- and off-balance sheet, as well as from embedded optionality in retail products. This optionality arises predominantly from the prepayment exposures of mortgage products, mortgage commitments and some GIC products with early redemption features; this optionality is measured consistent with our actual experience. A variety of cash instruments and derivatives, principally interest rate swaps, futures and options, are used to manage and control these risks.

Our total non-trading interest rate risk exposure, as at October 31, 2007, is included in Note 19 to the consolidated financial statements. On- and off-balance sheet assets and liabilities are generally reported based on the earlier of their contractual repricing or maturity date; however, our disclosure includes the assumed interest rate sensitivity of certain assets and liabilities (including core deposits and credit card balances), reflecting how we manage interest rate risk; the assumed duration of core balances is approximately 2.5 years. The interest rate position reported in Note 19 presents our risk exposure only at a point in time. The exposure can change depending on client preference for products and terms, including mortgage prepayment or other options exercised, and the nature of our management of the various and diverse portfolios that comprise the consolidated interest rate risk position.

The following table shows the potential impact of an immediate 100 basis point increase or decrease in interest rates over the next 12 months, adjusted for estimated prepayments:

Interest rate sensitivity – non-trading (after-tax)

\$ millions, as at October 31	2007			2006		
	C\$	US\$	Other	C\$	US\$	Other
100 basis points increase in interest rates						
Net income	\$ 24	\$ 12	\$ (3)	\$ 36	\$ –	\$ (1)
Economic value of equity risk ⁽¹⁾	98	21	36	215	(6)	(6)
100 basis points decrease in interest rates						
Net income	\$ (96)	\$ (12)	\$ 3	\$ (112)	\$ –	\$ 1
Economic value of equity risk ⁽¹⁾	(155)	(21)	(36)	(269)	(7)	2

(1) Measured on a present value basis.

Foreign exchange risk

Non-trading foreign exchange risk, also referred to as structural foreign exchange risk, arises primarily from our investments in foreign operations. This risk, predominantly in U.S. dollars, is managed using derivative hedges, and by funding the investments in foreign currencies. We actively manage this risk to ensure that the potential impact to earnings is minimized and that the potential impact on our capital ratios is within tolerances set by the RMC. A 1% appreciation of the Canadian dollar would reduce our shareholders' equity as at October 31, 2007 by approximately \$28 million.

Our non-functional currency denominated earnings are converted into the functional currencies through spot or forward foreign exchange transactions. Thus, there is no significant impact of exchange rate fluctuations on our consolidated statement of operations, except for foreign functional currency earnings, which are translated at average monthly exchange rates as they arise.

We hedge certain foreign currency contractual expenses using derivatives which are accounted for as cash flow hedges. The net change in fair value of these hedging derivatives included in AOCI amounted to \$112 million as at October 31, 2007. This amount will be released to income to offset the hedged currency fluctuations as the expenses are incurred.

Derivatives held for ALM purposes

Where derivatives are held for ALM purposes, and when transactions meet the criteria specified in the CICA handbook section 3865, we apply hedge accounting for the risks being hedged, as discussed in Notes 1, 2 and 14 to the consolidated financial statements. Derivative hedges that do not qualify for hedge accounting treatment are

referred to as economic hedges and are recorded at fair value on the consolidated balance sheet with changes in fair value recognized in the consolidated statement of operations.

Economic hedges for other than FVO financial instruments may lead to income volatility because the hedged items are either recorded on a cost or amortized cost basis; this income volatility may not be representative of the overall risk.

Equity risk

Non-trading equity risk arises primarily in our merchant banking activities and comprises public and private equities and investments in limited partnerships. They are included in AFS securities (2006: investment securities and other assets). Investments in public equities are carried at fair value. Investments in private equities and limited partnerships are carried at cost less other-than-temporary impairment, as these do not have quoted market values in an active market.

In addition, merchant banking investments include trading securities and other assets as noted in the table below:

\$ millions, as at October 31		Carrying value	Fair value
2007	AFS securities	\$ 800	\$ 1,207
	Trading securities ⁽¹⁾	20	20
	Other assets ⁽²⁾	248	282
		\$ 1,068	\$ 1,509
2006	Investment securities	\$ 475	\$ 685
	Trading securities ⁽¹⁾	21	21
	Other assets ⁽²⁾	856	1,210
		\$ 1,352	\$ 1,916

(1) Represents investment net of non-controlling interests in VIEs.

(2) Includes investment in limited partnerships (only 2006), and equity-accounted investments.

Liquidity Risk

Liquidity risk arises from our general funding activities and in the course of managing our assets and liabilities. It is the risk of having insufficient cash resources to meet current financial obligations without raising funds at unfavourable rates or selling assets on a forced basis.

Our liquidity risk management strategies seek to maintain sufficient liquid financial resources to continually fund our balance sheet under both normal and stressed market environments.

Governance

In its oversight capacity, the Board establishes the liquidity risk framework that recognizes the credit-sensitive nature of our business activities and the importance of depositor confidence. The established management framework consists of policies, limits and independent monitoring structures governing major regional funding centres and operating subsidiaries in North America, Europe and Asia. Treasury, with oversight by MRM, is responsible for the development and execution of the liquidity management framework on a global basis.

As we operate in a variety of jurisdictions and through various subsidiaries, the liquidity management governance framework is designed to ensure compliance with applicable regulatory restrictions and to ensure appropriate liquidity in each region and subsidiary.

Policies and standards

Policies and standards defining our liquidity risk management requirements are reviewed and approved annually by the RMC. These policies and standards outline measurement and reporting requirements and establish liquidity limits.

Our liquidity policies require maintenance of sufficient unencumbered liquid assets or unused funding capacity to meet anticipated funding needs (as measured by a selected benchmark stress scenario) for a minimum period of time as determined by the RMC. Guidelines are set to ensure adequate diversification of funds and to manage individual depositor concentration.

An enterprise-wide pledging policy has been implemented and includes consolidated aggregate net maximum pledge limits for financial and non-financial assets. Pledged assets are considered encumbered for liquidity purposes.

We maintain and periodically update a liquidity contingency plan for responding to stress event impacts. The plan is presented annually to the RMC.

Process and control

Actual and anticipated inflows and outflows of funds generated from on- and off-balance sheet exposures are monitored on a daily basis to ensure compliance with short-term asset/liability mismatch limits by geographic location, consolidated for overall global exposure. Potential cash flows under various stress scenarios are modeled using balance sheet positions. Management may alter the mix and/or maturity of assets and liabilities to adjust the necessary level of liquidity to be maintained for a specific minimum period of time.

The RMC is regularly informed of current and prospective liquidity conditions, ongoing monitoring measures and the implementation of enhanced measurement tools.

Risk measurement

Our liquidity measurement system provides daily liquidity risk exposure reports for independent monitoring and review. The RMC, senior management and appropriate management within Treasury and MRM oversee liquidity risk exposure reporting.

Stress event impacts are measured through scenario analyses, designed to measure potential impact of abnormal market conditions on the liquidity risk profile. Treatment of cash flows under varying conditions is reviewed periodically to determine whether changes to customer behaviour assumptions are warranted.

Term funding sources and strategies

We manage liquidity to meet both short- and long-term cash requirements. Reliance on short-term wholesale funding is maintained at prudent levels.

We obtain funding through both wholesale and retail sources. Consistent with our liquidity risk mitigation strategies, we continue to source term funding in the wholesale markets from a variety of clients and geographic locations, borrowing across a range of maturities using a mix of funding instruments.

Core personal deposits remain a primary source of retail funding. As at October 31, 2007, Canadian dollar deposits from individuals totalled \$83.8 billion (2006: \$77.4 billion).

Strategies for managing liquidity risk include maintaining diversified sources of wholesale term funding, asset securitization initiatives, capital and subordinated debt issuance, and maintenance of segregated pools of high-quality liquid assets that can be sold or pledged as security to provide a ready source of cash. Collectively, these strategies result in lower dependency on short-term wholesale funding.

We have historically securitized various financial assets, including credit card receivables and residential and commercial mortgages. For further discussion of our off-balance sheet arrangements affecting liquidity and funding, see the "Off-balance sheet arrangements" section.

Balance sheet liquid assets are summarized in the following table:

\$ billions, as at October 31	2007	2006
Cash	\$ 1.0	\$ 0.9
Deposits with banks	12.7	10.9
Securities ⁽¹⁾	65.1	66.8
Securities borrowed or purchased under resale agreements	34.0	25.4
	\$ 112.8	\$ 104.0

(1) Comprises AFS securities (2006: investment securities) with residual term to contractual maturity within one year and trading securities, including \$3.1 billion of holdings in our sponsored ABCP conduits. Excludes \$297 million in non-bank sponsored ABCP.

In the course of our regular business activities, certain assets are pledged as part of collateral management, including those necessary for day-to-day clearing and settlement of payments and securities. Pledged assets, including those for securities borrowed or financed through repurchase agreements, as at October 31, 2007 totalled \$27.7 billion (2006: \$25.5 billion). For additional details, see Note 24 to the consolidated financial statements.

We consider our liquidity profile to be sound and there are no known trends, demands, commitments, events or uncertainties that are likely to materially change our current liquidity position.

Credit ratings

Access to wholesale funding sources and the cost of that funding are dependent on various factors, including credit ratings. Our credit ratings remained unchanged throughout the year, with the exception of an upgrade from DBRS Limited and Moody's Investors Service's revision of our debt ratings, while Standard & Poor's Ratings Services revised its ratings outlook to stable from negative. These changes in the second quarter of the year resulted in minimal impact to our access to and cost of wholesale funding.

Our credit ratings are summarized in the table below:

As at October 31	Short-term debt		Senior debt		Preferred shares	
	2007	2006	2007	2006	2007	2006
DBRS	R-1H	R-1M	AA	AA (low)	Pfd-1	Pfd-1 (low)
Fitch	F1+	F1+	AA-	AA-		
Moody's	P-1	P-1	Aa2	Aa3		
S&P	A-1	A-1	A+	A+	A-	A-
					P-1 (low)	P-1 (low)

Restrictions on the flow of funds

We have certain subsidiaries that have separate regulatory capital, liquidity and funding requirements, as set by banking and securities regulators. Requirements of these entities are subject to regulatory change and can fluctuate depending on activity.

Liquidity of our major subsidiaries is continually evaluated, factoring in local regulatory restrictions, and operational, tax, economic and other business impediments relating to the movement of funds between subsidiaries and the domestically regulated parent bank. This enables us to manage and minimize the existence of pockets of "trapped liquidity".

We monitor and manage our capital and liquidity requirements across these entities to ensure that capital is used efficiently and that each entity is in continuous compliance with local regulations.

Contractual obligations⁽¹⁾

Contractual obligations giving rise to commitments of future payments affect our short- and long-term liquidity and capital resource needs. The following table includes aggregated information about our contractual obligations that are enforceable and legally binding on CIBC, including on- and off-balance sheet:

\$ millions, as at October 31	Less than 1 year	1-3 years	3-5 years	Over 5 years	2007 Total	2006 Total
Deposits ⁽²⁾	\$193,531	\$ 22,169	\$ 10,997	\$ 4,975	\$ 231,672	\$ 202,891
Subordinated indebtedness	—	—	—	5,526	5,526	5,595
Operating leases	277	493	380	1,192	2,342	2,234
Purchase obligations ⁽³⁾	492	624	452	187	1,755	1,400
Investment commitments ⁽⁴⁾	299	—	—	—	299	355
Pension contributions ⁽⁵⁾	60	—	—	—	60	55
	\$194,659	\$ 23,286	\$ 11,829	\$ 11,880	\$ 241,654	\$ 212,530

(1) Comprises obligations that are enforceable and legally binding on CIBC. Excluded from the table are a number of obligations to be settled in cash, primarily under one year. These obligations are reflected on our consolidated balance sheet and include: securities lent or sold under repurchase agreements; securities sold short; purchases of debt and equity instruments that settle within standard market timeframes (e.g. regular way); derivatives payable that do not require physical delivery of the underlying instrument; and certain purchases of instruments that result in settlement failures.

(2) As the timing of deposits payable on demand and deposits payable after notice is non-specific and callable by the depositor, obligations have been included as less than one year.

(3) Obligations that are legally binding agreements whereby we agree to purchase products or services with specific minimum or baseline quantities defined at fixed, minimum or variable prices over a specified period of time are defined as purchase obligations. Purchase obligations are included through to the termination date specified in the respective agreements, even if the contract is renewable. Many of the purchase agreements for goods and services include clauses that would allow us to cancel the agreement prior to expiration of the contract within a specific notice period. However, the amount above includes our obligations without regard to such termination clauses (unless actual notice of our intention to terminate the agreement has been communicated to the counterparty).

(4) As an investor in merchant banking activities, we enter into commitments to fund external private equity funds and investments in equity and debt securities at market value at the time the commitments are drawn. As the timing of future investment commitments is non-specific and callable by the counterparty, obligations have been included as less than one year.

(5) Subject to change as contribution decisions are affected by various factors, such as market performance, regulatory requirements, and management's ability to change funding policy. Also, funding requirements after 2008 are excluded due to the significant variability in the assumptions required to project the timing of future cash flows.

Strategic Risk

Strategic risk arises from ineffective business strategies or the failure to effectively execute strategies. It includes, but is not limited to, potential financial loss due to the failure of acquisitions or organic growth initiatives.

Oversight of strategic risk is the responsibility of the SET and the Board. At least annually, the CEO presents CIBC's strategic planning process and CIBC's annual strategic business plan to the Board for review and approval. The Board shall review the plan in

light of management's assessment of emerging market trends, the competitive environment, potential risks and other key issues.

One of the tools for measuring, monitoring and controlling strategic risk is attribution of economic capital against this risk. Our economic capital models include a strategic risk component for those businesses utilizing capital to fund an acquisition or a significant organic growth strategy.

Operational Risk

Operational risk is the loss resulting from inadequate or failed internal processes, systems, or from human error or external events.

Governance

The Governance and Control Committee (GCC) oversees the effectiveness of our internal control framework within the parameters and strategic objectives established by the SET. The SET is accountable to the Board and its Audit Committee and the RMC for maintaining a strong internal control environment.

Under our integrated internal control framework, businesses have responsibility for the day-to-day management of operational risk. RM is responsible for measuring, monitoring and controlling operational risk on an enterprise-wide basis and also for ensuring that businesses are managing operational risk in compliance with policies and procedures that are affirmed by the CRC and the RMC annually.

Policies and standards

Operational risks driven by people and processes are mitigated through human resources policies and practices, and operational procedural controls, respectively. Operational risks driven by systems are managed through controls over technology development and change management.

While operational risk can be minimized through a sound internal control structure, it can never be fully eliminated. The risk of catastrophic loss is addressed through risk avoidance and control programs that reduce the probability or potential severity of such losses to acceptable levels. We maintain a comprehensive corporate insurance program to protect our earnings from potential high-severity losses arising from certain types of criminal activity, property loss or damage and liability exposure, using cost-benefit analysis to evaluate available coverage. We also maintain a global business continuity management program to ensure that our key business functions could continue and normal operations are restored effectively and efficiently in the event of a major disaster affecting our operations. Business continuity plans maintained under the program are subjected to regular review, update and testing.

Process and control

Infrastructure and governance groups maintain comprehensive risk and control self-assessment processes that encompass measuring, monitoring and managing the effectiveness of controls. The results of these self-assessments are reported to the Audit Committee, the RMC, the SET and the GCC. Our independent Internal Audit function also plays an important role in the governance process by regularly reporting to the Audit Committee, the SET and the GCC on the effectiveness of, and adherence to, internal control policies, procedures and standards.

Risk measurement

In line with Basel II proposals, our operational risk measurement methodology for economic capital purposes, attributes operational risk capital to expected and unexpected losses arising from the following loss event types:

- Legal liability (with respect to third parties, clients and employees);
- Client restitution;
- Regulatory compliance and taxation violations;
- Loss or damage to assets;
- Transaction processing errors; and
- Theft, fraud and unauthorized activities.

Operational risk capital is calculated using a loss distribution approach with the input parameters based on either actual internal loss experience where a statistically significant amount of internal historical data is available, or applying a loss scenario approach based on the available internal/external loss data and management expertise.

In addition to the capital attributed as described above, adjustments are made for internal control issues and risks that are not included in the original operational risk profile. These adjustments are based on the results of the quarterly risk and control self-assessment processes, which involve input from the business and infrastructure groups as well as the governance areas such as the Operational Risk Department, Control Division, Internal Audit, and Legal and Regulatory Compliance.

We attribute operational risk capital at the line of business level. Capital represents the worst-case loss and is determined for each loss event type and production/infrastructure/corporate governance line of business. The aggregate risk of CIBC is less than the sum of the individual parts, as the likelihood that all business groups, across all regions will experience a worst-case loss in every loss category in the same year is extremely small. To adjust for the fact that all risks are not 100% correlated, we incorporate a portfolio effect to ensure that the aggregated risk is representative of the total bank-wide risk. The process for determining correlations considers both internal and external historical correlations and takes into account the uncertainty surrounding correlation estimates.

The results of the capital calculations are internally back tested each quarter, and the overall methodology is independently validated by the RM validation group to ensure that the assumptions applied are reasonable and conservative.

Reputation and Legal Risk

CIBC's reputation and financial soundness are of fundamental importance to CIBC, its customers, shareholders and employees.

Reputation risk is the potential for negative publicity regarding CIBC's business conduct or practices which, whether true or not, could significantly harm our reputation as a leading financial institution, or could materially and adversely affect our business, operations or financial condition.

Legal risk is the potential for civil litigation or criminal or regulatory proceedings being commenced against CIBC that, once decided, could materially and adversely affect our business, operations or financial condition.

The RMC provides oversight of the management of reputation and legal risk. The identification, consideration and prudent,

proactive management of potential reputation and legal risk is a key responsibility of CIBC and all of its employees.

Our "Global Reputation and Legal Risks Policy" sets standards for safeguarding our reputation and minimizing exposure to our reputation and legal risk. The policy is supplemented by business-specific procedures for identifying and escalating transactions that could pose material reputation risk and/or legal risk. The Reputation and Legal Risk Committee reviews all transactions brought before it to assess whether CIBC is exposing itself to any undue reputation and legal risk.

Regulatory Risk

Regulatory risk is the risk of non-compliance with regulatory requirements. Non-compliance with these requirements may lead to regulatory sanctions and harm to our reputation.

Our regulatory compliance philosophy is to manage regulatory risk through the promotion of a strong compliance culture, and the integration of sound controls within the business and infrastructure groups. The foundation of this approach is a comprehensive legislative compliance management (LCM) framework. The LCM framework maps regulatory requirements to internal policies, procedures and controls that govern regulatory compliance.

Our compliance department is responsible for the development and maintenance of a comprehensive regulatory compliance program, including oversight of the LCM framework. The department is independent of business management, has the authority to

communicate directly to the Audit Committee, and reports regularly to that committee.

Primary responsibility for compliance with all applicable regulatory requirements rests with senior management of the business and infrastructure groups, and extends to all employees. The compliance department's activities support those groups, with particular emphasis on those regulatory requirements that govern the relationship between CIBC and its clients and those requirements that help protect the integrity of the capital markets. Specific activities that assist the business and infrastructure groups include communication of regulatory requirements, advice, training, testing and monitoring, and reporting and escalation of control deficiencies and regulatory risks.

Environmental Risk

Environmental risk is the risk of financial loss or damage to reputation associated with environmental issues, whether arising from our credit and investment activities or related to our own operations. Our corporate environmental policy, originally approved by the Board in 1993 and last updated in 2007, commits CIBC to responsible conduct in all activities to protect and conserve the environment; safeguard the interests of all stakeholders from unacceptable levels of environmental risk; and support the principles of sustainable development.

The policy is addressed by an integrated Corporate Environmental Management Program which is under the overall management of the Environmental Risk Management (ERM) Group in RM. Environmental evaluations are integrated into our credit and investment risk assessment processes, with environmental risk management standards and procedures in place for all sectors. In addition, environmental and social risk assessments in project finance are required in accordance with our commitment to the Equator Principles, a voluntary set of guidelines for financial institutions based on the screening criteria of the International Finance Corporation, to which CIBC has been a signatory since 2003. We also conduct ongoing research and benchmarking on environmental issues such as biodiversity and

reforestation as they may pertain to responsible lending practices. In 2006, we completed a major portfolio risk review related to potential regulatory requirements for greenhouse gas emission reductions in certain industries, as the foundation for our ongoing research on climate change-related issues and initiatives in terms of both business opportunities and risks pertaining to our major businesses and our own operations.

The ERM Group works closely with Corporate Real Estate, Global Sourcing, Communications, and other business and functional groups in ensuring that high standards of environmental due diligence and responsibility are applied in our facilities management, purchasing and other operations. An Environmental Management Committee is in place to coordinate and support these activities.

Additional information on our environmental policies and practices is available in the "Public Accountability Statement" included within the Annual Accountability Report and on our website (www.cibc.com). We are also a signatory to and participant in the Carbon Disclosure Project, which provides corporate disclosure to the investment community on greenhouse gas emissions and climate change management.

Accounting and Control Matters

Critical Accounting Policies and Estimates

A summary of significant accounting policies is presented in Note 1 to the consolidated financial statements. Certain accounting policies require us to make judgments and estimates, some of which may relate to matters that are uncertain. Changes in the judgments and estimates required in the critical accounting policies discussed below could have a material impact on our financial results. We have established control procedures to ensure accounting policies are applied consistently and processes for changing methodologies are well controlled.

Valuation of financial instruments

As a result of the adoption of the new financial instruments standards (see "Accounting developments" section), all derivative contracts, AFS securities other than private equities and FVO financial instruments are carried at fair value in addition to our debt and equity trading securities, and obligations related to securities sold short. Our FVO financial instruments include certain debt securities, business and government loans, and business and government and bank deposits.

The determination of fair value requires us to make judgments and estimates as there is often limited market information. Fair value is defined as the amount at which a financial instrument could be exchanged in an orderly market as an arm's length transaction between knowledgeable and willing parties, under no compulsion to act. Fair value is best evidenced by quoted market prices for the same instrument or for similar instruments, adjusted for any difference in terms. Commencing November 1, 2006, quoted market values of financial instruments and liabilities, classified as trading, FVO or AFS are in reference to bid or ask prices applied to the net position where available, as appropriate, instead of closing prices. If a market price in an active market is not available, the fair value is estimated on the basis of valuation models. Observable market inputs are utilized for valuation purposes to the extent possible and appropriate.

Valuation models may utilize multiple observable market inputs, including interest rates, foreign currency rates, equity and equivalent synthetic instrument prices, index levels, credit spreads, counterparty credit quality, corresponding market volatility levels, and other market-based pricing factors, as well as any appropriate, highly correlated proxy market valuation data.

If the fair value of a derivative is not determinable based upon quoted market prices in an active market, and a suitable market proxy is not available, the transaction price would be considered to be the best indicator of market value, such that any gains or losses at inception would be recognized only in future periods when the market quote or data become observable or through various appropriate methods over the life of the transaction.

To ensure that valuations are appropriate, a number of policies and controls have been put in place. Independent validation of fair value is performed at least on a monthly basis. Valuations are verified to external sources such as exchange quotes, broker quotes or other management-approved independent pricing sources. Key model

inputs, such as yield curves and volatilities, are independently verified. Valuation models used, including analytics for the construction of yield curves and volatility surfaces, are vetted and approved, consistent with our model risk policy.

The table below presents the valuation methods used to determine the sources of fair value of those financial instruments which are held at fair value on the consolidated balance sheet:

As at October 31, 2007	Quoted market price	Valuation technique – market observable inputs	Valuation technique – non market observable inputs ⁽¹⁾
Assets			
Trading securities	92.5%	3.5%	4.0%
AFS securities	68.8	27.8	3.4
FVO financial instruments	23.8	74.4	1.8
Derivative instruments	7.9	76.0	16.1
Liabilities			
Obligations related to securities sold short	96.3%	3.1%	0.6%
FVO financial instruments	–	100.0	–
Derivative instruments	6.4	77.2	16.4

(1) Includes financial instruments valued using indicative broker quotes in an inactive market, such as RMBS and other CDOs related to the U.S. residential mortgage market. In addition, non-bank sponsored ABCP subject to the "Montreal Accord" are also included. The total fair value of financial instrument assets in this category was approximately \$7.0 billion, of which approximately \$5.4 billion was hedged.

We apply judgment in establishing valuation adjustments that take into account various factors that may have an impact on the valuation. Such factors include, but are not limited to, the bid-offer spread, illiquidity due to lack of market depth, parameter uncertainty and other market risk, model risk, credit risk and future administration costs.

The following table summarizes our valuation adjustments:

\$ millions, as at October 31	2007	2006
Trading securities		
Market risk	\$ 25	\$ 28
Derivatives		
Market risk	211	87
Credit risk	71	46
Administration costs	28	29
Other	5	12
	\$ 340	\$ 202

Impairment of AFS securities

Our AFS securities include debt and equity securities and retained interests in securitized assets.

AFS securities, other than equities that do not have a quoted market value in an active market, are stated at fair value, whereby the difference between the fair value and the amortized cost is included in AOCI. Equities that do not have a quoted market value in an active market are carried at cost. AFS securities are subject to impairment reviews to assess whether or not there is other-than-temporary impairment.

Factors that are reviewed for impairment assessment include, but are not limited to, operating performance and future expectations, liquidity and capital adequacy, external credit ratings, underlying asset quality deterioration, management changes, industry valuation levels for comparable public companies, and any changes in market and economic outlook. Realized gains and losses on disposal and write-downs to reflect other-than-temporary impairments in value of AFS securities, are recorded in the consolidated statement of operations.

Allowance for credit losses

We establish and maintain an allowance for credit losses that is considered the best estimate of probable credit-related losses existing in our portfolio of on- and off-balance sheet financial instruments, giving due regard to current conditions. The allowance for credit losses consists of specific and general components, which are based on our assessment of probabilities of default, internal risk ratings, expected loss and recovery rates, and the degree of risk inherent in the loan portfolios.

Specific allowance Consumer loans

Consumer loan portfolios include residential mortgages, personal and credit card loans, and certain small business loan portfolios, which consist of large numbers of homogeneous balances of relatively small amounts. We take a portfolio approach and establish the specific allowance utilizing a formula basis, since it is not practical to review each individual loan. We evaluate these portfolios for specific allowances by reference to historical ratios of write-offs to balances in arrears and to balances outstanding. Further analysis and evaluation of the allowance is performed to account for the aging of the portfolios and the impact of economic trends and conditions.

Business and government loans

Business and government loan portfolios are assessed on an individual loan basis. Specific allowances are established when impaired loans are identified. A loan is classified as impaired when we are of the opinion that there is no longer a reasonable assurance of the full and timely collection of principal and interest. The specific allowance is the amount required to reduce the carrying value of an impaired loan to its estimated realizable amount. This is determined by discounting the expected future cash flows at an effective interest rate inherent in the loan upon impairment. Loans are monitored for credit quality and assigned a risk rating which represents the risk of loss in a credit facility. This risk of loss combines the likelihood of default by the borrower, and the probable severity of the loss, if it happens. All usual risk factors are considered in reaching a judgment on a risk rating. This method emphasizes accuracy and consistency of risk ratings within a disciplined framework. It is an integral part of the ongoing credit assessment process and is the basis for identifying higher risk, watchlist and impaired loans, as well as the establishment of allowances.

General allowance

The general allowance provides for credit losses that are present in the credit portfolios, but which have not yet been specifically identified or provided for through specific allowances. The general allowance applies to on- and off-balance sheet credit exposures that are not carried at fair value. The methodology for determining the appropriate level of the general allowance incorporates a number of factors, including the size of the portfolios, expected loss rates, and

relative risk profiles. We also consider estimates of the time periods over which losses that are present would be specifically identified and a specific provision taken, their view of current economic and portfolio trends, and evidence of credit quality improvements or deterioration. On a regular basis, the parameters that affect the general allowance calculation are updated, based on our experience and economic environment.

Expected loss rates for business loan portfolios are based on the risk rating of each credit facility and on the probability of default factors associated with each risk rating, as well as estimates of loss given default. The probability of default factors reflect our historical experience over an economic cycle, and is supplemented by data derived from defaults in the public debt markets. Loss given default estimates are based on our historical experience. For consumer loan portfolios, expected losses are based on our historical loss rates and aggregate balances. As at October 31, 2007, our model indicated a range of outcomes for the general allowance between \$601 million and \$966 million. The general allowance of \$890 million (2006: \$900 million), which represents our best estimate of losses inherent but not specifically provided for in our loan portfolios, was selected from within the range based on a qualitative analysis of the economic environment and credit trends, as well as the risk profile of the loan portfolios.

Securizations and VIEs

We have determined that all of our securitizations are accounted for as sales because we surrender control of the transferred assets and receive consideration other than beneficial interests in the transferred assets. We have also determined that the entities to which we have transferred the assets should not be consolidated.

Gains or losses on transfers accounted for as sales depend, in part, upon the allocation of previous carrying amounts to assets sold and retained interests. These carrying amounts are allocated in proportion to the relative fair value of the assets sold and the retained interest. As market prices are generally not available for retained interest, we estimate fair value based on the present value of expected future cash flows. This requires us to estimate expected future cash flows, which incorporate expected credit losses, scheduled payments and unscheduled prepayment rates, discount rates, and other factors that influence the value of retained interests. Actual cash flows may differ significantly from our estimations. These estimates directly affect our calculation of gain on sale from securitizations and the rate at which retained interests are taken into income.

AcG-15 provides guidance on applying consolidation principles to certain entities that are subject to control on a basis other than ownership of voting interests. If the activities of the entity are sufficiently restricted to meet the accounting requirements for it to be considered a QSPE, the entity is not considered for consolidation under the requirements of AcG-15. To determine which VIEs require consolidation under AcG-15, we exercise judgment by identifying our variable interests and comparing them with other variable interests held by unrelated parties to determine if we are exposed to a majority of each of these entities' expected losses or expected residual returns. While we have determined that the VIEs for our securitizations do not need to be consolidated either because they are QSPEs or because we are not the primary beneficiary under AcG-15, we have consolidated certain other VIEs as we determined that we were exposed to a majority of the expected losses or residual returns.

We also sponsor several VIEs that purchase pools of third-party financial assets. Our derivative and administrative transactions with

these entities are generally not considered variable interests. We monitor the extent to which we support these VIEs through direct investment in the debt issued by the VIEs and through the provision of liquidity protection to the other debt holders to assess whether we are the primary beneficiary and consolidator of these entities. As at October 31, 2007, we did not consolidate any of these entities.

Securitizations and VIEs affect all our reporting segments. For additional information on our securitizations, including key economic assumptions used in measuring the fair value of retained interest and the sensitivity of the changes to those assumptions, see the "Off-balance sheet arrangements" section and Note 6 to the consolidated financial statements.

Asset impairment

Goodwill, other intangible assets and long-lived assets

As at October 31, 2007, we had goodwill of \$1,847 million and other intangible assets with an indefinite life amounting to \$135 million. Under GAAP, goodwill is not amortized, but is instead subject to, at least annually, an assessment for impairment by applying a two-step fair value-based test. In the first test, the fair value of the reporting unit is compared to its book value including goodwill. If the book value of the reporting unit exceeds the fair value, an impairment loss is then recognized pursuant to the second test to the extent that, at the reporting unit level, the carrying amount of goodwill exceeds the implied fair value of goodwill. The carrying values of our reporting units are based on economic capital models and are designed to produce the net book value a reporting unit would have if it was a stand-alone entity.

Acquired intangible assets are separately recognized if the benefits of the intangible assets are obtained through contractual or other legal rights, or if the intangible assets can be sold, transferred, licensed, rented, or exchanged. Determining the useful lives of intangible assets requires judgment and fact-based analysis. Intangibles with an indefinite life are not amortized but are assessed for impairment by comparing the fair value to the carrying value.

We use judgment to estimate the fair value of the reporting units and intangible assets with an indefinite life. Imprecise estimates can affect the value reported for goodwill and other intangible assets with an indefinite life. The fair value of the reporting units and intangible assets with an indefinite life are derived from internally developed valuation models, using a market or income approach. Under a market approach, the models consider various factors, including normalized earnings, projected forward earnings, price earnings multiples and book to market multiples. Under an income approach, the models consider various factors, including projected cash flows, terminal growth values and discount rates.

Our 2007 goodwill impairment tests suggest that the fair value of the reporting units subject to testing exceeded the carrying value by at least 20%.

Long-lived assets and other identifiable intangibles with a definite life are amortized over their estimated useful lives. These assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. In performing the review for recoverability, we estimate the future cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future undiscounted cash flows is less than the carrying amount of the asset, an impairment loss is recognized to the extent that fair value is less than the carrying value.

These assets are held in all our reporting segments. For additional details, see Note 8 to the consolidated financial statements.

Income taxes

We use judgment in the estimation of income taxes and future income tax assets and liabilities. As part of the process of preparing our consolidated financial statements, we are required to estimate income taxes in each of the jurisdictions where we operate.

This process involves estimating actual current tax exposure, together with assessing temporary differences that result from the different treatments of items for tax and accounting purposes, and any tax loss carryforwards.

We are also required to establish a future income tax asset in respect of expenses recorded currently for which a tax deduction will be available in a future period, such as the general allowance for credit losses and loss carryforwards.

As at October 31, 2007, we had available future income tax assets in excess of future income tax liabilities of \$335 million before a valuation allowance of \$80 million. We are required to assess whether it is more likely than not that our future income tax assets will be realized prior to their expiration and, based on all the available evidence, determine if a valuation allowance is required on all or a portion of our future income tax assets. The factors used to assess the likelihood of realization are our past experience of income and capital gains, forecast of future net income before taxes, available tax planning strategies that could be implemented to realize the future income tax assets, and the remaining expiration period of tax loss carryforwards. Although realization is not assured, we believe, based on all the available evidence, it is more likely than not that the remaining future income tax assets, net of the valuation allowance, will be realized prior to their expiration.

Income tax accounting impacts all our reporting segments. For further details of our income taxes, see Note 22 to the consolidated financial statements.

Contingent liabilities

CIBC is a party to a number of legal proceedings, including regulatory investigations, in the ordinary course of its business. In certain of these matters, claims for substantial monetary damages are asserted against CIBC and its subsidiaries. In accordance with Canadian GAAP, amounts are accrued for the financial resolution of claims if, in the opinion of management, it is both likely that a future event will confirm that a liability had been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. In some cases, however, it is either not possible to determine whether such a liability has been incurred or to reasonably estimate the amount of loss until the case is closer to resolution, in which case no accrual can be made until that time. If the reasonable estimate of loss involves a range within which a particular amount appears to be a better estimate, that amount would be accrued. If no such better estimate within a range is indicated, the minimum amount in the range is required to be accrued. We regularly assess the adequacy of CIBC's contingent liabilities accrual and make the necessary adjustments to incorporate new information as it becomes available. Adjustments to the accrual in any quarter may be material in situations where significant new information becomes available. While there is inherent difficulty in predicting the outcome of such matters, based on current knowledge and consultation with legal counsel, we do not expect that the outcome of any of these matters, individually or in aggregate, would have a material adverse effect on our consolidated financial position. However, the outcome of any such matters, individually, or in aggregate, may be material to our operating results for a particular year.

Contingent liabilities impact all our reporting segments. For further details of our contingent liabilities, see Note 24 to the consolidated financial statements.

Employee future benefit assumptions

We are the sponsor of defined benefit pension and post-retirement benefit plans for eligible employees that impact all our reporting segments. The pension and post-retirement benefit expense and obligations are dependent upon assumptions used in calculating such amounts. These assumptions include discount rates, projected salary increases, expected return on assets, health care cost trend rates, turnover of employees, retirement age, and mortality rates. These assumptions are reviewed annually in accordance with accepted actuarial practice and approved by management. The discount rate assumption used in determining pension and post-retirement benefit obligations and net benefit expense reflects the market yields, as of the measurement date, on high-quality debt instruments with cash flows that match expected benefit payments. The expected rate of return on the plan assets assumption is based on expected returns for the various asset classes, weighted by portfolio allocation. Anticipated future long-term performance of individual asset categories is considered, reflecting expected future inflation and expected real yields on fixed-income securities and equities. Other assumptions are based on actual plan experience and our best estimates.

In accordance with Canadian GAAP, actual results that differ from the assumptions are accumulated and amortized over future periods and, therefore, generally affect recognized expense and the recorded obligation in future periods. As at October 31, 2007, the net

amount of the unamortized actuarial losses was \$825 million (2006: \$906 million) in respect of the pension plans and \$171 million (2006: \$209 million) in respect of the other benefit plans.

Our benefit plans are funded to or above the amounts required by relevant legislation. During the year, we contributed \$139 million (2006: \$274 million) to the pension plans, which included \$105 million (2006: \$140 million) above the minimum required. The principal post-retirement and other post-employment benefit plans are unfunded. We fund benefit payments for these plans as incurred. During the year, these benefit payments totalled \$31 million (2006: \$25 million).

For further details of our annual pension and post-retirement expense and liability, see Note 21 to the consolidated financial statements.

For our Canadian plans, which represent more than 90% of our pension and post-retirement benefit plans, the assumptions approved by management for the 2008 expense calculation include applying a discount rate of 5.50% for pension and post-retirement benefit plans and an expected long-term rate of return on plan assets of 6.75% for the defined benefit pension plans. These assumptions reflect the upward trend in market yields and represent 0.25% increase from the discount rate used to measure the 2007 expense and a 0.25% increase in the expected long-term rate of return on assets used for 2007 expense determination.

Actual experience different from that anticipated or future changes in assumptions may affect our pension and other post-retirement benefit obligations and expense. The following table outlines the potential impact of changes in certain key assumptions used in measuring the accrued benefit obligations and related expenses:

\$ millions, as at October 31, 2007

	Pension benefit plans		Other benefit plans	
	Obligation	Expense	Obligation	Expense
Impact of a change of 0.5% in key assumptions:				
Discount rate				
Decrease in assumption	\$ 288	\$ 40	\$ 47	\$ –
Increase in assumption	(277)	(42)	(43)	(1)
Expected long-term rate of return on plan assets				
Decrease in assumption	n/a	17	n/a	–
Increase in assumption	n/a	(17)	n/a	–
Rate of compensation increase				
Decrease in assumption	(61)	(16)	(1)	–
Increase in assumption	60	15	1	–

The sensitivity analysis contained in this table should be used with caution as the changes are hypothetical and the impact of changes in each key assumption may not be linear.

Financial Instruments

As a financial institution, our assets and liabilities primarily comprise financial instruments, which include deposits, securities, loans, derivatives, acceptances, repurchase agreements, subordinated debt and preferred shares.

We use these financial instruments for both trading and non-trading activities. Trading activities include the purchase and sale of securities, transacting in foreign exchange and derivative instruments in the course of facilitating client trades, and taking proprietary trading positions with the objective of income generation. Non-trading activities generally include the business of lending, investing, funding, and ALM.

The use of financial instruments may either introduce or mitigate exposures to market, credit and/or liquidity risks. See the "Management of risk" section for details on how these risks are managed.

Financial instruments are accounted for according to their purpose. For details on the accounting of these instruments, see Note 1 to the consolidated financial statements.

For significant assumptions made in determining the valuation of financial and other instruments, see the "Critical accounting policies and estimates" section.

Accounting Developments

Changes in accounting policies

Financial instruments

On November 1, 2006, we adopted the CICA handbook sections 3855 "Financial Instruments – Recognition and Measurement", 3865 "Hedges", 1530 "Comprehensive Income", 3251 "Equity", and 3861 "Financial Instruments – Disclosure and Presentation".

The standards require that all financial assets be classified as trading, FVO, AFS, held-to-maturity, or loans and receivables. In addition, the standards require that all financial assets, including all derivatives, be measured at fair value with the exception of loans and receivables, debt securities classified as held-to-maturity, and AFS equities that do not have quoted market values in an active market. As required, these standards have been applied as an adjustment to opening retained earnings and AOCI. As a result, retained earnings decreased by \$50 million; and AOCI increased by \$123 million, excluding the impact of the reclassification of the foreign currency translation adjustments opening balance to AOCI. Prior period balances have not been restated other than the reclassification of foreign currency translation adjustments to AOCI.

For further details, see Note 1 to the consolidated financial statements.

Future accounting policy changes

Leveraged leases

Prior to 2004, we engaged in various structured leasing investments in the U.S. that are accounted for in the consolidated financial statements as leveraged leases using guidance contained in Statement of Financial Accounting Standard (SFAS) 13, "Accounting for Leases", and under the CICA Emerging Issues Committee Abstract (EIC) 46, "Leveraged Leases".

In July 2006, the Financial Accounting Standards Board (FASB) issued a FASB Staff Position (FSP) FAS 13-2, "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction", which amends SFAS 13, certain aspects of which are incorporated in the CICA EIC 46. The FSP is effective beginning November 1, 2007.

The FSP requires that a change in the estimated timing of the cash flows relating to income taxes results in a recalculation of the timing of income recognition from the leveraged lease. We currently estimate that adopting the FSP will result in an after-tax non-cash charge to opening retained earnings of between \$65 million to \$95 million. An amount approximating the non-cash charge would then be recognized into income over the remaining lease terms.

Capital disclosures

In December 2006, the CICA issued a new handbook section 1535, "Capital Disclosures", which requires an entity to disclose its objectives, policies and processes for managing capital. This new standard is effective beginning November 1, 2007.

Financial instruments

In December 2006, the CICA issued two new handbook sections, 3862 "Financial Instruments – Disclosures" and 3863 "Financial Instruments – Presentation". These new standards are effective beginning November 1, 2007.

These sections replace CICA handbook section 3861, "Financial Instruments – Disclosure and Presentation". These new sections enhance disclosure requirements on the nature and extent of risks arising from financial instruments and how the entity manages those risks.

Related-party Transactions

We have various processes in place to ensure that the relevant related-party information is identified and reported to the Corporate Governance Committee (CGC) of the Board on a quarterly basis, as required by the Bank Act. The CGC has the responsibility for reviewing our policies and practices in identifying transactions with our related

parties that may materially affect us, and reviewing the associated procedures for promoting compliance with the Bank Act.

For further details, see Note 26 to the consolidated financial statements.

Controls and Procedures

Disclosure controls and procedures

CIBC's management, with the participation of the President and Chief Executive Officer and the Chief Financial Officer, has evaluated the effectiveness of CIBC's disclosure controls and procedures (as defined in the rules of the SEC and the Canadian Securities Administrators) as at October 31, 2007, and has concluded that such disclosure controls and procedures were effective.

Management's annual report on internal control over financial reporting

CIBC's management is responsible for establishing and maintaining adequate internal control over financial reporting for CIBC.

Internal control over financial reporting is a process designed by, or under the supervision of, the President and Chief Executive Officer and the Chief Financial Officer and effected by the Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. CIBC's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records, that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of CIBC; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of CIBC are being made only in accordance with authorizations of CIBC's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of

unauthorized acquisition, use or disposition of CIBC's assets that could have a material effect on the financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

CIBC's management has used the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to evaluate the effectiveness of CIBC's internal control over financial reporting.

As at October 31, 2007, management assessed the effectiveness of CIBC's internal control over financial reporting and concluded that such internal control over financial reporting was effective and that there were no material weaknesses in CIBC's internal control over financial reporting that have been identified by management.

Ernst & Young LLP, who has audited the consolidated financial statements of CIBC for the year ended October 31, 2007, has also issued a report on internal control over financial reporting under Auditing Standard No. 5 of the Public Company Accounting Oversight Board (United States). This report is located on page 83 of this Annual Accountability Report.

Changes in internal control over financial reporting

There have been no changes in CIBC's internal control over financial reporting during the year ended October 31, 2007, that have materially affected, or are reasonably likely to materially affect its internal control over financial reporting.

Financial Reporting Responsibility

The management of Canadian Imperial Bank of Commerce (CIBC) is responsible for the preparation of the Annual Accountability Report, which includes the consolidated financial statements and management's discussion and analysis (MD&A), and for the timeliness and reliability of the information disclosed. The consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles as well as the requirements of the Bank Act (Canada). The MD&A has been prepared in accordance with the requirements of applicable securities laws.

The consolidated financial statements and MD&A, of necessity, contain items that reflect the best estimates and judgments of the expected effects of current events and transactions with appropriate consideration to materiality. All financial information appearing throughout the Annual Accountability Report is consistent with that in the consolidated financial statements.

Management has developed and maintains effective systems, controls and procedures to ensure that information used internally and disclosed externally is reliable and timely. During the past year, we have continued to improve, document and test the design and operating effectiveness of internal control over external financial reporting. The results of our work have been subjected to audit by the shareholders' auditors. As at year-end, we have determined that internal control over financial reporting is effective and CIBC has achieved compliance with the requirements set by the U.S. Securities and Exchange Commission (SEC) under Section 404 of the U.S. Sarbanes-Oxley Act (SOX). In compliance with Section 302 of SOX, CIBC's Chief Executive Officer and Chief Financial Officer provide to the SEC a certification related to CIBC's annual disclosure document in the U.S. (Form 40-F). The same certification is provided to the

Canadian Securities Administrators (CSA) pursuant to Multilateral Instrument 52-109.

The Chief Auditor and his staff review and report on CIBC's internal controls, including computerized information system controls and security, the overall control environment, and accounting and financial controls. The Chief Auditor has full and independent access to the Audit Committee.

The Board of Directors oversees management's responsibilities for financial reporting through the Audit Committee, which is composed of directors who are not officers or employees of CIBC. The Audit Committee reviews CIBC's interim and annual consolidated financial statements and MD&A and recommends them for approval by the Board of Directors. Other key responsibilities of the Audit Committee include monitoring CIBC's system of internal control, monitoring its compliance with legal and regulatory requirements, selecting the shareholders' auditors and reviewing the qualifications, independence and performance of shareholders' auditors and internal auditors.

Ernst & Young LLP, the shareholders' auditors, obtain an understanding of CIBC's internal controls and procedures for financial reporting to plan and conduct such tests and other audit procedures as they consider necessary in the circumstances to express their opinions in the reports that follow. The shareholders' auditors have full and independent access to the Audit Committee to discuss their audit and related matters.

The Office of the Superintendent of Financial Institutions (OSFI), Canada, examines and enquires into the business and affairs of CIBC as deemed necessary to ensure that the provisions of the Bank Act (Canada), having reference to the safety of depositors and creditors of CIBC, are being duly observed and that CIBC is in sound financial condition.

Independent Auditors' Reports to Shareholders

Report on Financial Statements

We have audited the consolidated balance sheets of Canadian Imperial Bank of Commerce (CIBC) as at October 31, 2007 and 2006 and the consolidated statements of operations, changes in shareholders' equity, comprehensive income and cash flows for each of the years in the three year period ended October 31, 2007. These financial statements are the responsibility of CIBC's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of CIBC as at October 31, 2007 and 2006 and the results of its operations and its cash flows for each of the years in the three year period ended October 31, 2007 in conformity with Canadian generally accepted accounting principles.

As explained in Note 1 to the consolidated financial statements, in fiscal 2007, CIBC adopted the requirements of the Canadian Institute of Chartered Accountants Handbook, Section 1530 "Comprehensive Income", Section 3251 "Equity", Section 3855 "Financial Instruments – Recognition and Measurement", Section 3861 "Financial Instruments – Disclosure and Presentation", and Section 3865 "Hedges".

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of CIBC's internal control over financial reporting as of October 31, 2007, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 5, 2007 expressed an unqualified opinion thereon.

Report on Internal Control over Financial Reporting

We have audited Canadian Imperial Bank of Commerce's (CIBC) internal control over financial reporting as at October 31, 2007, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). CIBC's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included on page 79 of this Annual Accountability Report. Our responsibility is to express an opinion on CIBC's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of

records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, CIBC maintained, in all material respects, effective internal control over financial reporting as of October 31, 2007 based on the COSO criteria.

We have also audited, in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of CIBC as at October 31, 2007 and 2006 and the consolidated statements of operations, changes in shareholders' equity, comprehensive income and cash flows for each of the years in the three year period ended October 31, 2007 and our report dated December 5, 2007 expressed an unqualified opinion thereon.

(1) Includes issue of \$331 million Class A Series 29 Preferred Shares (consisting of \$133 million conversion of Class A Series 28 Preferred Shares and \$198 million in cash on exercise of Series 29 Purchase Warrants).

(2) Primarily relates to acquisition of FirstCaribbean International Bank and acquisition of the remaining non-controlling interest in INTRIA Items Inc.

n/a Not applicable. See the "Consolidated balance sheet" for additional details.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1**Summary of Significant Accounting Policies**

Canadian Imperial Bank of Commerce (CIBC), including its subsidiaries prepares its consolidated financial statements in accordance with Canadian generally accepted accounting principles (GAAP).

A reconciliation of the impact on assets, liabilities, shareholders' equity, net income and other comprehensive income (OCI) arising from differences between Canadian and U.S. GAAP is provided in Note 28.

The following paragraphs describe our significant accounting policies, including the changes to our accounting policies effective November 1, 2006, upon the adoption of the CICA handbook sections 3855 "Financial Instruments – Recognition and Measurement", 3865 "Hedges", 1530 "Comprehensive Income", 3251 "Equity", and 3861 "Financial Instruments – Disclosure and Presentation".

Basis of consolidation

The consolidated financial statements include the assets, liabilities, results of operations and cash flows of all subsidiaries and variable interest entities (VIEs) for which we are considered to be the primary beneficiary. A primary beneficiary is the enterprise that absorbs a majority of the VIEs expected losses or receives a majority of the VIEs expected residual returns, or both. Inter-company balances and transactions are eliminated. Non-controlling interests in subsidiaries and consolidated VIEs are included as a separate line item on the consolidated balance sheet and statement of operations.

An entity is a VIE if it does not have sufficient equity at risk to permit it to finance its activities without additional subordinated financial support, or in which equity investors do not have the characteristics of a controlling financial interest. The VIE guidelines also exempt certain entities from its scope including qualified special purpose entities (QSPEs).

Investments in companies over which we have significant influence are accounted for by the equity method, and are included in "Other assets". Our share of earnings from these investments is included in "Non-interest income – other".

Investments over which we exercise joint control are accounted for using the proportionate consolidation method.

Use of estimates and assumptions

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the recognized and measured amounts of assets, liabilities, net income and related disclosures. Estimates and assumptions are made in the areas of accounting for financial instruments, allowance for credit losses, securitizations and VIEs, asset impairment, income taxes, contingent liabilities and employee future benefits. Actual results could differ from these estimates and assumptions.

Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currencies of operations at prevailing exchange rates at the dates of the consolidated balance sheet. Non-monetary assets and liabilities are translated into functional currencies at historical rates. Revenue and expenses are translated using average monthly exchange rates. Realized and unrealized gains and losses arising from translation into functional currencies are included in the consolidated statement of operations.

Assets and liabilities of foreign operations with a functional currency other than the Canadian dollar are translated into Canadian

dollars at the exchange rates prevailing at balance sheet dates, while revenue and expenses of these foreign operations are translated into Canadian dollars at the average monthly exchange rates. Exchange gains and losses arising from the translation of foreign operations and from the results of hedging these positions, net of applicable taxes, are reported in "Foreign currency translation adjustments", which is included in OCI.

A future income tax asset or liability is not recognized in respect of a translation gain or loss arising from an investment in a foreign subsidiary, where the gain or loss is not expected to be realized in the foreseeable future.

An appropriate portion of the accumulated exchange gains and losses and any applicable taxes in AOCI are recognized into income where there is a reduction in the net investment in a foreign operation.

Classification and measurement of financial assets and liabilities

Commencing November 1, 2006, all financial assets must be classified at initial recognition as trading, available-for-sale (AFS), designated at fair value (FVO), held-to-maturity (HTM), or loans and receivables based on the purpose for which the instrument was acquired and its characteristics. Consequently, the investment securities classification previously used is no longer applicable under the new standards. We have not currently designated any financial assets as HTM. Reclassification of financial instruments into and out of trading or FVO is not permitted. In addition, the new standards require that all financial assets and all derivatives be measured at fair value with the exception of loans and receivables, debt securities classified as HTM, and AFS equities that do not have quoted market values in an active market. All financial liabilities are carried at amortized cost other than derivatives, obligations related to securities sold short, or liabilities to which the FVO has been applied, in which case they are carried at fair value. Interest expense is recognized on an accrual basis using the effective interest rate method.

Trading financial instruments

Both prior and subsequent to November 1, 2006, trading financial instruments are assets and liabilities held for trading activities and are measured at fair value as at the balance sheet date. Gains and losses realized on disposition and unrealized gains and losses from changes in fair value are reported in income as "Trading revenue". Dividends and interest earned and interest incurred are included in "Interest income" and "Interest expense", respectively.

**AFS/Investment securities
AFS securities**

Commencing November 1, 2006, all financial instruments previously classified as investment securities were designated as AFS securities. AFS securities also include investments in limited partnerships which were included in "Other assets" prior to November 1, 2006.

Except for equities that do not have quoted market values in an active market, AFS securities are carried at fair value whereby the unrealized gains and losses are included in AOCI until sale or other-than-temporary impairment is recognized, at which point cumulative unrealized gains or losses are transferred to the consolidated statement of operations. Equities that do not have quoted market values in an active market are carried at cost. Realized gains and losses

on sale, determined on an average cost basis, and write-downs to reflect other-than-temporary impairments in value are included in "AFS securities gains, net". Dividends and interest income from these securities are included in "Interest income".

Investment securities

Prior to November 1, 2006, equity securities were stated at cost and debt securities at amortized cost other than mortgage-backed securities created by the securitization of residential mortgages which were stated at fair value. Changes in fair value were recognized in "Non-interest income – other".

Realized gains and losses on disposal, determined on an average cost basis, and write-downs to reflect other-than-temporary impairments in value were included in "Investment securities gains, net". Dividends and interest income, including the amortization of premiums and discounts on debt securities were included in "Interest income". Realized and unrealized gains on securities used in hedging activities were included in earnings in the same period as the earnings from the items hedged.

Commencing November 1, 2006, the investment securities classification is no longer available.

Designated at fair value financial instruments (FVO)

Commencing November 1, 2006, FVO financial assets and financial liabilities are those that an entity designates on initial recognition as instruments that it will measure at fair value on the consolidated balance sheet. In addition to the requirement that reliable fair values are available, there are regulatory restrictions imposed by the Office of the Superintendent of Financial Institutions (OSFI) on the use of this designation.

Gains and losses realized on dispositions, unrealized gains and losses from changes in fair value, and gains and losses arising from changes in fair value of derivatives that are managed in conjunction with FVO financial assets and liabilities are included in "FVO revenue". Dividends and interest earned and interest incurred on FVO assets and liabilities are included in "Interest income" and "Interest expense", respectively.

Loans and receivables

Both prior and subsequent to November 1, 2006, loans and receivables are recorded at amortized cost net of allowance for credit losses. Interest income is recognized on an accrual basis, unless impaired, using the effective interest rate method. See "Impairment of financial assets" below for details on our impairment methodology.

Date of recognition

We account for all financial instruments using settlement date accounting for the consolidated balance sheet. Trade date accounting is used for all financial instruments for the consolidated statement of operations.

Transaction costs

Transaction costs related to trading and FVO financial instruments are expensed as incurred. Transaction costs for all other financial instruments are generally capitalized and are then amortized over the expected life of the instrument using the effective interest rate method. Prior to November 1, 2006, transactions costs associated with certain financial liabilities were expensed as incurred.

Effective interest rate

Interest income and expense for all financial instruments measured at amortized cost and for AFS debt securities is recognized in "Interest income" and "Interest expense" using the effective interest rate method.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appropriate, a shortened period, to the net carrying amount of the financial asset or liability.

Prior to November 1, 2006, transaction costs in excess of deferred fees related to originating or acquiring a loan were recognized within "Other assets" and amortized to interest income over the term of the loan. Subsequent to November 1, 2006, the excess deferred amount is instead classified with the associated loan as part of its amortized cost.

Fees related to loan origination, including commitment, restructuring and renegotiation fees, are considered an integral part of the yield earned on a loan and are accounted for using the effective interest rate method. Fees received for commitments that are not expected to result in a loan are included in non-interest income over the commitment period. Loan syndication fees are included in non-interest income on completion of the syndication arrangement, provided that the yield on the portion of the loan we retain is at least equal to the average yield earned by the other lenders involved in the financing; otherwise, an appropriate portion of the fee is deferred as unearned income and amortized to interest income using the effective interest rate method.

Securities borrowed or purchased under resale agreements and obligations related to securities lent or sold under repurchase agreements

Securities purchased under resale agreements are treated as collateralized lending as they represent the purchase of securities effected with a simultaneous agreement to sell them back at a future date, which is generally near term. Interest income is accrued and separately disclosed in the consolidated statement of operations. Obligations related to securities sold under repurchase agreements are treated as collateralized borrowing and represent the borrowing equivalent of securities purchased under resale agreements. Interest expense is accrued and reflected in "Interest expense – other liabilities".

The right to receive back cash collateral paid and the obligation to return cash collateral received on borrowing and lending of securities is recorded as securities borrowed and securities lent under repurchase agreements, respectively. We monitor the market value of the securities borrowed and lent on a daily basis and call for additional collateral when appropriate. Interest on cash collateral paid and received is recorded in "Interest income" and "Interest expense", respectively.

Impairment of financial assets Impaired loans and allowance for credit losses

We classify a loan as impaired when, in our opinion, there is objective evidence of impairment as a result of one or more events that have occurred with a negative impact on the estimated future cash flows of the loan. Evidence of impairment includes indications that the borrower is experiencing significant financial difficulties, or a default or delinquency has occurred. Generally, loans on which repayment of principal or payment of interest is contractually 90 days in arrears are automatically considered impaired unless they are fully secured and in

the process of collection. Notwithstanding management's assessment of collectibility, such loans are considered impaired if payments are 180 days in arrears. Exceptions are as follows:

- Credit card loans are not classified as impaired but are instead fully written off when payments are contractually 180 days in arrears.
- Loans guaranteed or insured by the Canadian government, the provinces or a Canadian government agency are classified as impaired only when payments are contractually 365 days in arrears.

When a loan is classified as impaired, accrual of interest ceases. All uncollected interest is recorded as part of the loan's carrying value for the purpose of determining the loan's estimated realizable value and establishing allowances for credit losses. A loan is returned to performing status when all past due amounts, including interest and any prior write-off has been recovered, and it is determined that the principal and interest are fully collectible in accordance with the original contractual terms of the loan. No portion of cash received on any impaired loan is recorded as income until the loan is returned to performing status.

An impaired loan is carried at its estimated net realizable value determined by discounting the expected future cash flows at the interest rate inherent in the loan. When the amount and timing of future cash flows cannot be estimated reliably, the loan is carried at either the fair value of the security underlying the loan or the fair value of the loan.

We establish and maintain an allowance for credit losses that we consider the best estimate of probable credit-related losses existing in our portfolio of on- and off-balance sheet financial instruments, giving due regard to current conditions. The allowance for credit losses consists of specific and general components.

Loans are written off against the related allowance for credit losses if there is no realistic prospect of future recovery and all collateral has been realized or transferred to CIBC. In subsequent periods, any recoveries of amounts previously written off are credited to the allowance for credit losses.

Specific allowance

We conduct ongoing credit assessments of the business and government loan portfolio on an account-by-account basis and establish specific allowances when impaired loans are identified. Residential mortgages, personal and credit card loans, and certain small business loan portfolios consist of large numbers of homogeneous balances of relatively small amounts, for which specific allowances are established by reference to historical ratios of write-offs to balances in arrears and to balances outstanding.

General allowance

The general allowance is provided for losses which we estimate are inherent in the portfolio at the balance sheet date, but not yet identified and, therefore, not yet captured in the determination of specific allowances. It applies to on- and off-balance sheet credit exposures that are not carried at fair value.

The general allowance is established with reference to expected loss rates associated with different credit portfolios at different risk levels and the estimated time period for losses that are present but yet to be specifically identified, adjusting for our view of the current and ongoing economic and portfolio trends. The parameters that affect the general allowance calculation are updated regularly, based on our experience and that of the market in general.

Expected loss rates for business loan portfolios are based on the risk rating of each credit facility and on the probability of default factors associated with each risk rating, as well as estimates of loss given default. The probability of default factors reflects our historical experience over an economic cycle, and is supplemented by data derived from defaults in the public debt markets. Loss given default estimates are based on our experience over past years. For consumer loan portfolios, expected losses are based on our historical loss rates and aggregate balances.

Other-than-temporary impairment for securities

We conduct a quarterly review to identify and evaluate securities (both debt and equity) that show objective indications of possible impairment. An impairment is charged to income if the fair value of a security falls below its cost/amortized cost, and the decline is considered other-than-temporary. Factors considered in determining whether a loss is other-than-temporary include the length of time and extent to which fair value has been below cost; financial condition and near-term prospects of the issuer; and our ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery.

Securitizations

Securitizations are accounted for as sales when we surrender control of the transferred assets and receive consideration other than beneficial interests in the transferred assets. When such sales occur, we may retain interest-only strips, one or more subordinated tranches and, in some cases, a cash reserve account, all of which are considered retained interests in the securitized assets.

Gains or losses on securitizations accounted for as sales are recognized in "Income from securitized assets". The amount of the gain or loss recognized depends on the previous carrying values of the receivables involved in the transfer, allocated between the assets sold and retained interests based on their relative fair values at the date of transfer. As market prices are generally not available for retained interests, we estimate fair value based on the present value of expected future cash flows. This requires us to estimate credit losses, rate of prepayments, forward yield curves, discount rates, and other factors that influence the value of retained interests.

Prior to November 1, 2006, retained interests in securitized assets were classified as investment securities and stated at amortized cost. Commencing November 1, 2006, retained interests are classified as AFS securities. Retained interests are reviewed for impairment on a quarterly basis.

Income from securitized assets comprises income from retained interests and servicing income, and is reported separately in the consolidated statement of operations.

Derivatives held for trading purposes

Our derivative trading activities are primarily driven by client trading activities. We also take limited proprietary trading positions in the interest rate, foreign exchange, debt, equity and commodity markets, with the objective of earning income.

All financial and commodity derivatives held for trading purposes are stated at fair value at the balance sheet date both before and after the adoption of the new financial instrument standards that were adopted on November 1, 2006. Realized and unrealized trading gains and losses are included in "Trading revenue". Derivatives with positive fair value are reported as assets, while derivatives with negative

fair value are reported as liabilities, in both cases as “Derivative instruments”.

Derivatives held for asset/liability management (ALM) purposes

We use derivative instruments for ALM purposes to manage financial risks, such as movements in interest and foreign exchange rates.

Derivatives that qualify for hedge accounting

We apply hedge accounting for derivatives held for ALM purposes that meet the criteria specified in the CICA handbook section 3865 (commencing November 1, 2006) and the CICA Accounting Guideline (AcG) 13 (prior to November 1, 2006). There are three types of hedge accounting: fair value, cash flow and hedges of net investments in self-sustaining foreign operations (NIFO). When hedge accounting is not applied, the change in the fair value of the derivative is always recognized in income. This includes instruments used for economic hedging purposes such as seller swaps that do not meet the requirements for hedge accounting.

In order for derivatives to qualify for hedge accounting, the hedge relationship must be designated and formally documented at its inception in accordance with the CICA handbook section 3865 or AcG-13. The particular risk management objective and strategy, the specific asset, liability or cash flow being hedged, as well as how hedge effectiveness is assessed is documented. Hedge effectiveness requires a high correlation of changes in fair values or cash flows between the hedged and hedging items.

We assess the effectiveness of derivatives in hedging relationships, both at inception and on an ongoing basis. Ineffectiveness results to the extent that the changes in the fair value of the hedging derivative differ from changes in the fair value of the hedged risk in the hedged item; or the cumulative change in the fair value of the hedging derivative differs from the cumulative change in the fair value of expected future cash flows of the hedged item. Commencing November 1, 2006, the amount of ineffectiveness of hedging instruments is recorded immediately in income. Prior to November 1, 2006, the ineffectiveness was only recognized over time or upon the termination of the hedge.

Hedge accounting commencing November 1, 2006

Derivatives are carried at fair value and are reported as assets where they have a positive fair value and as liabilities where they have a negative fair value, in both cases as “Derivative instruments”.

Fair value hedges

We designate fair value hedges primarily as part of interest rate risk management strategies that use derivatives to hedge changes in the fair value of financial instruments with fixed interest rates. Changes in fair value attributed to the hedged risk are accounted for as *basis adjustments* to the hedged financial instruments and are recognized in “Net interest income”. Changes in fair value from the hedging derivatives are also recognized in “Net interest income”. Accordingly, any hedge ineffectiveness, representing the difference between changes in fair value of the hedging derivative and changes in the basis adjustment to the hedged item, is also recognized in “Net interest income”.

Similarly, for foreign exchange hedges, changes in fair value from the hedging derivatives and non-derivatives are recognized in “Foreign exchange other than trading (FXOTT)”. Changes in fair value of the

hedged item from the hedged foreign exchange risk are accounted for as basis adjustments and are also recognized in “FXOTT”.

If the hedging instrument expires or is sold, terminated or exercised, or where the hedge no longer meets the criteria for hedge accounting, the hedge relationship is terminated and the basis adjustment applied to the hedged item is then amortized over the remaining term of the original hedge. If the hedged item is sold, the unamortized basis adjustment is recognized immediately in income.

Cash flow hedges

We designate cash flow hedges primarily as part of interest rate risk management strategies that use derivatives and other financial instruments to mitigate our risk from variable cash flows by effectively converting certain variable rate financial instruments to fixed rate financial instruments and for hedging forecasted foreign currency denominated cash flows.

The effective portion of the change in fair value of the derivative instrument is offset through OCI until the variability in cash flows being hedged is recognized in income in future accounting periods, at which time an appropriate portion of the amount that was in the AOCI is reclassified into income. The ineffective portion of the change in fair value of the hedging derivative is recognized either in “Net interest income” or in “FXOTT” immediately as it arises. If the hedging instrument expires or is sold, terminated or exercised, or where the hedge no longer meets the criteria for hedge accounting, the hedge relationship is terminated and any remaining amount in AOCI remains therein until it is recognized in income when the variability in cash flows hedged or the hedged forecast transaction is ultimately recognized in income. When the forecasted transaction is no longer expected to occur, the related cumulative gain or loss in AOCI is immediately recognized in income.

Transition adjustment

Upon the adoption of the new standards we re-established various hedging relationships pursuant to which certain deferred hedge balances have been included as a basis adjustment to the hedged item for fair value hedges and as an adjustment to AOCI for cash flow hedges. The accumulated ineffectiveness related to these hedges has been recognized in retained earnings together with deferred hedge balances related to hedging relationships that have not been continued or would not qualify for hedge effectiveness under the new standards.

Hedges of net investments in self-sustaining foreign operations (NIFO)

We designate NIFO hedges to mitigate the foreign exchange risk on our investments in self sustaining operations.

These hedges are accounted for in a similar manner to cash flow hedges. The effective portion of the changes in fair value of the hedging derivative instruments based on changes in spot rates is included in OCI until reduction in the net investment at which time any gains or losses in AOCI are recognized in “FXOTT”. The ineffective portion of the change in fair value of the hedging derivative is recognized immediately in “FXOTT”.

Hedge accounting prior to November 1, 2006

Derivative instruments designated within effective hedge relationships were generally included at their accrued values in “Other assets” or “Other liabilities”.

For interest rate swaps, hedge accounting treatment generally resulted in interest income or expense on non-trading assets and liabilities being reflected in the consolidated statement of operations at their hedged rates rather than their original contractual interest rates.

Certain deposits, whose values are determined based on an underlying non-equity based index or asset, were accounted for on a modified accrual basis. Under this method, the carrying value of these deposits was adjusted to reflect changes in the current value of the underlying index or asset, subject to a minimum guaranteed redemption value, if any. These adjustments were recorded as "Interest expense". Derivatives that hedged the fair value of these deposits were carried at fair value. Amounts arising from these derivatives were deferred and recognized in "Interest expense" to offset changes in the carrying value of those deposits.

Foreign currency derivative instruments that hedge foreign currency exposures arising from foreign currency denominated assets and liabilities were revalued together with the hedged item each month, using the spot foreign exchange rate. Resulting gains and losses were recognized as "FXOTT".

Foreign currency forward contracts that hedge NIFO were revalued each month, using the spot foreign exchange rate. Resulting gains and losses, net of applicable taxes, were recognized in "Foreign currency translation adjustments". Any premium or discount resulting from differences between the contracted forward and spot foreign exchange rates due to interest rate differentials was amortized in "FXOTT".

Realized and unrealized gains and losses on derivative instruments used to hedge firm commitments or anticipated transactions were deferred and recognized as income when the committed or anticipated transactions occurred.

Premiums paid for options used for hedging purposes were generally amortized over the life of the contract or the term of the hedge, as appropriate.

If a hedge relationship was terminated, any difference between the fair value and the carrying value of the hedging derivatives upon termination was deferred in "Other assets" or "Other liabilities". The deferred amount was recognized into income or expense on the same basis as income and expense of the previously hedged item, generally by amortization over the remaining term of the hedged asset or liability.

Derivatives that do not qualify for hedge accounting

Commencing November 1, 2006, the change in fair value of derivatives not designated as accounting hedges but used to economically hedge FVO assets or liabilities is included in "FVO revenue". Both before and after November 1, 2006, the change in fair value of other derivatives not designated as accounting hedges but used for other economic hedging purposes is included in either "FXOTT" or "Non-interest income – other".

Embedded derivatives

Commencing November 1, 2006, all derivatives embedded in other financial instruments are valued as separate derivatives when their economic characteristics and risks are not clearly and closely related to those of the host contract; the terms of the embedded derivative are the same as those of a free standing derivative; and the combined contract is not held for trading or designated at fair value. These embedded derivatives are classified together with the host instrument and measured at fair value with changes therein recognized in the

consolidated statement of operations. We elected to apply this accounting treatment to all host contracts containing such embedded derivatives at November 1, 2006.

Prior to November 1, 2006, we only recognized embedded derivatives on equity-linked GICs or equity-linked notes deposit obligations. Both before and after November 1, 2006, the embedded derivative is measured at fair value with changes in fair value recorded in "Non-interest income – other". The discounted deposit instrument is accreted on an effective interest rate basis to par principal value at maturity with the expense recorded in "Interest expense".

Gains at inception on derivatives embedded in financial instruments bifurcated for accounting purposes are not recognized at inception, instead they are amortized over the life of the hybrid instrument.

Mortgage commitments

Mortgage interest rate commitments are extended to our retail clients at no charge in contemplation of borrowing to finance the purchase of homes under mortgages to be funded by CIBC in the future. These commitments are usually for periods of up to 90 days and generally entitle the borrower to receive funding at the lower of the interest rate at the time of the commitment and the rate applicable at funding date. We use financial instruments, such as interest rate derivatives, to economically hedge our exposure to an increase in interest rates. Both before and after November 1, 2006, we present our liability to the retail clients (based on an estimate of the commitments expected to be exercised) and the associated economic hedges at fair value on the consolidated balance sheet. Changes in fair value are recorded in "Non-interest income – other". In addition, as the commitments are an integral part of the mortgage, their initial fair value is recognized over the life of the resulting mortgages.

Prior to November 1, 2006, the fair value of the mortgage commitment upon funding, if any, was recognized over the life of the mortgage. Subsequent to November 1, 2006, the fair value of the mortgage commitment upon funding, if any, is released into income to offset the difference between the mortgage amount advanced and its fair value.

Guarantees

Guarantees include contracts that contingently require the guarantor to make payments to a guaranteed party based on (a) changes in an underlying economic characteristic that is related to an asset, liability or an equity security of the guaranteed party; (b) failure of another party to perform under an obligating agreement; or (c) failure of a third-party to pay its indebtedness when due.

Guarantees are initially recognized at fair value, being the premium received, on the date the guarantee was given. No subsequent remeasurement of fair value is required unless the guarantee qualifies as a derivative, upon which it is remeasured at fair value and included in "Derivative instruments" in assets or liabilities, as appropriate.

Accumulated other comprehensive income (AOCI)

Commencing November 1, 2006, AOCI is included on the consolidated balance sheet as a separate component (net of tax) of shareholders' equity, and includes net unrealized gains and losses on AFS securities, the effective portion of gains and losses on derivative instruments designated within effective cash flow hedges, and unrealized foreign currency translation gains and losses on self-sustaining foreign operations net of gains or losses on related hedges ("foreign currency

translation adjustments"). Prior years' "Foreign currency translation adjustments" have been reclassified to AOCI.

Liabilities and equity

Preferred shares that are convertible into a variable number of common shares at the option of the holder are classified as liabilities on the consolidated balance sheet. Dividend payments and premium on redemptions arising from such preferred shares are reported as "Interest expense".

Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are presented net when we have a legally enforceable right to set off the recognized amounts and intend to settle on a net basis or to realize the asset and settle the liability simultaneously.

Acceptances and customers' liability under acceptances

Acceptances constitute a liability of CIBC on negotiable instruments issued to third parties by our customers. We earn a fee for guaranteeing and then making the payment to the third parties. The amounts owed to us by our customers in respect of these guaranteed amounts are reflected in assets as "Customers' liability under acceptances".

Land, buildings and equipment

Land is reported at cost. Buildings, furniture, equipment and leasehold improvements are reported at cost less accumulated amortization.

Amortization is recorded on a straight-line basis as follows:

- Buildings 40 years
- Computer equipment and software 2 to 10 years
- Office furniture and other equipment 4 to 15 years
- Leasehold improvements Over estimated useful life

Gains and losses on disposal are reported in "Non-interest income – other".

Goodwill and other intangible assets

We use the purchase method of accounting for all business combinations. Identifiable intangible assets are recognized separately from goodwill and included in other intangible assets. Goodwill represents the excess of the purchase price over the fair value of the net tangible and other intangible assets acquired in business combinations. Goodwill is allocated to the reporting unit that is expected to benefit from the synergies of the business combination. Reporting units comprise business operations with similar economic characteristics and strategies. Goodwill and other intangible assets with an indefinite life are not amortized but are subjected to impairment review at least annually and, if impaired, are written down to fair value.

The impairment test for goodwill is based on a comparison of the carrying amount of the reporting unit, including the allocated goodwill, with its fair value. When the carrying amount of a reporting unit exceeds its fair value, any impairment of goodwill is measured by comparing the carrying value of the goodwill with its implied fair value. The implied fair value of goodwill is the excess of the fair value of the reporting unit over the fair value of its net tangible and other intangible assets.

The impairment test for other intangible assets with an indefinite life is based on a comparison of its carrying amount with its fair value.

Other intangible assets with a definite life are amortized over their estimated useful lives, generally not exceeding 20 years, and are also subjected to an assessment for impairment periodically.

Future income taxes

We use the asset and liability method to provide for income taxes. The asset and liability method requires that income taxes reflect the expected future tax effect of temporary differences between the carrying amounts of assets or liabilities and their tax bases. Future income tax assets and liabilities are determined for each temporary difference and for unused losses for tax purposes, as applicable, at rates expected to be in effect when the asset is realized or the liability is settled. A valuation allowance is established, if necessary, to reduce the future income tax asset to an amount that is more likely than not to be realized.

Employee future benefits

We are the sponsor of a number of employee benefit plans. These plans include both defined benefit and defined contribution pension plans, and various other post-retirement and post-employment benefit plans.

Defined benefit plans

We accrue our obligations for defined benefit plans and related costs, net of plan assets. The cost of pensions and other post-retirement benefits earned by employees is actuarially determined using the projected benefit method prorated on service and our best estimate of expected return on plan assets, salary escalation, retirement ages of employees, mortality, and expected health-care costs. The discount rate used to value liabilities is based on market rates as at the measurement date.

The expected return on plan assets is based on our best estimate of the long-term expected rate of return on plan assets and a market-related value of plan assets. The market-related value of plan assets is determined using a methodology where the difference between the actual and expected market value of plan assets is recognized over three years.

Past service costs from plan amendments are amortized on a straight-line basis over the expected average remaining service period over which employees become fully eligible for benefits, since it is expected that we will realize economic benefit from these plan changes during this period.

Net actuarial gains and losses that exceed 10% of the greater of the accrued benefit obligation or the market-related value of plan assets are also amortized on a straight-line basis over the expected average remaining service life of covered employees. Experience will often deviate from the actuarial assumptions resulting in actuarial gains or losses.

The expected average remaining service life of employees covered by the defined benefit pension plans is 10 years (2006: 10 years). The expected average remaining service life of employees covered by the other benefit plans is 12 years (2006: 12 years).

The accrued benefit asset or liability represents the cumulative difference between the expense and funding contributions and is included in "Other assets" and "Other liabilities".

A valuation allowance is recognized when the accrued benefit asset for any plan is greater than the future economic benefit expected to be realized from sponsoring the plan. A change in the valuation allowance is recognized in the consolidated statement of operations for the period in which the change occurs.

When the restructuring of a defined benefit plan gives rise to both a curtailment and a settlement of obligations, the curtailment is accounted for prior to the settlement.

Defined contribution plans

Costs for defined contribution plans are recognized during the year in which the service is provided.

Stock-based compensation

We provide compensation to directors and certain employees in the form of stock options and/or share-based awards.

We use the fair value-based method to account for stock options granted to employees. The value is recognized over the applicable vesting period, or to the eligible retirement age of the employee if sooner, as an increase to compensation expense and contributed surplus. When the options are exercised, the proceeds we receive, together with the amount in contributed surplus, are credited to common share capital. No expense was recognized for stock options granted prior to November 1, 2001; when these options are exercised, the proceeds received are recorded as common share capital.

Up to 50% of options relating to the Employee Stock Option Plan granted prior to 2000 can be exercised as stock appreciation rights (SARs). SARs obligations, which arise from changes in the market price of CIBC's common shares, are recorded in the consolidated statement of operations with a corresponding offset in other liabilities. If SARs are exercised as purchases of shares, the exercise price, together with the relevant amount in other liabilities, representing the value of shares at the market price, is credited to common share capital.

Compensation expense in respect of share-based awards under the Restricted Share Program which meet certain criteria, is recognized in the year for which the grant is made, in an amount equal to the total to be transferred to the trust in respect of the current year allocations. Compensation expense in respect of special grants is recognized over the applicable vesting period, or to the eligible retirement age of the employee if sooner. In the event of forfeitures of unvested grants, any market gains or losses arising from the forfeiture event are recorded in contributed surplus.

Compensation expense in respect of awards under the Performance Share Unit (PSU) program which meet certain criteria are recognized in the year for which the grant is made. The amount recognized is based on management's best estimate of the expected number of PSUs to vest.

Amounts paid under the directors' plans are charged to compensation expense. Obligations relating to deferred share units under the directors' plans change with CIBC's common share price, and the change is recognized as a compensation expense or credit in the year in which the change occurs.

Our contribution under the Employee Share Purchase Plan (ESPP) is expensed as incurred.

Fee and commission income

Underwriting and advisory fees and commissions on securities transactions are recognized as revenue when the related services are performed. Deposit and payment fees and insurance fees are recognized over the period that the related services are provided.

Card fees primarily include interchange income, late fees, cash advance fees, and annual fees. Card fees are recognized as billed, except for annual fees which are earned over a 12-month period.

Investment management and custodial fees are primarily investment, estate and trust management fees and are recorded on an accrual basis. Prepaid fees are deferred and amortized over the contract term.

Mutual fund fees are recorded on an accrual basis.

Earnings per share

Basic earnings per share (EPS) is determined as net income minus dividends and premiums on preferred shares, divided by the weighted-average number of common shares outstanding for the period.

Diluted EPS is determined as net income minus dividends and premiums on preferred shares, divided by the weighted-average number of diluted common shares outstanding for the period. Diluted common shares reflect the potential dilutive effect of exercising the stock options based on the treasury stock method. The treasury stock method determines the number of incremental common shares by assuming that the average outstanding stock options, whose exercise price is less than the average market price of CIBC's common stock during the period, are exercised and then reduced by the number of common shares assumed to be repurchased with the exercise proceeds. Year-to-date incremental common shares are computed by taking a weighted-average of the number of incremental common shares included in each interim period.

Impact of accounting changes

As required, the adoption of the CICA handbook sections 3855 "Financial Instruments – Recognition and Measurement", 3865 "Hedges", 1530 "Comprehensive Income", and 3251 "Equity" as described above have been applied as an adjustment to opening retained earnings and AOCI as at November 1, 2006. Prior period balances have not been restated other than the reclassification of "Foreign currency translation adjustments" to AOCI. The impact of adopting these standards was as follows:

\$ millions	As at Oct. 31, 2006	Adjustment upon adoption of new standards	As at Nov. 1, 2006
ASSETS			
Securities			
Investment	\$ 21,167	\$ (21,167)	\$ –
AFS	–	16,006	16,006
Trading	62,331	(552)	61,779
FVO	–	6,340	6,340
	83,498	627	84,125
Loans	145,625	136	145,761
Derivative instruments	17,122	1,585	18,707
Other assets	10,957	(1,701)	9,256
Impact on total assets	\$ 257,202	\$ 647	\$ 257,849
LIABILITIES AND SHAREHOLDERS' EQUITY			
Deposits	\$ 202,891	\$ (44)	\$ 202,847
Derivative instruments	17,330	1,565	18,895
Other liabilities	14,716	(947)	13,769
Impact on total liabilities	234,937	574	235,511
Shareholders' equity			
Retained earnings	7,268	(50)	7,218
Accumulated other comprehensive income			
Foreign currency translation adjustments	(442)	–	(442)
Unrealized gains (losses) on AFS securities	–	(29)	(29)
Gains (losses) on cash flow hedges	–	152	152
Impact on shareholders' equity	6,826	73	6,899
Impact on liabilities and shareholders' equity	\$ 241,763	\$ 647	\$ 242,410

The \$16,006 million of financial assets classified as AFS included \$15,429 million (AFS value \$15,391 million) and \$615 million (AFS value \$615 million) of financial assets previously classified as investment securities and other assets, respectively. The \$6,340 million of FVO securities included \$5,738 million (fair value \$5,799 million) and \$541 million (fair value \$541 million) of financial assets previously classified as investment securities and trading securities, respectively.

The overall impact to net income from the adoption of the new standards for the year was not significant and included the recognition of the hedge ineffectiveness disclosed in Note 15. However, there were various reclassifications within our consolidated statement of operations, including the recognition of amounts within "FVO revenue" and "AFS securities gains, net" that were previously

recognized in "Trading revenue" and "Investment securities gains, net", respectively.

Prior year financial information

During the year, we revisited our presentation of certain revenue and expense items for prior periods to better reflect the nature of these items. Accordingly, certain prior year financial information has been reclassified to conform with the presentation adopted in the current year.

Future accounting policy changes

A description of future Canadian accounting policy changes is provided in Note 29. A description of future U.S. accounting policy changes is provided in Note 28.

Note 2

Fair Value of Financial Instruments

The tables that follow present the fair value of both on- and off-balance sheet financial instruments, based on the fair valuation approach set out below.

Fair value represents our estimate of the price at which a financial instrument could be exchanged in an orderly market as an arm's length transaction between knowledgeable and willing parties, under no compulsion to act. Fair value is best evidenced by an independent quoted market price in an active market.

Where quoted markets exist and are considered active, these quoted prices are used to calculate fair value. Commencing November 1, 2006, bid or ask prices, where available in an active market, are used to determine the fair value of security positions as appropriate, whereas closing price was previously used for securities in an active market.

Quoted market prices are not available for a significant portion of our on- and off-balance sheet financial instruments because of the lack of traded markets and even where such markets do exist, they may not be considered sufficiently active to be used as a basis for fair value.

In those instances where traded markets do not exist or are not considered sufficiently active, our measure of fair value is estimated, using a variety of valuation techniques and models which require assumptions regarding the amount and timing of estimated future cash flows and discount rates. In determining those assumptions, we use observable market parameters such as interest and currency rates and price volatility wherever possible. We also consider the change in credit quality where we are exposed to the credit risk of an issuer, borrower or counterparty. Where we use models based on estimated cashflows or other input parameters, our overriding objective is to use the information to estimate the fair value at which market participants would transact.

Valuation adjustments are an integral component of our fair valuation process. To the extent necessary, we make valuation adjustments for market risks for derivatives and non derivatives and for counterparty credit risk and administration cost for derivatives.

Due to the judgment used in applying a wide variety of acceptable valuation techniques and models, as well as the use of estimates

inherent in this process, estimates of fair value of the same or similar assets may differ among financial institutions. The calculation of fair values is based on market conditions as at October 31, 2007, and may not be reflective of ultimate realizable value.

We have an ongoing process of enhancing our valuation techniques and models. Where enhancements are made, they are applied prospectively, so that fair values reported in prior periods are not recalculated on the new basis.

Methods and assumptions

Financial instruments with fair value equal to book value

Where we consider any difference between fair and book values of on-balance sheet financial instruments to be insignificant, the fair value of these on-balance sheet financial instruments is assumed to equal their book value. These categories are: cash and non-interest-bearing deposits with banks; short-term interest-bearing deposits with banks; securities borrowed or purchased under resale agreements; customers' liability under acceptances; acceptances; obligations related to securities lent or sold under repurchase agreements and other liabilities.

Securities

The fair value of securities and obligations related to securities sold short are based on quoted bid or ask market prices where available; otherwise, fair values are estimated using independent bid or ask quoted market prices for similar securities or other third-party evidence, as available.

The quoted market price used to value publicly traded AFS/Investment equity securities does not take into account any adjustments for resale restrictions that expire within one year or for future expenses.

For privately issued debt and equity securities, we estimate fair value using recent market transactions, where available. Otherwise, fair values are derived from valuation models using a market, or income approach. These models consider various factors including projected cash flows, earnings, revenue or other third-party evidence as available. The fair value of limited partnership investments is based upon net asset values published by third-party fund managers and is adjusted for more recent information where available and appropriate.

Loans

The fair value of variable-rate mortgages, which are largely prime rate based, are assumed to equal their book value. The fair value of fixed-rate mortgages are estimated, using a discounted cash flow calculation that uses market interest rates currently charged for mortgages with similar remaining terms. The valuation model used for mortgages takes into account prepayment optionality including consumer behaviour.

The fair value of variable-rate loans and those that reprice frequently are assumed to be equal to their book value. The fair value for fixed-rate loans is estimated, using a discounted cash flow calculation that uses market interest rates currently charged for loans with similar terms and credit risks. The fair value of loans is reduced by the specific and general allowances for impaired loans and loans not yet specifically identified as impaired. The fair value of loans is not adjusted for the value of any credit derivatives used to manage the credit risk associated with them. The fair value of these credit derivatives is disclosed separately.

Other assets

Other assets mainly comprise accrued interest receivable, brokers' client accounts, equity-accounted investments, limited partnerships (in 2006 only as they were reclassified to AFS securities in 2007, as indicated in Note 1) and accounts receivable.

Except as noted, the fair value of all other assets is assumed to be cost or amortized cost because we consider any difference not to be significant. For equity-accounted investments, we estimate fair value using quoted market prices or other recent market transactions, where available. Otherwise, fair value is derived from valuation models, except for instances where the benefits of estimating fair value for unquoted equity-accounted investments do not outweigh the related costs, then fair value is assumed to equal book value.

Deposits

The fair value of floating-rate deposits and demand deposits are assumed to be equal to their amortized cost. The fair value of fixed-rate deposits are determined by discounting the contractual cash flows using market interest rates currently offered for deposits of similar terms. The fair value for deposit liabilities with embedded optionality (cashable option) includes the fair value of those options. The fair value for equity and commodity linked notes includes the fair value of embedded equity and commodity options.

Subordinated indebtedness

The fair value is determined by reference to market prices for the same or similar debt instruments.

Preferred share liabilities

The fair value of these obligations is determined by reference to market prices for the same or similar financial instruments.

Derivative instruments

The fair value of derivatives is based on quoted market prices or dealer quotes, where available. Otherwise, a suitable market proxy or fair value is estimated on the basis of pricing models that incorporate current market measures for interest rates, currency exchange rates, equity prices and indices, credit spreads, corresponding market volatility levels and other market-based pricing factors.

Fair value reflects a valuation adjustment for market, model and credit risks, as well as administrative costs, as appropriate. Specifically, credit risk adjustments are based on current and expected future credit exposure taking into account both collateral and netting arrangements. Administrative cost adjustments reflect the expected future costs to maintain the derivative to maturity.

Mortgage commitments

The fair value of mortgage commitments, included in derivatives held for ALM, is for fixed-rate residential and commercial mortgage commitments and is based on changes in market interest rates between the commitment and the balance sheet dates. The valuation model takes into account the expected probability that outstanding commitments will be exercised.

Credit commitments

Other commitments to extend credit are primarily variable rate and, consequently, do not expose CIBC to interest rate risk, although they do expose CIBC to credit risk. These commitments generally contain provisions whereby drawn credit commitments are priced based on the credit quality of the obligor at the date funds are drawn. As noted

above, the credit exposure on loan commitments is included in our assessment of the specific and general allowances and, hence, no further adjustments are made.

Valuation technique – non-market observable inputs

We have determined that in situations where key market data for our positions is not observable, sensitivity analysis is not meaningful.

The total loss recognized in the consolidated financial statements on the financial instruments outstanding as at the balance sheet date, whose fair value was estimated using a valuation technique requiring unobservable market parameters, was \$774 million.

Significant events

Collateralized debt obligations (CDOs) and other positions based on U.S. residential mortgage-backed securities do not currently have readily observable fair values in an active market. We estimated these fair values based on all available data including internal models, indicative broker quotes and proxy index levels. This exercise involved

the application of significant judgment. As at October 31, 2007, our gross unhedged notional exposure to U.S. residential mortgages of approximately US\$1.6 billion was written down to an estimated fair value of US\$784 million (\$741 million). These positions were included in valuation technique – non-market observable inputs.

The use of management judgment in the valuation of certain derivatives, including credit default swaps that reference the U.S. residential mortgage market, increased considerably during the second half of 2007, as market conditions severely limited the availability of quoted market prices that may otherwise have been available.

Canadian market asset-backed commercial paper (ABCP) issued by our sponsored conduits of \$3.1 billion were valued at par. Canadian market non-bank issued ABCP with a par value of \$358 million were valued at \$297 million using models and assumptions incorporating all available data. These non-bank issued ABCP were included in valuation technique – non-market observable inputs.

	\$ 17,486	\$ 17,452	\$ 34	\$ 18,419	\$ 18,066	\$ 353

(1) Includes positive and negative fair values of \$1.9 billion (2006: \$1.5 billion) and \$1.7 billion (2006: \$1.6 billion), respectively, for exchange traded options.

(2) Comprises swaps and options.

(3) Comprises forwards, swaps and options.

(4) Derivative instruments held for trading and ALM derivative instruments carried at fair value (included in footnote 5 below) are reported as derivative instruments on the consolidated balance sheet.

(5) Prior to 2007, only ALM derivatives carried at fair value were included in derivative instruments. These derivative instruments were carried at fair value because they were ineligible for hedge accounting under ACG-13. Since these derivative instruments mitigate market risks, we consider them to be economic hedges for the corresponding risks of underlying positions. In addition, this category includes derivatives, such as seller swaps, whose risks are managed in the context of ALM activities. Derivatives held for ALM purposes as at October 31, 2006, included positive and negative fair values of \$318 million and \$439 million, respectively, in respect of derivative instruments held for economic hedging purposes. Commencing 2007, all derivatives are included in derivative instruments at fair value.

(6) Reported as guarantees in Note 24.

(7) Average fair value represents monthly averages.

Note 3**Acquisition of FirstCaribbean International Bank and Future Disposition****FirstCaribbean International Bank****Step 1 Acquisition**

On December 22, 2006, we obtained control of FirstCaribbean International Bank (FirstCaribbean) by acquiring 90% of Barclays Bank PLC's (Barclays) interest in FirstCaribbean, which represented a further 39.3% ownership interest. As a result of this transaction ("the Step 1 Acquisition"), we owned approximately 83.0% of the common shares of FirstCaribbean with the remaining common shares held by both Barclays and other minority shareholders. The common shares were acquired at US\$1.62 each plus accrued dividends for total cash consideration of US\$989 million (\$1,153 million) paid to Barclays. In addition, we incurred transaction costs, net of tax, of US\$7 million (\$8 million).

Step 2 Acquisition

On February 2, 2007, pursuant to a tender offer at the same price for the remaining common shares held by Barclays and the other

minority shareholders, we acquired an additional 8.5% interest in FirstCaribbean ("the Step 2 Acquisition") in exchange for additional cash consideration of US\$212 million (\$250 million), bringing our total ownership to 91.5%. In addition, we incurred additional transaction costs, net of tax, of US\$2 million (\$2 million).

The Step 1 Acquisition and the Step 2 Acquisition transactions have been accounted for using the purchase method. The results of FirstCaribbean's operations have been included within CIBC Retail Markets strategic business line in the consolidated financial statements since December 22, 2006. Prior to that date, we accounted for our 43.7% interest in FirstCaribbean using the equity method of accounting.

The allocation of the purchase equation was finalized in the third quarter of 2007. Details of the aggregate consideration given and the fair value of net assets acquired are as follows:

\$ millions	Step 1 Acquisition	Step 2 Acquisition	Closing adjustments	Total
Aggregate consideration				
Purchase consideration (paid in cash)	\$ 1,153	\$ 250	\$ –	\$ 1,403
Transaction costs, net of tax	8	2	–	10
Carrying value of equity investment in FirstCaribbean prior to acquisition	840	–	–	840
	\$ 2,001	\$ 252	\$ –	\$ 2,253
Fair value of net assets acquired				
Cash and deposits with banks	\$ 3,107	\$ –	\$ –	\$ 3,107
Securities	3,934	–	8	3,942
Loans	6,667	–	(27)	6,640
Goodwill	958	84	19	1,061
Other intangible assets	267	45	(6)	306
Other assets	876	8	–	884
Total assets acquired	15,809	137	(6)	15,940
Deposits	10,921	–	–	10,921
Other liabilities	2,386	4	(6)	2,384
Subordinated indebtedness	232	–	–	232
Non-controlling interest	269	(119)	–	150
Total liabilities assumed	13,808	(115)	(6)	13,687
Net assets acquired	\$ 2,001	\$ 252	\$ –	\$ 2,253

Subsequent to the Step 2 Acquisition transaction, the total other intangible assets acquired include a core deposit intangible of \$282 million and the FirstCaribbean brandname of \$24 million. The core deposit intangible is amortized at 12% per annum using the declining balance method, while the brand has an indefinite life and is not amortized.

Goodwill recognized as part of the acquisition is not deductible for tax purposes.

As a result of subsequent transactions, including the sale of two million shares of our holding to FirstCaribbean's compensation trusts, our ownership interest as at October 31, 2007 declined to 91.4%.

Proposed sale of some of our U.S. businesses

On November 2, 2007, we signed an agreement to sell our U.S. based investment banking, equities, leveraged finance and related debt capital markets businesses, our Israeli investment banking and

equities businesses, and certain of our other U.S. capital markets-related businesses located in the U.K. and Asia (the "transferred businesses") to Oppenheimer Holdings Inc. (Oppenheimer). In consideration, Oppenheimer will provide us warrants for 1 million shares exercisable at the end of five years, and will pay us a deferred purchase price of at least US\$25 million at the end of five years based on the earnings of the transferred businesses. We will provide indemnities in respect of certain costs that Oppenheimer may incur in integrating the transferred businesses.

CIBC restricted share awards (RSAs) held by employees transferred to Oppenheimer will continue to vest in accordance with their original terms. To support this compensation arrangement, Oppenheimer will reimburse CIBC for the cost of these RSAs as they vest.

Pursuant to the agreement, CIBC will invest in a \$100 million subordinated debenture issued by Oppenheimer and will provide certain credit facilities to Oppenheimer and its investment banking

clients to facilitate Oppenheimer's business, with each loan subject to approval by CIBC's credit committee.

The transaction, which remains subject to regulatory approval, is expected to close in the first quarter of 2008.

The transferred business contributed the following to our results over the past three years:

\$ millions, for the year ended October 31	2007	2006	2005
Net interest income	\$ 6	\$ 11	\$ 8
Non-interest income	477	428	463
Total revenue	483	439	471
Non-interest expenses	464	488	544
Income (loss) before taxes and non-controlling interests	19	(49)	(73)
Income tax expense (benefit)	13	(15)	(26)
Net (loss) income	\$ 6	\$ (34)	\$ (47)

(1) Represents the weighted-average yield, which is determined by applying the weighted average of the yields of individual fixed income securities and the stated dividend rates of corporate and private equity securities.

(2) As discussed in Note 1, as at November 1, 2006, investment securities amounting to \$15,429 million (AFS value \$15,391 million) and \$5,738 million (fair value \$5,799 million) were reclassified to AFS securities and FVO securities, respectively. The investment securities reclassified to AFS securities include private equities accounted for at cost. In addition, investment in limited partnerships of \$615 million (AFS value \$615 million) previously included in other assets were reclassified to AFS securities as at November 1, 2006.

(3) Includes securities issued or guaranteed by government, having an amortized cost of \$541 million and fair value of \$540 million (2006: carrying and fair value \$4.7 billion).

(4) Fair value of \$20,418 million and \$931 million, respectively.

(5) The fair value does not take into account any adjustments for resale restrictions that expire within one year or for future expenses.

(6) Includes shares of Visa Inc. received in October 2007 in exchange for certain membership interests in Visa Canada and Visa International, pursuant to the global restructuring of Visa. These are all restricted shares.

(7) Includes securities issued or guaranteed by government \$133 million (2006: \$33 million).

(8) Includes securities issued or guaranteed by government \$9.5 billion.

(9) Includes securities denominated in U.S. dollars \$29.0 billion (2006: \$34.8 billion) and securities denominated in other foreign currencies \$2.7 billion (2006: \$3.1 billion).

n/a Not applicable due to the adoption of the new CICA financial instruments standards.

(1) Includes securities issued or guaranteed by government, with an amortized cost of \$541 million (2006: carrying value \$4.7 billion) and a fair value of \$540 million (2006: \$4.7 billion).

(2) 2007 includes certain restricted securities with fair value exceeding book value by \$2 million.

(3) Includes certain securities hedged by forward sale contracts with maturities in November 2006. The unrealized gains related to these securities decreased by \$40 million in 2006 as a result of these hedges.

(4) Carried at amortized cost on the consolidated balance sheet as these do not have quoted market values in an active market.

For AFS/investment securities where the fair value is less than the amortized cost (2006: carrying value), the following table presents current fair value and associated unrealized losses for periods less than 12 months and 12 months or longer:

\$ millions, as at October 31	2007						2006					
	Less than 12 months		12 months or longer		Total		Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses	Fair value	Gross unrealized losses
AFS/Investment securities												
Securities issued or guaranteed by:

As at October 31, 2007, the amortized cost (2006: carrying value) of 116 AFS securities (2006: 97 investment securities) exceeded their fair value by \$225 million (2006: \$343 million). The securities that have been in a gross unrealized loss position for more than a year include 38 securities (2006: 23 securities), with a gross unrealized loss of \$151 million (2006: \$324 million). We have determined that any unrealized losses on our AFS securities are temporary in nature.

The following table presents realized gains, losses and impairment write-downs on AFS/investment securities:

\$ millions, for the year ended October 31	2007	2006	2005

(1) Loans are net of unearned income of \$161 million (2006: \$113 million).

(2) Includes gross loans of \$14.2 billion (2006: \$7.3 billion) denominated in U.S. dollars and of \$2.8 billion (2006: \$2.5 billion) denominated in other foreign currencies.

(3) Includes \$185 million (2006: \$292 million), including a non-recourse portion of approximately \$2 million (2006: \$79 million), relating to loans to certain individuals while employed by CIBC to finance a portion of their participation in funds which make private equity investments on a side-by-side basis with CIBC and its affiliates. These loans are secured by the borrowers' interest in the funds. Of these, \$140 million (2006: \$205 million) relate to individuals who are no longer employed by CIBC.

n/a Not applicable due to the adoption of the new CICA financial instruments standards.

(1) Related to student loan portfolio.

(2) Related to the FirstCaribbean acquisition during the year.

Impaired Loans

\$ millions, as at October 31	2007			2006		
	Gross amount	Specific allowance	Net total	Gross amount	Specific allowance	Net total
Residential mortgages	\$ 219	\$ 30	\$ 189	\$ 118	\$ 13	\$ 105
Personal ⁽¹⁾	274	207	67	268	245	23
Credit card ⁽¹⁾	–	122	(122)	–	105	(105)
Business and government	370	194	176	244	179	65
Total impaired loans ⁽²⁾	\$ 863	\$ 553	\$ 310	\$ 630	\$ 542	\$ 88

(1) Specific allowances for large numbers of homogeneous balances of relatively small amounts are established by reference to historical ratios of write-offs to balances in arrears and to balances outstanding; this may result in negative net impaired loans.

(2) Average balance of gross impaired loans totalled \$908 million (2006: \$811 million).

As at October 31, 2007, other past due loans totalled \$60 million (2006: \$45 million) all of which were in Canada. Other past due loans, excluding credit card loans and government-guaranteed loans, are loans where repayment of principal or payment of interest is contractually in arrears between 90 and 180 days. These loans have not been classified as impaired loans because they are both fully secured and in the process of collection. If the number of days in arrears reaches 180, the loans become impaired notwithstanding the security held.

As at October 31, 2007, the interest entitlements on loans classified as impaired totalled \$73 million (2006: \$46 million; 2005: \$64 million), of which \$40 million (2006: \$45 million; 2005: \$58 million) were in Canada and \$33 million (2006: \$1 million; 2005: \$6 million) were outside Canada. During the year, interest recognized on loans before being classified as impaired totalled \$62 million (2006: \$56 million; 2005: \$63 million), of which \$51 million (2006: \$56 million; 2005: \$62 million) was in Canada and \$11 million (2006: nil; 2005: \$1 million) was outside Canada.

Net Interest Income after Provision for Credit Losses

Provision for credit losses	603	548	706
Net interest income after provision for credit losses	\$ 3,955	\$ 3,887	\$ 4,231

Note 6

Securizations and Variable Interest Entities

Securizations

Residential mortgages

We securitize insured fixed- and variable-rate residential mortgages through the creation of mortgage-backed securities under the Canada Mortgage Bond Program. Beginning in 2006, we also started securitizing uninsured fixed-rate mortgages to a QSPE. Upon sale of these assets, a net gain or loss is recognized in income from securitized assets. We retain responsibility for servicing the mortgages and recognize revenue as these services are provided.

Commercial mortgages

We securitize certain commercial mortgages through a trust that issues securities. We retain no beneficial interest in these mortgages, but we continue to service these mortgages and recognize revenue as these services are provided.

Credit cards

We securitize credit card receivables to a QSPE. We maintain the credit card client servicing responsibilities for the securitized receivables and recognize revenue as services are provided.

The following table summarizes our securitization and sales activity:

\$ millions, for the year ended October 31	2007		2006		2005	
	Residential mortgages	Commercial mortgages	Residential mortgages	Commercial mortgages	Residential mortgages	Cards
Securitized	\$ 13,768 ⁽¹⁾	\$ 357	\$ 10,314 ⁽¹⁾	\$ 380	\$ 381	\$ 10,178
Sold ⁽³⁾	7,017 ⁽¹⁾	357	7,826 ⁽¹⁾	380	381	7,876
Net cash proceeds	6,963	346	7,779	389	381	7,842
Retained interest ⁽⁴⁾	111	–	127	–	32	170
Gain on sale, net of transaction costs	41	(1)	27	7	1	32
Retained interest assumptions (%)						
Weighted-average remaining life (in years)	3.8	–	3.7	–	0.2	4.1
Prepayment/payment rate	11.0 – 39.0	–	11.0 – 39.0	–	43.0	12.0 – 39.0
Discount rate	4.0 – 4.9	–	3.5 – 4.8	–	9.0	2.6 – 4.2
Expected credit losses	0.0 – 0.1	–	0.0 – 0.1	–	3.5	–

(1) Includes \$249 million (2006: \$1,158 million) of uninsured fixed-rate mortgages securitized to a QSPE.

(2) Net of \$350 million related to the wind-down of a previous securitization.

(3) Assets securitized and not sold are reported as FVO securities (2006 and 2005: investment securities) on the consolidated balance sheet and stated at fair value.

(4) Retained interests arising from sale of securitized assets are reported as AFS securities (2006 and 2005: investment securities) on the consolidated balance sheet. Impairment write-down of retained interests for the year amounted to \$2 million (2006: \$31 million; 2005: \$24 million).

The following table summarizes certain cash flows as a result of securitization activity:

\$ millions, for the year ended October 31		Residential mortgages	Commercial mortgages	Cards
2007	Proceeds from new securitizations	\$ 6,963	\$ 346	\$ –
	Proceeds reinvested in revolving securitizations	–	–	27,553
	Servicing fees received	57	–	88
	Other cash flows received on retained interests	189	–	459
2006	Proceeds from new securitizations	\$ 7,779	\$ 389	\$ 381
	Proceeds reinvested in revolving securitizations	–	–	21,954
	Servicing fees received	48	–	87
	Other cash flows received on retained interests	165	–	474
2005	Proceeds from new securitizations	\$ 7,842	\$ –	\$ 2,345
	Proceeds reinvested in revolving securitizations	–	–	11,957
	Servicing fees received	37	2	46
	Other cash flows received on retained interests	142	–	271

Key economic assumptions used in measuring the fair value of retained interests in securitizations and the sensitivity of the current fair value of residual cash flows to changes in those assumptions are set out in the table below.

The sensitivities are hypothetical and should be viewed with caution, as changes in fair value based on variations in assumptions

generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the retained interests is calculated without changing any other assumptions. Changes in one factor may result in changes in another, which might magnify or counteract the sensitivities.

\$ millions, as at October 31	2007		2006

(1) Represents write-offs in the current year net of recoveries on previously written-off loans.

(2) Includes commercial mortgages and investment-grade loans.

(3) Includes loans outstanding and loans that have been securitized, which we continue to manage.

Variable interest entities VIEs that are consolidated

Since we were considered the primary beneficiary of certain VIEs, we consolidated total assets and liabilities of approximately \$64 million as at October 31, 2007 (2006: \$83 million).

The table below provides further details on the assets that support the obligations of the consolidated VIEs.

\$ millions, as at October 31	2007	2006
AFS securities	\$ 10	\$ –
Investment securities	–	12
Trading securities	50	56
Residential mortgages	4	15
	\$ 64	\$ 83

Investors in the consolidated VIEs have recourse only to the assets of the VIEs and do not have recourse to our general credit, except where we have provided liquidity facilities, credit enhancements or are a counterparty to a derivative transaction involving the VIE.

In addition, we were considered the primary beneficiary of certain compensation trusts with assets of approximately \$419 million (2006: \$400 million) as represented by 4.1 million CIBC common shares as at October 31, 2007 (2006: 4.6 million CIBC common shares). However, the consolidation of these trusts does not have a significant impact as both the assets (CIBC common shares) and

the liabilities (the obligation to deliver CIBC common shares to the participants) of the trusts offset each other in the treasury shares section of the consolidated balance sheet.

VIEs where we have a significant interest, but are not consolidated

We have significant interests in VIEs where we are not considered the primary beneficiary and thus do not consolidate. We may provide these VIEs liquidity facilities, hold their notes, or act as counterparty to derivative contracts. These VIEs include several multi-seller conduits in Canada, which we sponsor, and CDOs for which we act as structuring and placement agents and for which we may manage collateral on behalf of investors.

Securities issued by entities established by Canada Housing and Mortgage Corporation, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), and Student Loan Marketing Association (Sally Mae) are among our holdings that are not considered significant interests in the entities.

Maximum exposure to loss are amounts net of hedges. The maximum exposure comprises the fair value for investments, the notional amounts for liquidity and credit facilities, the notional amounts less accumulated fair value losses for written credit derivatives on VIE reference assets, and the positive fair value for all other derivative contracts with VIEs. Excluded hedged positions amount to \$34.1 billion (2006: \$24.7 billion).

\$ billions, as at October 31	2007		2006	
	Total assets	Maximum exposure to loss	Total assets	Maximum exposure to loss
CIBC sponsored multi-seller conduits	\$ 16.4	\$ 15.1 ⁽¹⁾	\$ 14.4	\$ 13.4 ⁽¹⁾
CIBC structured CDO vehicles	1.5	0.4	1.1	0.2 ⁽²⁾
Third-party structured vehicles	4.4	1.8	3.8	1.5 ⁽³⁾

(1) Includes \$0.3 billion (2006: \$0.3 billion) of liquidity commitments that exceed the current size of the conduits.

(2) Excludes \$0.6 billion of exposure that is hedged with third parties.

(3) Excludes \$1.8 billion of exposure that is hedged with third parties.

Note 7 Land, Buildings and Equipment

\$ millions, as at October 31	2007			2006
	Cost ⁽¹⁾	Accumulated amortization ⁽²⁾	Net book value	Net book value
Land ⁽³⁾	\$ 224	\$ –	\$ 224	\$ 238
Buildings ⁽³⁾	900	279	621	640
Computer equipment and software	2,219	1,733	486	419
Office furniture and other equipment	759	350	409	486
Leasehold improvements	599	361	238	249
	\$ 4,701	\$ 2,723	\$ 1,978	\$ 2,032

(1) Includes \$175 million (2006: \$242 million) of work in progress not subject to amortization.

(2) Amortization of buildings, furniture, equipment and leasehold improvements for the year amounted to \$214 million (2006: \$206 million; 2005: \$214 million).

(3) Land and buildings include amounts of \$153 million (2006: \$182 million) and \$354 million (2006: \$433 million), respectively, for which we are deemed to have ownership for accounting purposes.

Note 8 Goodwill and Other Intangible Assets

We completed our annual impairment testing on goodwill and other intangible assets and determined that no impairment write-downs were required.

The changes in the carrying amount of goodwill are as follows:

\$ millions, for the year ended October 31		CIBC Retail Markets	CIBC World Markets	Corporate and Other	CIBC Total
2007	Balance at beginning of year	\$ 883	\$ 56	\$ 43	\$ 982
	Acquisitions	1,061⁽¹⁾	10	–	1,071
	Adjustments⁽²⁾	(202)	(4)	–	(206)
	Balance at end of year	\$ 1,742	\$ 62	\$ 43	\$ 1,847
2006	Balance at beginning of year	\$ 883	\$ 57	\$ 6	\$ 946
	Acquisitions	–	–	37 ⁽³⁾	37
	Adjustments ⁽²⁾	–	(1)	–	(1)
	Balance at end of year	\$ 883	\$ 56	\$ 43	\$ 982

(1) Includes the acquisition of FirstCaribbean (Note 3).

(2) Includes foreign currency translation adjustments.

(3) Includes the acquisition of the remaining non-controlling interest in INTRIA Items Inc. (INTRIA).

The components of other intangible assets are as follows:

\$ millions, as at October 31	2007			2006		
	Gross carrying amount	Accumulated amortization ⁽¹⁾	Net carrying amount ⁽²⁾	Gross carrying amount	Accumulated amortization ⁽¹⁾	Net carrying amount ⁽²⁾
Finite-lived other intangible assets						
Customer relationships	\$ 123	\$ 74	\$ 49	\$ 121	\$ 65	\$ 56

Accounts payable and accrued expenses	1,628	1,539
Other	2,604	2,629
	\$ 13,728	\$ 14,716

(1) The deferred gain is being recognized in income each year over the approximate 10-year average term of the leases relating to properties that we sold and leased back in 2000.

(2) As of November 1, 2006, classified as derivative instruments and carried at fair value. See Note 1 for additional details.

Note 12 Trading Activities

The following tables present the assets and liabilities and income related to trading activities.

Trading income comprises net interest income and non-interest income. Net interest income arises from interest and dividends related to trading assets and liabilities other than derivatives, and is reported net of interest expense and income associated with funding these assets and liabilities. Non-interest income includes unrealized gains

and losses on security positions held, and gains and losses that are realized from the purchase and sale of securities. Non-interest income also includes realized and unrealized gains and losses on trading derivatives.

Trading income excludes underwriting fees and commissions on securities transactions, which are shown separately in the consolidated statement of operations.

Trading Assets and Liabilities

Commodities	26	39	31
Structured credit and other	(853)	248 ⁽²⁾	197 ⁽²⁾
	\$ (310)	\$ 685	\$ 820

(1) Includes \$2 million (2006: \$28 million; 2005: \$156 million) of non-controlling interests in VIEs.

(2) Includes trading loans which were designated at fair value upon the adoption of the new CICA financial instruments standards.

Note 13 Financial Instruments Designated at Fair Value (FVO)

Financial instruments designated at fair value include the following instruments that (i) would otherwise be recognized in income at amortized cost causing significant measurement inconsistencies with the hedging derivatives and securities sold short carried at fair value; or (ii) are managed on a fair value basis in accordance with a documented trading strategy and reported to key management personnel on that basis.

- Loans that were previously accounted for as trading including loans hedged by or hedging total return swaps and credit derivatives as well as secondary traded loans that are intended to be sold within six months.

- Certain securities and deposit liabilities hedged by derivatives such as interest rate swaps, seller swaps and other asset swaps.

The following tables present the designated FVO assets and liabilities, their hedges, and the related income from these financial instruments. Net interest income arises from interest and dividends related to the FVO assets and liabilities, and is reported net of interest expense and income associated with funding these assets and liabilities. Non-interest income includes unrealized gains and losses on the FVO assets and liabilities and related hedging derivatives and securities sold short.

Designated FVO Assets and Liabilities

\$ millions, as at October 31		2007
FVO assets		
Debt securities		\$ 10,291
Business and government loans		3,025
		\$ 13,316

		\$ 747

FVO and Related Hedges Income

\$ millions, for the year ended October 31		2007
Interest income		\$ 620
Interest expense ⁽¹⁾		567
Net interest income		53
Non-interest income		
FVO financial instruments		(70)
Economic hedges ⁽²⁾		226
		156
		\$ 209

(1) Includes \$17 million on obligations related to securities sold short hedging the FVO financial instruments.

(2) Comprises derivative instruments held to economically hedge FVO financial instruments.

Loans designated at fair value

The drawn credit exposure of FVO loans is noted in the table above. The undrawn credit exposure related to FVO loans is \$53 million. The cumulative change in fair value of the FVO loans attributable to changes in credit risk amounted to a loss of \$68 million.

The notional amount of the derivatives hedging the credit risk was \$3.0 billion. The cumulative change in fair value of these derivatives attributable to changes in credit risk since the loans were first designated amounted to a gain of \$70 million.

The changes in the fair value of the FVO loans attributable to changes in credit risk have been calculated by determining the credit

spread implicit in the fair value of bonds issued by entities with similar characteristics.

Deposits designated at fair value

As at October 31, 2007, the carrying amount of FVO deposits was \$14 million lower than the amount if the deposits were carried on a contractual settlement amount.

The cumulative change in fair value attributable to changes in CIBC's credit risk amounted to a gain of \$7 million.

The change in fair value attributable to changes in CIBC's credit risk has been calculated by reference to the change in the credit spread implicit in the market value of CIBC's deposits.

Note 14**Derivative Instruments**

As explained in Note 1, in the normal course of business, we use various derivative instruments in the course of trading and for ALM purposes. These derivatives limit, modify or give rise to varying degrees and types of risk.

\$ millions, as at October 31	2007	
	Assets	Liabilities
Trading (Note 12)	\$ 22,690	\$ 24,208
Designated accounting hedges (Note 15)	625	347

Economic hedges of FVO financial assets and liabilities (Note 13)	179	211
Other economic hedges	581	1,922
	\$ 24,075	\$ 26,688

(1) Comprises derivatives not part of qualifying hedging relationships for accounting purposes under the CICA handbook section 3865.

Derivatives used by CIBC

The majority of our derivative contracts are over-the-counter transactions that are privately negotiated between CIBC and the counterparty to the contract. The remainder are exchange traded contracts transacted through organized and regulated exchanges and consist primarily of options and futures.

Interest rate derivatives

Forward rate agreements are over-the-counter contracts that effectively fix a future interest rate for a period of time. A typical forward rate agreement provides that at a pre-determined future date, a cash settlement will be made between the counterparties based upon the difference between a contracted rate and a market rate to be determined in the future, calculated on a specified notional principal amount. No exchange of principal amount takes place.

Interest rate swaps are over-the-counter contracts in which two counterparties agree to exchange cash flows over a period of time based on rates applied to a specified notional principal amount. A typical interest rate swap would require one counterparty to pay a fixed market interest rate in exchange for a variable market interest rate determined from time to time with both calculated on a specified notional principal amount. No exchange of principal amount takes place.

Interest rate options are contracts in which one party (the purchaser of an option) acquires from another party (the writer of an option), in exchange for a premium, the right, but not the obligation, either to buy or sell, on a specified future date or within a specified time, a specified financial instrument at a contracted price. The underlying financial instrument will have a market price which varies in response to changes in interest rates. In managing our interest rate exposure, we act both as a writer and purchaser of these options. Options are transacted both over-the-counter and through exchanges.

Interest rate futures are standardized contracts transacted on an exchange. They are based upon an agreement to buy or sell a specified quantity of a financial instrument on a specified future date, at a contracted price. These contracts differ from forward rate agreements in that they are in standard amounts with standard settlement dates and are transacted on an exchange.

Foreign exchange derivatives

Foreign exchange forwards are over-the-counter contracts in which one counterparty contracts with another to exchange a specified amount of one currency for a specified amount of a second currency, at a future date or range of dates.

Swap contracts comprise foreign exchange swaps and cross-currency interest rate swaps. Foreign exchange swaps are transactions in which a foreign currency is simultaneously purchased in the spot market and sold in the forward market, or vice-versa. Cross-currency interest rate swaps are transactions in which counterparties exchange principal and interest flows in different currencies over a period of time. These contracts are used to manage both currency and interest rate exposures.

Foreign exchange futures contracts are similar in mechanics to foreign exchange forward contracts but differ in that they are in standard currency amounts with standard settlement dates and are transacted on an exchange.

Credit derivatives

Credit derivatives are over-the-counter contracts designed to transfer the credit risk in an underlying financial instrument (usually termed as a reference asset) from one counterparty to another. The most common credit derivatives are credit default swaps (referred to as option contracts) and total return swaps (referred to as swap contracts). In option contracts, an option purchaser acquires credit protection on a reference asset or group of assets from an option writer in exchange for a premium. The option purchaser may pay the agreed premium at inception or over a period of time. The credit protection compensates the option purchaser for any deterioration in value of the reference asset upon the occurrence of certain credit events such as bankruptcy or failure to pay. Settlement may be cash based or physical, requiring the delivery of the reference asset to the option writer. In swap contracts, one counterparty agrees to pay or receive from the other cash amounts based on changes in the value of a reference asset or group of assets, including any returns such as interest earned on these assets in exchange for amounts that are based on prevailing market funding rates. These cash settlements are made regardless of whether there is a credit event. Certain swap contracts include an additional feature whereby the payer of the total return swap (party with the reference asset) has the right to sell the reference asset to CIBC at par at which point the contract terminates.

Equity derivatives

Equity swaps are over-the-counter contracts in which one counterparty agrees to pay, or receive from the other, cash amounts based on changes in the value of a stock index, a basket of stocks or a single stock. These contracts sometimes include a payment in respect of dividends.

Equity options give the purchaser of the option, for a premium, the right, but not the obligation, to buy from or sell to the writer of an option, an underlying stock index, basket of stocks or single stock at a contracted price. Options are transacted both over-the-counter and through exchanges.

Equity index futures are standardized contracts transacted on an exchange. They are based on an agreement to pay or receive a cash amount based on the difference between the contracted price level of an underlying stock index and its corresponding market price level at a specified future date. There is no actual delivery of stocks that comprise the underlying index. These contracts are in standard amounts with standard settlement dates.

Precious metal and other commodity derivatives

We also transact in other derivative products, including commodity forwards, futures, swaps and options, such as precious metal and energy-related products in both over-the-counter and exchange markets.

Notional amounts

The following table presents the notional amounts of derivative instruments.

The notional amounts are not recorded as assets or liabilities as they represent the face amount of the contract to which a rate or price is applied to determine the amount of cash flows to be exchanged. In most cases, notional amounts do not represent the potential gain or loss associated with market risk or credit risk of such instruments.

(1) Comprises credit protection bought \$2,797 million and credit protection sold \$10,520 million.

(2) ALM written options are reported as financial guarantees in Note 24.

(3) Comprises forwards, futures, swaps and options.

Risk

In the following sections, we discuss the risks related to the use of derivatives and how we manage these risks.

Market risk

Derivative instruments, in the absence of any compensating upfront cash payments, generally have no or small market values at inception. They obtain value, positive or negative, as relevant interest rates, foreign exchange rates, equity, commodity, credit prices or indices change, such that the previously contracted terms of the derivative transactions have become more or less favourable than what can be

negotiated under current market conditions for contracts with the same terms and the same remaining period to expiry. The potential for derivatives to increase or decrease in value as a result of the foregoing factors is generally referred to as market risk.

Market risk arising through trading activities is managed in order to mitigate risk, where appropriate, and with a view to maximizing trading revenue. To further manage risks, we may enter into contracts with other market makers or may undertake cash market hedges. There is no correlation between the high notional values of contracts to which we are a party and the net market and credit risks to which we are exposed.

Credit risk

Credit risk arises from the potential for a counterparty to default on its contractual obligations and the risk that prevailing market conditions are such that we would incur a loss in replacing the defaulted transaction. We limit the credit risk of derivatives traded over-the-counter by dealing with counterparties that are creditworthy, and by actively pursuing risk mitigation opportunities through the use of multi-product derivative master netting agreements, collateral and other credit mitigation techniques.

We negotiate derivative master netting agreements with counterparties with which we have significant credit risk through derivatives activities. Such agreements provide for the simultaneous close out and netting of all transactions with a counterparty in an event of default. A number of these agreements also provide for the exchange of collateral between parties in the event that the mark-to-market value of outstanding transactions between the parties exceeds an agreed threshold. Such agreements are used both to accommodate business with less creditworthy counterparties and to help contain the build-up of credit exposure resulting from multiple deals with more active counterparties. Credit risk on exchange traded futures and options is limited, as these transactions are standardized contracts executed on established exchanges each of which is associated with a well-capitalized clearing house that assumes the obligations of both counterparties and guarantees their performance. All exchange traded contracts are subject to initial margins and generally to daily settlement of variation margins.

Written options generally have no credit risk for the writer if the counterparty has already performed in accordance with the terms of the contract through payment of the premium at inception. Written options will, however, have some credit risk to the extent of any unpaid premiums.

The following table summarizes our credit exposure arising from derivative instruments except for those that are traded on an exchange and subject to daily margining requirements. The calculation of risk-weighted amount is prescribed by OSFI. The current replacement cost is the estimated cost to replace all contracts which have a positive market value, representing an unrealized gain to CIBC. The replacement cost of an instrument is dependent upon its terms relative to prevailing market prices, and will fluctuate as market prices change and as the derivative approaches its scheduled maturity.

The credit equivalent amount is the sum of the current replacement cost and the potential credit exposure. The potential credit exposure is an estimate of the amount by which the current replacement cost could increase over the remaining term of each transaction, based on a formula prescribed by OSFI. The credit equivalent amount is then multiplied by standard counterparty risk-weighting factors prescribed by OSFI that are adjusted for the impact of collateral and guarantees to arrive at the risk-weighted amount. The risk-weighted amount is used in determining the regulatory capital requirements for derivatives.

(1) ALM credit derivatives with a replacement cost of \$95 million (2006: \$40 million), are given financial guarantee treatment for credit risk capital purposes and are excluded from the table above. In addition, exchange traded instruments with a replacement cost of \$1,910 million (2006: \$1,475 million) are excluded in accordance with the guidelines of OSFI.

(2) Sum of current replacement cost and potential credit exposure, adjusted for the impact of collateral amounting to \$1,667 million (2006: \$1,373 million). The collateral comprises cash \$1,398 million (2006: \$1,278 million), government securities \$173 million (2006: \$80 million) and other instruments \$96 million (2006: \$15 million).

(3) Comprises credit protection sold. The amount represents the fair value of contracts for which fees are received over the life of the contracts.

(4) Comprises forwards, swaps and options.

Note 15 Designated Accounting Hedges

The following table presents the hedge ineffectiveness gains (losses) recognized in the consolidated statement of operations:

\$ millions, for the year ended October 31	2007
Fair value hedges ⁽¹⁾	\$ (18)
Cash flow hedges ⁽²⁾	2

(1) Recognized in net interest income.

(2) Recognized in other non-interest income.

Portions of derivative gains (losses) that by designation were excluded from the assessment of hedge effectiveness for fair value and cash flow hedging activities are included in the consolidated statement of operations and are not significant for the year ended October 31, 2007.

The following table presents notional amounts and carrying value of our hedging-related derivative instruments:

\$ millions, as at October 31	Derivatives notional amount	2007 Carrying value	
		Positive	Negative
Fair value hedges	\$ 72,601	\$ 346	\$ 344
Cash flow hedges	4,193	155	2
NIFO hedges	4,924	124	1
	\$ 81,718	\$ 625	\$ 347

In addition, foreign currency denominated deposit liabilities of \$163 million and \$13,223 million have been designated as fair value hedges of foreign exchange risk and NIFO hedges, respectively.

Note 16 Subordinated Indebtedness

The debt issues included in the table below are unsecured obligations of CIBC and its subsidiaries and are subordinated to the claims of depositors and other creditors as set out in their terms. Foreign currency denominated indebtedness either funds foreign

currency denominated assets (including net investments in foreign operations) or is combined with cross-currency swaps to provide Canadian dollar equivalent funding. All redemptions are subject to regulatory approval.

Note 17 Preferred Share Liabilities and Share Capital

Preferred shares

CIBC is authorized to issue an unlimited number of Class A Preferred Shares and Class B Preferred Shares without nominal or par value issuable in series, provided that for a class of preferred shares the maximum aggregate consideration for all outstanding shares of that class at any time does not exceed \$10 billion. There are no Class B Preferred Shares currently outstanding.

Common shares

CIBC is authorized to issue an unlimited number of common shares without nominal or par value, provided that the maximum aggregate consideration for all outstanding common shares at any time does not exceed \$15 billion.

(1) On November 25, 2005, we announced our offer to repurchase for cancellation all outstanding Class A Series 28 Preferred Shares at a price of \$10.00 per share. The offer will expire on the earlier of June 17, 2009 or the date the offer is withdrawn by CIBC. During the year, we repurchased 558 (2006: 14,600) shares under this offer.

(2) Due to rounding.

(3) Over the course of 2005, on three conversion dates, 13.2 million Class A Series 28 Preferred Shares were converted into Class A Series 29 Preferred Shares, together with the exercise of the same number of Series 29 Purchase Warrants and the receipt of \$15 per warrant, resulting in total capital for the Class A Series 29 Preferred Shares of \$331 million. The total paid up share capital of the converted Class A Series 28 Preferred Shares was correspondingly reduced by \$133 million.

(4) Includes treasury shares.

Preferred share rights and privileges Class A Preferred Shares

Each series of Class A Preferred Shares bears quarterly non-cumulative dividends and is redeemable for cash by CIBC on or after the specified redemption dates at the cash redemption prices indicated in the following table. Certain series provide CIBC, or CIBC and the shareholders, with the right to convert the shares to CIBC common shares on or after a specified conversion date. Each share is convertible

into a number of common shares determined by dividing the then applicable cash redemption price by 95% of the average common share price (as defined in the relevant short form prospectus or prospectus supplement), subject to a minimum price of \$2.00 per share. If shareholders exercise their conversion right, we have the right, subject to OSFI's consent, to elect to redeem for cash any shares tendered for conversion or to arrange for their cash sale to another purchaser.

(1) Quarterly dividends are adjusted for the number of days during the quarter that the share is outstanding at the time of issuance and redemption.

Common shares repurchased

On April 30, 2007, the Toronto Stock Exchange (TSX) accepted our notice of intention to commence a normal course issuer bid. Purchases under the bid commenced on May 2, 2007 and concluded on October 31, 2007. Under this bid, we repurchased and cancelled approximately 3.1 million shares at an average price of \$99.54 for a total amount of \$306 million.

Subsequent to year-end, on November 9, 2007 the TSX accepted our notice of intention to commence a new normal course issuer bid. Purchases under this bid will conclude on the earlier of the termination of the bid, the date on which purchases under the bid have been completed, or October 31, 2008. Under this bid, from time to time, we may purchase for cancellation up to 9 million common shares.

During 2005, we repurchased 16.2 million common shares at an average price of \$72.64 for a total amount of \$1.2 billion. No shares were repurchased during 2006.

Shares reserved for issue

As at October 31, 2007, 15,753,852 common shares (2006: 17,677,700) were reserved for future issue pursuant to stock option plans.

Restrictions on the payment of dividends

Under Section 79 of the Bank Act (Canada), a bank, including CIBC, is prohibited from declaring or paying any dividends on its preferred or common shares if there are reasonable grounds for believing that the bank is, or the payment would cause it to be, in contravention of any capital adequacy or liquidity regulation or any direction to the bank made by OSFI.

In addition, our ability to pay common share dividends is also restricted by the terms of the outstanding preferred shares. These terms provide that we may not pay dividends on our common shares at any time without the approval of holders of the outstanding preferred shares, unless all dividends to preferred shareholders that are then payable have been declared and paid or set apart for payment.

Capital Objectives, policies and procedures

Our objective is to employ a strong and efficient capital base. We manage capital in accordance with policies established by the Board. These policies relate to capital strength, capital mix, dividends and return of capital, and the unconsolidated capital adequacy of regulated entities. Each policy has associated guidelines, and capital is monitored continuously for compliance.

Each year a capital plan and three-year outlook are established, which encompass all the associated elements of capital: forecasts of sources and uses, maturities, redemptions, new issuance, corporate initiatives and business growth. The capital plan is stress-tested in various ways to ensure that it is sufficiently robust under all reasonable scenarios. All of the elements of capital are monitored throughout the year, and the capital plan is adjusted as appropriate.

There were no significant changes made in the objectives, policies and procedures during the year.

Regulatory requirements

Our regulatory capital requirements are determined in accordance with guidelines issued by OSFI. The OSFI guidelines evolve from the framework of risk-based capital standards developed by the Bank for International Settlements (BIS).

BIS standards require that banks maintain minimum Tier 1 and Total capital ratios of 4% and 8%, respectively. OSFI has established that Canadian deposit-taking financial institutions maintain Tier 1 and Total capital ratios of at least 7% and 10%, respectively. During the year, we have complied in full with all of our regulatory capital requirements.

Regulatory capital

Regulatory capital consists of Tier 1 and Tier 2 capital, less certain deductions.

Tier 1 capital comprises common shares excluding short trading positions in our own shares, retained earnings, preferred shares, non-controlling interests, contributed surplus, and foreign currency translation adjustments. Goodwill is deducted from Tier 1 capital. Tier 2 capital comprises subordinated debt and the lesser of the general allowance for credit losses or 0.875% of risk-weighted assets.

Our capital ratios and assets-to-capital multiple were as follows:

\$ millions, as at October 31	2007	2006
Tier 1 capital	\$ 12,379	\$ 11,935
Total regulatory capital	17,758	16,583

Basel II

In 2004, the Basel Committee on Banking Supervision issued new rules for the calculation of regulatory capital, which are effective from November 1, 2007 onwards. For further details, see the "Management of Risk" section in the MD&A.

Note 18

Accumulated Other Comprehensive Income

\$ millions, as at October 31	2007	2006
Foreign currency translation adjustments	\$ (1,087)	\$ (442)
Net unrealized losses on AFS securities	(66) ⁽¹⁾	n/a
Net gains on cash flow hedges	61 ⁽²⁾	n/a
	\$ (1,092)	\$ (442)

(1) Includes \$127 million of cumulative loss related to AFS securities measured at fair value.

(2) A net gain of \$11 million, deferred in AOCI, as at October 31, 2007, is expected to be reclassified to net income during the next 12 months. Remaining amounts will be reclassified to net income over periods up to six years thereafter.

n/a Not applicable due to the adoption of the new CICA financial instruments standards.

Note 19 Interest Rate Sensitivity

The table below details our exposure to interest rate risk resulting from the mismatch, or gap, between financial assets, liabilities and off-balance sheet instruments. On- and off-balance sheet financial instruments have been reported on the earlier of their contractual repricing date or maturity date. Certain contractual repricing dates have been adjusted according to management's estimates for prepayments and early redemptions. Weighted-average effective yields are based on the earlier of contractual repricing date or maturity date of the underlying instrument.

We manage our interest rate gap by imputing a duration to certain assets and liabilities based on historical and forecasted trends in core balances. The repricing profile of these assets and liabilities has been incorporated in the table below under structural assumptions.

\$ millions, as at October 31	Based on earlier of maturity or repricing date of interest-sensitive instruments						Total

(1) Includes derivative instruments which are reported on the consolidated balance sheet at fair value.

Note 20**Stock-based Compensation****Stock option plans**

We have two stock option plans: Employee Stock Option Plan (ESOP) and Non-Officer Director Stock Option Plan (DSOP).

Under the ESOP, stock options are periodically granted to selected employees. Options provide the employee with the right to purchase CIBC common shares from CIBC at a fixed price not less than the closing price of the shares on the trading day immediately preceding the grant date. In general, the options vest evenly over a four-year period and expire 10 years from the grant date. Certain options vest on the attainment of specified performance conditions.

Up to 50% of options relating to the ESOP granted prior to 2000 can be exercised as SARs. SARs can be exchanged for a cash amount equal to the excess of the weighted-average price of the common shares on the TSX on the trading day immediately preceding the day the SARs are exercised over the option strike price.

Under the DSOP, each director who was not an officer or employee of CIBC or any of our subsidiaries was provided with the right to purchase CIBC common shares from CIBC at a fixed price equal to the five-day average of the closing price per share on the TSX for the five trading days preceding the date of the grant. The options, which are not eligible for SARs, vested immediately and expire on the earlier of (a) 60 months after the date the director ceases to be a member of the Board of Directors, or (b) 10 years from the grant date. In January 2003, the Board of Directors determined that no further options would be granted under the DSOP.

A maximum of 42,834,500 common shares may be issued under our stock option plans.

The weighted-average grant date fair value of options granted during 2007 has been estimated at \$14.11 (2006: \$9.85; 2005: \$9.56) using the Black-Scholes option-pricing model. The following weighted-average assumptions were used to determine the fair value of options on the date of grant:

For the year ended October 31	2007	2006	2005
Weighted-average assumptions			
Risk-free interest rate	4.09%	4.20%	4.13%
Expected dividend yield	3.91%	4.88%	4.84%
Expected share price volatility	18.65%	19.50%	20.13%
Expected life	6 years	6 years	7 years

Compensation expense in respect of stock options and SARs totalled \$20 million in 2007 (2006: \$30 million; 2005: \$5 million). A liability in respect of SARs is recorded in other liabilities and totalled \$50 million as at October 31, 2007 (2006: \$66 million; 2005: \$63 million).

Employee Share Purchase Plan

Under our Canadian Employee Share Purchase Plan, qualifying employees can choose each year to have up to 10% of their eligible earnings withheld to purchase CIBC common shares. We match 50% of the employee contribution amount, up to a maximum contribution of 3% of eligible earnings, depending upon length of service and job level, subject to a ceiling of \$2,250 annually. CIBC contributions vest after employees have two years of continuous participation in the plan, and all subsequent contributions vest immediately. Similar employee share purchase plans exist in other regions globally, where, each year, qualifying employees can choose to have a portion of

their eligible earnings withheld to purchase CIBC common shares and receive a matching employer contribution subject to each plan's provisions. All contributions are used by the plans' trustees to purchase common shares in the open market. FirstCaribbean operates its own employee share purchase plan in which contributions are used by the plan trustee to purchase FirstCaribbean common shares in the open market. Our contribution is expensed as incurred and totalled \$30 million in 2007 (2006: \$28 million; 2005: \$28 million).

Restricted Share Program

Under our Restricted Share Program (RSP), share equivalents are awarded under the following compensation plans:

Restricted Share Awards

Under our Restricted Share Award (RSA) Plan, which began in 2000, certain key employees are granted awards to receive CIBC common shares. Additionally, RSAs may be awarded as special grants. The funding for these awards is paid into a trust, which purchases CIBC common shares in the open market. In general, RSAs vest one-third annually or at the end of three years. The common shares held in the trust are generally distributed within a three-year period, beginning one year after the year of the grant. Compensation expense in respect of RSAs totalled \$240 million in 2007 (2006: \$235 million; 2005: \$244 million).

Other restricted share plans

In the past, grants were made under two other restricted share programs, specifically the Stock Participation Plan (SPP) and Special Incentive Program (SIP). The final SPP grants were made in respect of 2004. SIP award units were granted only once, in 2000.

Under both programs, certain key employees were granted awards to receive CIBC common shares. The funding for these awards was paid into a trust, which purchased CIBC common shares in the open market.

SIP awards relating to some of the key employees vested and were distributed as at October 31, 2003, the date the plan expired. For other key employees, the value of awards was converted into Retirement Special Incentive Program Deferred Share Units (RSIP DSUs). Each RSIP DSU represents the right to receive one CIBC common share and additional RSIP DSUs in respect of dividends earned by the CIBC common shares held by the trust. RSIP DSUs met time- and performance-based vesting conditions on October 31, 2003, and will be distributed in the form of CIBC common shares upon retirement or termination of employment.

SPP awards vested at the end of three years and the common shares held in the trust were distributed after vesting. SPP awards granted in prior years were fully vested as at October 31, 2007.

Compensation expense net of forfeitures in respect of both plans was nil for 2007 (2006: \$(3) million; 2005: \$(5) million).

Performance Share Unit Program

Under the Performance Share Unit (PSU) program, which was introduced in 2005, certain key executives are granted awards to receive CIBC common shares or an equivalent cash value. PSUs vest at the end of three years. The final number of PSUs that vest will range from 75% to 125% of the initial number awarded based on CIBC's return on equity performance relative to the average of the other major

Canadian banks. Compensation expense in respect of PSUs totalled \$9 million in 2007 (2006: \$11 million; 2005: \$5 million). A liability in respect of PSUs is recorded in other liabilities and totalled \$24 million as at October 31, 2007 (2006: \$16 million; 2005: \$5 million).

Directors' plans

Members of our Board of Directors who are not officers or employees of CIBC may elect to receive the annual amount payable by CIBC under the Director Deferred Share Unit/Common Share Election Plan as either Deferred Share Units (DSUs) or CIBC common shares.

The members may also elect, under the Non-Officer Director Share Plan, to receive all or a portion of their cash remuneration in the form of cash, CIBC common shares or DSUs. For purposes of this plan, cash remuneration includes the cash component of the director retainer, meeting attendance fees, non-resident attendance

fees, committee chair retainers, committee member retainers and the Chairman of the Board retainer.

The value of DSUs credited to a director is payable when he or she is no longer a director or employee of CIBC and, in addition, for directors subject to section 409A of the United States Internal Revenue Code of 1986, as amended, the director is not providing any services to CIBC or any member of its controlled group as an independent contractor. In addition, under the Director Deferred Share Unit/Common Share Election Plan, the value of DSUs is payable when the director is no longer related to, or affiliated with, CIBC as defined in the Income Tax Act (Canada).

Compensation expense in respect of these plans totalled \$3 million (2006: \$3 million; 2005: \$3 million). A liability in respect of DSUs is recorded in other liabilities and totalled \$8 million as at October 31, 2007 (2006: \$8 million; 2005: \$6 million).

Note 21

Employee Future Benefits

We sponsor pension plans for eligible employees. These plans include registered funded defined benefit pension plans, supplemental unfunded arrangements, which provide pension benefits in excess of statutory limits, and defined contribution plans. The pension plans are predominantly non-contributory, but some participants contribute to their respective plans so as to receive higher pension benefits. These benefits are, in general, based on years of service and compensation near retirement. We also provide certain health-care, life insurance and other benefits to eligible employees and pensioners. In addition, we continue to sponsor a long-term disability plan which provides

benefits to disabled employees who became disabled prior to June 1, 2004.

We measure our accrued benefit obligations and the fair value of plan assets for accounting purposes as at September 30 each year.

The following tables present the financial positions of the employee defined benefit pension plans and other benefit plans for Canada, U.S., U.K., and our FirstCaribbean subsidiaries. Other minor plans operated by some of our subsidiaries are not considered material and are not included in these disclosures.

\$ millions, as at or for the year ended October 31	Pension benefit plans			Other benefit plans

Defined benefit plan expense recognized	\$ 185	\$ 219	\$ 173	\$ 41	\$ 77	\$ 64

(1) Expected return on plan assets of \$247 million (2006: \$203 million; 2005: \$189 million), subtracted from actual return on plan assets of \$256 million (2006: \$317 million; 2005: \$405 million).

(2) Expected return on plan assets of \$4 million (2006: \$5 million; 2005: \$7 million), subtracted from actual return on plan assets of nil (2006: \$5 million; 2005: \$11 million).

(3) Actuarial (gains) losses amortized of \$74 million (2006: \$98 million; 2005: \$57 million), less actual actuarial (gains) losses incurred of \$16 million (2006: \$65 million; 2005: \$475 million).

(4) Actuarial (gains) losses amortized of \$8 million (2006: \$11 million; 2005: \$8 million), less actual actuarial (gains) losses incurred of \$(29) million (2006: \$(32) million; 2005: \$143 million).

(5) Amortization of plan amendments of \$6 million (2006: \$8 million; 2005: \$7 million), less actual plan amendments of \$(48) million (2006: \$2 million; 2005: \$25 million).

(6) Amortization of plan amendments of \$(20) million (2006: \$(7) million; 2005: \$(7) million), less actual plan amendments of \$(152) million (2006: nil; 2005: \$(2) million).

Benefit changes

2007

Effective November 1, 2006, the plan providing medical, dental, and life insurance benefits to Canadian employees retiring subsequent to December 31, 2008, was amended to provide a choice of benefit coverage and to limit the CIBC subsidy to cost levels established in 2009, when the plan changes are implemented. Any future increases in medical and dental benefit costs for this group of retirees will be borne by the retirees. This amendment resulted in a reduction in liability.

Effective May 30, 2007, our Canadian defined benefit pension plans were amended with respect to our restructuring support program. For employees who receive notice of termination or retirement under

designated support programs, on or after November 1, 2009, the pension benefits will be limited to the standard provisions of the plan. This amendment resulted in a reduction in liability.

2006 and 2005

There were no material changes to the terms of our defined benefit pension plans or other benefit plans in 2006 or 2005.

Benefit plan assets

The weighted-average asset allocation and target allocation by asset category of our defined benefit pension plans and other funded benefit plans are as follows:

Asset category	Pension benefit plans			Other benefit plans		
	Actual allocation as at October 31	Target allocation		Actual allocation as at October 31	Target allocation	
	2007	2006	2008	2007	2006	2008
Equity securities ⁽¹⁾	53%	53%	50%	20%	29%	10%
Debt securities ⁽¹⁾	42	42	42	80	71	90
Real estate	5	5	4	–	–	–
Infrastructure ⁽²⁾	–	–	4	–	–	–
	100%	100%	100%	100%	100%	100%

(1) Pension benefit plans include CIBC securities of \$21 million (2006: \$7 million), representing 0.6% of total plan assets (2006: 0.2%). Other benefit plans do not include any CIBC securities.

(2) Consists of investments in essential public assets, including transportation, communications, energy, education and health-care projects.

The investment policy for benefit plan assets is to optimize the risk-return relationship using a global portfolio of various asset classes diversified by market segment, economic sector and issuer. The goal is to secure our registered pension plans and long-term disability plan obligations, maximizing the investment returns while not compromising the security of the respective plans, in a cost-effective manner. Plan assets are managed by external investment managers and CIBC Global Asset Management Inc., a wholly owned subsidiary of CIBC, and within established ranges, are rebalanced as required to the target asset mix.

Plan assumptions

The discount rate assumption used in determining pension and post-retirement benefit obligations and net benefit expense reflects the market yields, as of the measurement date, on high-quality debt instruments with cash flows that match expected benefit payments.

For the Canadian plans, the expected rate of return on plan assets assumption is reviewed annually by management, in conjunction with our actuaries. The assumption is based on expected returns for the various asset classes, weighted by the portfolio allocation. Anticipated future long-term performance of individual asset categories is considered, reflecting expected future inflation and real yields on fixed income securities and equities.

In the U.S., U.K., and Caribbean regions, procedures similar to those in Canada are used to develop the expected long-term rate of return on plan assets, taking into consideration local market conditions and the specific allocation of plan assets.

The assumptions used to determine the accrued benefit obligation and the benefit plan expense are as follows:

Weighted-average assumptions	2007	Pension benefit plans			Other benefit plans	
		2006	2005	2007	2006	2005
Accrued benefit obligation as at October 31						
Discount rate at end of the period	5.6%	5.3%	5.2%	5.5%	5.1%	5.1%
Rate of compensation increase	3.6%	3.5%	3.5%	3.5%	3.5%	3.2%
Net benefit plan expense for the years ended October 31						
Discount rate at beginning of the period	5.3%	5.2%	6.2%	5.1%	5.1%	6.0%
Expected long-term rate of return on plan assets	6.5%	6.5%	7.0%	5.5%	6.0%	6.5%
Rate of compensation increase	3.5%	3.5%	3.5%	3.5%	3.2%	3.2%

The assumed health-care cost trend rates are as follows:

For the year ended October 31	2007	2006	2005
Health-care cost trend rates assumed for next year	6.8%	10.0%	7.8%
Rate to which the cost trend rate is assumed to decline	4.5%	4.5%	4.5%
Year that the rate reaches the ultimate trend rate	2014	2014	2012

A one percentage-point change in assumed health-care cost trend rates would have the following effects:

\$ millions, for the year ended October 31	One percentage-point increase			One percentage-point decrease		
	2007	2006	2005	2007	2006	2005
Effect on total benefit plan expense	\$ 5	\$ 11	\$ 13	\$ (4)	\$ (8)	\$ (12)
Effect on accrued benefit obligation	60	111	125	(49)	(79)	(97)

Defined contribution and other plans

We also maintain defined contribution plans for certain employees. The total expense recognized for the defined contribution plan is as follows:

\$ millions, for the year ended October 31	2007	2006	2005
Defined contribution pension plans	\$ 20	\$ 15	\$ 14
Government pension plans ⁽¹⁾	76	74	75
	\$ 96	\$ 89	\$ 89

(1) Includes Canada Pension Plan, Quebec Pension Plan, and U.S. Federal Insurance Contributions Act.

Expenses if recognized as they arose

The total expense arising for the defined benefit pension plans, defined contribution pension plans, government pension plans and other benefit plans if we had recognized all costs and expenses as they arose is as follows:

\$ millions, for the year ended October 31	Pension benefit plans			Other benefit plans			Total		
	2007	2006	2005	2007	2006	2005	2007	2006	2005
Defined benefit plans	\$ 64	\$ 66	\$ 393	\$ (124)	\$ 41	\$ 200	\$ (60)	\$ 107	\$ 593
Defined contribution and other plans	96	89	89	–	–	–	96	89	89
	\$ 160	\$ 155	\$ 482	\$ (124)	\$ 41	\$ 200	\$ 36	\$ 196	\$ 682

Cash flows

Cash contributions

The most recent actuarial valuation of the principal defined benefit pension plan for funding purposes was as at October 31, 2006. The next actuarial valuation of the plan will be required as at a date not later than October 31, 2009. For the long-term disability plan, the most recent actuarial valuation was performed as at October 31, 2004. Total cash contributions for employee future benefit plans consist of:

\$ millions, for the year ended October 31	Pension benefit plans			Other benefit plans		
	2007	2006	2005	2007	2006	2005
Funded plans	\$ 128	\$ 263	\$ 223	\$ –	\$ –	\$ 3
Beneficiaries of unfunded plans	11	11	8	31	25	15
Defined contribution pension plans	20	15	14	–	–	–
	\$ 159	\$ 289	\$ 245	\$ 31	\$ 25	\$ 18

The minimum contributions for 2008 are anticipated to be \$25 million for defined benefit pension plans and \$35 million for other benefit plans. These estimates are subject to change since contributions are affected by various factors, such as market performance, regulatory requirements, and management's ability to change funding policy.

Benefit payments

The following benefit payments, which reflect expected future services, as appropriate, are expected to be paid either by CIBC or from the trust funds:

\$ millions	Pension benefit plans	Other benefit plans
2008	\$ 179	\$ 61
2009	186	60
2010	193	60
2011	201	60
2012	211	60
2013 – 2017	1,228	300

Federal	147	81	23
Provincial	68	36	12
Foreign	139	251	173
	354	368	208
	\$ 1,561	\$ 903	\$ 669

Future income tax balances are included in other assets (Note 9) and other liabilities (Note 11) and result from temporary differences between the tax basis of assets and liabilities and their carrying amounts on the consolidated balance sheet.

The combined Canadian federal and provincial income tax rate varies each year according to changes in the statutory rates imposed by each of these jurisdictions and according to changes in the proportion of our business carried on in each province. We are also subject to Canadian taxation on income of foreign branches.

Earnings of foreign subsidiaries would generally only be subject to Canadian tax when distributed to Canada. Additional Canadian taxes that would be payable if all foreign subsidiaries' retained earnings were distributed to the Canadian parent as dividends are estimated at \$302 million (2006: \$567 million; 2005: \$420 million).

The effective rates of income tax in the consolidated statement of operations are different from the combined Canadian federal and provincial income tax rate of 34.8% (2006: 34.8%; 2005: 35.0%) as set out in the following table:

Reconciliation of Income Taxes

\$ millions, for the year ended October 31	2007		2006		2005	
Combined Canadian federal and provincial income tax rate applied to income before income taxes	\$ 1,340	34.8%	\$ 1,155	34.8%	\$ 324	35.0%
Income taxes adjusted for the effect of:						
Earnings of foreign subsidiaries	(402)	(10.4)	(267)	(8.1)	(159)	(17.2)
Tax-exempt income	(197)	(5.1)	(150)	(4.5)	(124)	(13.4)
Tax-exempt gains	(70)	(1.8)	(2)	(0.1)	(43)	(4.7)
Non-controlling interest portion of VIE income	(2)	(0.1)	(10)	(0.2)	(55)	(5.9)
Net realized foreign exchange gains on investments in foreign operations	22	0.6	31	0.9	203	21.9
Non-tax effected litigation provisions	(25)	(0.7)	9	0.3	699	75.4
Other	(142)	(3.7)	(126)	(3.8)	(56)	(6.0)
Income taxes in the consolidated statement of operations	\$ 524	13.6%	\$ 640	19.3%	\$ 789	85.1%

In 2007, the repatriation of capital and retained earnings from our foreign operations resulted in a \$22 million (2006: \$47 million) increase in income tax expense in the consolidated statement of operations arising from the reversal of related accumulated balances in the "Foreign currency translation adjustments" component of AOCI.

In 2005, we recorded a \$297 million tax benefit relating to the Enron-related litigation settlements. There continues to be significant uncertainty associated with the ultimate tax benefits to be realized on the settlements. In 2005, the repatriation of capital and retained earnings from our foreign operations resulted in a \$375 million increase in income tax expense arising from the reversal of related accumulated balances in the foreign currency translation adjustments component of shareholders' equity. A related \$67 million future tax asset arising from 2004 foreign exchange losses and a \$59 million reversal of a portion of the valuation allowance relating to the future tax asset from our U.S. operations were recognized.

Included in the tax loss carryforwards amount is a \$74 million (2006: \$128 million) future tax asset related to Canadian capital losses, which have no expiry date.

Earnings (Loss) per Share

\$ millions, except per share amounts, for the year ended October 31	2007	2006	2005
Basic EPS			
Net income (loss)	\$ 3,296	\$ 2,646	\$ (32)
Preferred share dividends and premiums	(171)	(132)	(125)
Net income (loss) applicable to common shares	\$ 3,125	\$ 2,514	\$ (157)
Weighted-average common shares outstanding (thousands)	336,092	335,135	339,263
Basic EPS	\$ 9.30	\$ 7.50	\$ (0.46)
Diluted EPS			
Net income (loss) applicable to common shares	\$ 3,125	\$ 2,514	\$ (157)
Weighted-average common shares outstanding (thousands)	336,092	335,135	339,263
Add: stock options potentially exercisable ⁽¹⁾ (thousands)	3,224	3,225	3,646
Weighted-average diluted common shares outstanding ⁽²⁾ (thousands)	339,316	338,360	342,909
Diluted EPS ⁽³⁾	\$ 9.21	\$ 7.43	\$ (0.46)

(1) Excludes average options outstanding of 4,565 with a weighted-average exercise price of \$100.45; average options outstanding of 9,894 with a weighted-average exercise price of \$84.69; and average options outstanding of 460,560 with a weighted-average exercise price of \$73.08 for the years ended October 31, 2007, 2006 and 2005, respectively, as the options' exercise prices were greater than the average market price of CIBC's common shares. Also excluded are average options outstanding of 112,778 with a weighted-average exercise price of \$37.60 for the year ended October 31, 2005 as these options are performance based and the vesting criteria for these options had not been achieved.

(2) Convertible preferred shares and preferred share liabilities have not been included in the calculation since we have the right to redeem them for cash prior to the conversion date.

(3) In case of a loss, the effect of stock options potentially exercisable on diluted earnings (loss) per share is anti-dilutive; therefore, basic and diluted earnings (loss) per share are the same.

Note 24**Commitments, Guarantees, Pledged Assets and Contingent Liabilities****Commitments****Off-balance sheet credit-related arrangements**

Credit-related arrangements are generally off-balance sheet instruments and are typically entered into to meet the financing needs of clients. In addition, there are certain exposures for which we could be obligated to extend credit, that are not recorded on the consolidated balance sheet. Our policy of requiring collateral or other security to support credit-related arrangements and the types of security held is generally the same as for loans. The contract amounts shown below for credit-related arrangements represent the maximum amount of additional credit that we could be obligated to extend. The contract amounts also represent the credit risk amounts should the contracts be fully drawn, the counterparties default and any collateral held proves to be of no value. As many of these arrangements will expire or terminate without being drawn upon, the contract amounts are not necessarily indicative of future cash requirements or actual risk of loss.

Credit-related Arrangements

\$ millions, as at October 31	Contract amounts	
	2007	2006
Securities lending ⁽¹⁾⁽²⁾	\$ 69,221	\$ 61,593
Unutilized credit commitments ⁽³⁾	40,735	39,267
Backstop liquidity facilities	17,278	16,733

Documentary and commercial letters of credit	169	90
Other	353	374
	\$ 134,212	\$ 124,335

(1) Includes the full contract amount of custodial client securities totalling \$51.7 billion (2006: \$44.6 billion) lent by CIBC Mellon Global Securities Services Company.

(2) Excludes securities lending of \$4.9 billion (2006: \$5.4 billion) for cash because it is reported on the consolidated balance sheet as obligations related to securities lent or sold under repurchase agreements.

(3) Includes irrevocable lines of credit totalling \$30.1 billion (2006: \$28.4 billion), of which \$18.5 billion (2006: \$14.8 billion) will expire in one year or less, and excludes personal lines of credit and credit card lines, which are revocable at our discretion at any time.

(4) Represents notional amount of ALM credit derivatives written options which are also reported as derivatives in Note 14.

Securities lending

Securities lending represents our credit exposure when we lend our own or our clients' securities to a borrower and the borrower defaults on the redelivery obligation. The borrower must fully collateralize the security lent at all times.

Unutilized credit commitments

Unutilized credit commitments include the undrawn portion of lending facilities that we have approved to meet the business requirements of clients, as well as undrawn commitments in our mortgage business. These lines are subject to review at least annually, and may include various conditions that must be satisfied prior to drawdown. The credit risk associated with these lines arises from the possibility that a commitment will be drawn down as a loan. The amount of collateral obtained, if deemed necessary, is based on our credit evaluation of the borrower, and may include a charge over the present and future assets of the borrower.

Backstop liquidity facilities

We provide irrevocable backstop liquidity facilities primarily to ABCP conduits. We are the financial services agent for some of these conduits, while other conduits are administered by third parties. Commencing September 17, 2007, the liquidity facilities for our sponsored ABCP programs for Crisp Trust, Franchise Trust, Franchise Trust II, Macro Trust, Safe Trust, Smart Trust and Sound Trust require us to provide funding, subject to the satisfaction of certain limited conditions with respect to the conduits, to fund non-defaulted assets. Prior to September 17, 2007, we provided liquidity facilities in the event that funding for such conduits became unavailable as a result of a general market disruption.

Standby and performance letters of credit

These represent an irrevocable obligation to make payments to third parties in the event that clients are unable to meet their contractual financial or performance obligations. The credit risk associated with these instruments is essentially the same as that involved in extending irrevocable loan commitments to clients. The amount of collateral obtained, if deemed necessary, is based on our credit evaluation of the borrower and may include a charge over present and future assets of the borrower.

ALM credit derivatives written options

Credit default swaps for ALM purposes are written to create synthetic loan exposures to a reference borrower, to manage credit portfolio diversification. The notional amount of these contracts is included in the table above. The notional amount represents the maximum amount at risk in the event of a default of the reference borrower.

Documentary and commercial letters of credit

Documentary and commercial letters of credit are short-term instruments issued on behalf of a client, authorizing a third party, such as an exporter, to draw drafts on CIBC up to a specified amount, subject to specific terms and conditions. We are at risk for any drafts drawn that are not ultimately settled by the client; however, the amounts drawn are collateralized by the related goods.

Long-term commitments for leases

CIBC has obligations under non-cancellable leases for buildings and equipment.

Future minimum lease payments for all lease commitments for each of the five succeeding years and thereafter are as follows:

Lease Commitments⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾

\$ millions, as at October 31, 2007	
2008	\$ 277
2009	256
2010	237
2011	206
2012	174
2013 and thereafter	1,192

(1) Total rental expense (excluding servicing agreements) in respect of buildings and equipment charged to the consolidated statement of operations was \$357 million (2006: \$337 million; 2005: \$409 million).

(2) Includes future minimum lease commitments under sale-leaseback amounting to \$35 million in 2008, \$26 million in 2009, \$25 million in 2010, \$21 million in 2011, \$20 million in 2012 and \$205 million in 2013 and thereafter.

(3) We sublet some of our premises and expect to receive \$47 million from third-party tenants on the sub-leases. Our lease commitments in the table above are gross of the sub-lease income.

(4) Includes \$28 million of assigned lease commitments in connection with our sale of the U.S. private client and asset management division to Oppenheimer in 2003. We remain contingently liable under the terms of the leases that have been assigned to Oppenheimer in the event of an Oppenheimer default.

Other commitments

As an investor in merchant banking activities, we enter into commitments to fund external private equity funds and investments in equity and debt securities at market value at the time the commitments are drawn. In connection with these activities, we had commitments to invest up to \$299 million as at October 31, 2007 (2006: \$355 million).

Guarantees

Guarantees include contracts that contingently require the guarantor to make payments to a guaranteed party based on (a) changes in an underlying economic characteristic that is related to an asset, liability or an equity security of the guaranteed party; (b) failure of another party to perform under an obligating agreement; or (c) failure of a third party to pay its indebtedness when due. The following table summarizes significant guarantees issued and outstanding as at October 31:

\$ millions, as at October 31	2007 Maximum potential future payment ⁽¹⁾	2006 Maximum potential future payment ⁽¹⁾
Securities lending with indemnification ⁽²⁾	\$ 43,287	\$ 37,921
Standby and performance letters of credit	6,353	6,094
Credit derivatives written options	67,283	59,769
Other derivative written options	See narrative	See narrative
Other indemnification agreements	See narrative	See narrative

(1) The total collateral available relating to these guarantees was \$53.7 billion (2006: \$48.9 billion).

(2) Securities lending with indemnification is the full contract amount of custodial client securities lent by CIBC Mellon Global Securities Services Company.

As many of these guarantees will expire or terminate without being drawn upon and do not take into consideration the possibility of recovery by means of recourse provisions or from collateral held or pledged, the maximum potential future payment amounts are not indicative of future cash requirements or credit risk, and bear no relationship to our expected losses from these arrangements. As at October 31, 2007, we had a liability of \$4.0 billion (including credit derivatives written options of \$4.0 billion) (2006: \$43 million) on our consolidated balance sheet related to the guarantees noted above (excluding other derivative written options). For other derivative written options, we had a liability of \$5.6 billion (2006: \$5.4 billion), including \$631 million (2006: \$16 million) related to total return swaps. For total return swaps with notional amount of approximately \$6.5 billion (2006: \$3.8 billion) and a fair value of approximately \$(470) million (2006: \$6 million), we can be called upon to purchase the reference assets at par with the simultaneous termination of the swap contracts. See narrative for additional details on other derivative written options.

Securities lending with indemnification

As part of our custodial business, indemnifications may be provided to security lending clients to ensure that the fair value of securities lent will be returned in the event that the borrower fails to return the indemnified securities, and collateral held is insufficient to cover the fair value of those securities. The term of these indemnifications varies, as the securities loaned are callable on demand.

Standby and performance letters of credit

Standby and performance letters of credit represent written undertakings that back financial and performance obligations of the client. These guarantees convey similar credit risk characteristics as loans. We may collateralize standby and performance letters of credit by various forms, including cash, securities and other assets pledged. The term of these guarantees may vary with the majority of them expiring within one year.

Credit derivatives written options

Credit derivatives written options represent an indirect guarantee of indebtedness of another party or the market value of a reference asset as they require us to transfer funds to a counterparty upon the occurrence of specified events related to the credit worthiness of a reference obligor or the market value of a reference asset. For these types of derivatives, determination of our counterparties' underlying exposure related to the obligor or reference asset (outside of the derivative contract) is not required in order to classify the derivative as a guarantee. The term of these contracts may vary with the majority of them expiring over five years.

Other derivative written options

Derivative contracts include written options on interest rate, foreign exchange, equity, commodity, and other, which provide the holder the right to purchase or sell an underlying item for a pre-determined price. The derivative would be considered a guarantee if the counterparty held an asset, liability or equity security related to the underlying in the derivative contract. We do not track the intention or holdings of a given counterparty when writing an option, and as a result, the maximum potential liability for derivative contracts that may meet the definition of a guarantee is unavailable. We generally hedge our exposure to these contracts by entering into a variety of offsetting derivative contracts and security positions. The term of these contracts are generally within one to five years.

Other indemnification agreements

In the ordinary course of operations, we enter into contractual arrangements under which we may agree to indemnify the counterparty to such arrangement from any losses relating to a breach of representations and warranties, a failure to perform certain covenants, or for claims or losses arising from certain external events as outlined within the particular contract. This may include, for example, losses arising from changes in tax legislation, litigation or claims relating to past performance. In addition, we have entered into indemnification agreements with each of our directors and officers to indemnify those individuals, to the extent permitted by law, against any and all claims or losses (including any amounts paid in settlement of any such claims) incurred as a result of their service to CIBC. In most indemnities, maximum loss clauses are generally not provided for, and as a result, no defined limit of the maximum potential liability exists. We believe that the likelihood of the conditions arising to trigger obligations under these contract arrangements is remote. Historically, any payments made in respect of these contracts have not been significant. No amounts related to these indemnifications, representations and warranties are reflected within the consolidated financial statements as at October 31, 2007.

Pledged assets

In the ordinary course of business, we pledge our own or may sell or re-pledge third-party assets against liabilities, or to facilitate certain activities. The following table presents the sources and uses of pledged assets and collateral:

\$ millions, as at October 31	2007	2006
Sources of pledged assets and collateral		
CIBC assets		
Deposits with banks	\$ 27	\$ –
Securities	24,648	23,775
Other assets	3,010	1,710
	27,685	25,485
Client assets		
Collateral received and available for sale or repledged ⁽¹⁾	106,216	89,825
Not sold or repledged	16,307	5,978
	89,909	83,847
	\$ 117,594	\$ 109,332
Uses of pledged assets and collateral		
Securities lent ⁽²⁾	\$ 69,221	\$ 61,593
Obligations related to securities lent or sold under repurchase agreements	28,944	30,433
Obligations related to securities sold short	13,137	13,788
Margins for exchange traded futures and options, and collateralized derivative transactions	5,543	2,443
Foreign governments and central banks ⁽³⁾	181	547
Clearing systems, payment systems and depositories ⁽³⁾	568	528
	\$ 117,594	\$ 109,332

(1) Includes the full contract amount totalling \$54.3 billion (2006: \$47.2 billion) of collateral received for custodial client securities lent by CIBC Mellon Global Securities Services Company.

(2) Includes the full contract amount of custodial client securities totalling \$51.7 billion (2006: \$44.6 billion) lent by CIBC Mellon Global Securities Services Company.

(3) Includes assets pledged in order to participate in clearing and payment systems and depositories or to have access to the facilities of central banks in foreign jurisdictions.

Securities collateral

Client securities collateral available for sale or repledge is received in connection with securities lending, securities borrowed or purchased under resale agreements, margin loans and to collateralize derivative contracts. Client securities collateral may be sold or re-pledged by CIBC in connection with securities borrowed, lent or sold under repurchase agreements, for margin loans, as collateral for derivative transactions or delivered to cover securities sold short.

Contingent liabilities

CIBC is a party to a number of legal proceedings, including regulatory investigations, in the ordinary course of its business. While there exists an inherent difficulty in predicting the outcome of such matters, based on current knowledge and consultation with legal counsel, we do not expect that the outcome of any of these matters, individually or in aggregate, would have a material adverse effect on our consolidated financial position. However, the outcome of any such matters, individually or in aggregate, may be material to our operating results for a particular year.

Enron

In 2005, CIBC recorded a provision (included within "Non-interest expenses – other") of \$2.83 billion pre-tax (\$2.53 billion after-tax) to cover two large Enron-related settlements and to reserve against a number of additional Enron-related actions pending at the time. Since 2005, the vast majority of those additional Enron-related actions have been finally resolved or settled in principle, and any likely exposure from remaining Enron-related actions is not expected to exceed the current reserve.

Hedge funds

In 2005, CIBC reached settlements with the SEC and the Office of the New York State Attorney General (NYAG) with respect to matters involving CIBC's dealings with certain hedge funds that engaged in the market timing of mutual funds. In 2005, we accrued \$108 million to cover the settlements, which was allocated equally to CIBC Retail Markets and CIBC World Markets business lines.

Note 25**Concentration of Credit Risk**

Concentrations of credit exposure may arise with a group of counterparties that have similar economic characteristics or are located in the same geographic region. The ability of such counterparties to meet contractual obligations would be similarly affected by changing economic, political or other conditions.

The amounts of credit exposure associated with our on- and off-balance sheet financial instruments are summarized in the following table:

Credit Exposure by Country of Ultimate Risk

\$ millions, as at October 31	2007				2006			
	Canada	United States	Other countries	Total	Canada	United States	Other countries	Total

(1) Major assets consist of cash and non-interest-bearing deposits with banks, interest-bearing deposits with banks, loans, securities, securities borrowed or purchased under resale agreements, customers' liability under acceptances, and derivative instruments market valuation, after deduction of allowance for credit losses.

(2) Includes Canadian currency of \$254.8 billion (2006: \$218.5 billion) and foreign currencies of \$74.2 billion (2006: \$71.3 billion).

(3) Includes loans and acceptances, net of allowance for credit losses, totalling \$170.7 billion (2006: \$151.9 billion). No industry or foreign jurisdiction accounts for more than 10% of this amount in either 2007 or 2006.

(4) Includes the full contract amount of custodial client securities totalling \$51.7 billion (2006: \$44.6 billion) lent by CIBC Mellon Global Securities Services Company.

(5) Includes positive fair values of \$3.3 billion (2006: nil), notional amounts of \$7.6 billion (2006: \$2.3 billion), with U.S. financial guarantors hedging our derivative contracts relating to the U.S. subprime residential mortgage market. Management has assessed the credit exposure relating to these contracts in determining their fair value. Market and economic conditions relating to these counterparties may change in the future, which could result in significant future losses.

Note 26**Related-party Transactions**

In the ordinary course of business, we provide banking services and enter into transactions with related parties on terms similar to those offered to non-related parties. Related parties include directors, senior officers and their affiliates⁽¹⁾, joint ventures and investments accounted for under the equity method. Loans to these related parties are based on market terms and conditions. We offer a subsidy on annual fees and preferential interest on credit card balances to senior officers which is the same as offered to any of our employees.

Directors, senior officers and their affiliates⁽¹⁾

As at October 31, 2007, loans to directors and their affiliates totalled \$46 million (2006: \$28 million), letters of credit and guarantees totalled \$115 million (2006: \$120 million) and the undrawn credit commitments totalled \$218 million (2006: \$292 million).

(1) Affiliates include spouses, children under 18 and supported family members ("dependants") of directors and senior officers. It also includes entities over which directors, senior officers and their dependants have significant influence. Significant influence can be exerted by: greater than 10% voting interest; entities in which they have a management contract; entities in which they have positions of management authority/senior positions; entities in which they are a general partner; and trusts in which they are trustees or substantial beneficiaries.

As at October 31, 2007, loans to senior officers and their affiliates totalled \$13 million (2006: \$21 million), letters of credit and guarantees totalled \$75 million (2006: nil) and undrawn credit commitments totalled \$119 million (2006: \$4 million).

We offer various stock-based compensation plans to senior officers and directors. See Note 20 for details.

Joint ventures

CIBC is a 50/50 joint venture partner with CIT Financial Ltd. in CIT Business Credit Canada Inc., which is engaged in asset-based lending in Canada. As at October 31, 2007, our loans to and common share investment in the joint venture totalled \$409 million (2006: \$313 million) and \$1 million (2006: \$1 million), respectively, which are eliminated upon proportionate consolidation. In addition, as at October 31, 2007, we had letters of credit and guarantees of \$141 million (2006: \$126 million) and undrawn credit commitments of \$74 million (2006: \$68 million) to the joint venture. The loans were made to the joint venture under a Master Funding agreement, under

which the joint venture borrows money equally from both of its joint investors. Interest is charged at prime on Canadian dollar loans and at Base Rate (Canada) for U.S. dollar loans.

CIBC is a 50/50 joint venture partner with The Bank of New York Mellon in two joint ventures: CIBC Mellon Trust Company (CMT), which provides trust services; and CIBC Mellon Global Securities Services Company, which provides custodial and asset services, both in Canada. As at October 31, 2007, our common share investments in the joint ventures totalled \$99 million (2006: \$99 million), which are

eliminated upon proportionate consolidation. In addition, CIBC holds client overdraft balances on behalf of CMT of \$6 million (2006: nil).

Equity-accounted entities

As at October 31, 2007, investments in and loans to equity-accounted entities totalled \$279 million (2006: \$1,096 million)⁽¹⁾ and the undrawn investment and credit commitments totalled \$15 million (2006: \$37 million).

(1) Includes \$790 million of our investment in FirstCaribbean. During the year, we purchased a controlling interest in FirstCaribbean (Note 3).

Note 27

Segmented and Geographic Information

CIBC has two strategic business lines: CIBC Retail Markets which services retail customers and CIBC World Markets which services wholesale customers. These strategic business lines are supported by Corporate and Other.

CIBC Retail Markets comprises CIBC's retail and wealth management businesses. We provide a full range of financial products and services to individual and small business clients, as well as investment management services globally to retail and institutional clients.

CIBC World Markets is the wholesale and corporate banking arm of CIBC, providing a range of integrated credit and capital markets, investment banking, and merchant banking products and services to clients in key financial markets in North America and around the world. We provide capital solutions and advisory expertise across a wide range of industries as well as research for our corporate, government and institutional clients.

These business lines are supported by five functional groups – Administration, Technology and Operations; Corporate Development; Finance; Legal and Regulatory Compliance; and Risk Management. The activities of these functional groups are included within Corporate and Other with their revenue, expenses and balance sheet resources generally being allocated to the business lines. Corporate and Other also includes CIBC Mellon joint ventures, and other income statement and balance sheet items, including the general allowance, not directly attributable to the business lines. The general allowance applicable to FirstCaribbean is determined locally and is included in CIBC Retail Markets.

During the year, we moved the Treasury function from Treasury and Risk Management into Finance.

During 2006, we merged the Administration and Technology and Operations functional groups and renamed it "Administration, Technology and Operations". We also moved certain administrative functions from this group into a new "Legal and Regulatory Compliance" functional group.

Results for our operating segments are based on our internal financial reporting systems. The assets and liabilities of the segments are transfer priced, using a funding methodology that best reflects their nature and term, at wholesale market rates. Non-interest expenses are attributed to the segment to which they relate. Indirect expenses are allocated to the segments based on appropriate criteria.

To measure and report the results of operations of the two strategic business lines, we use a Manufacturer/Customer Segment/Distributor Management Model. The model uses certain estimates and allocation methodologies in the preparation of segmented financial information. Under this model, internal payments for sales and trailer commissions and distribution service fees are made among the business lines. Periodically, the sales and trailer commission rates paid to segments for certain products are revised and applied prospectively. Revenue, expenses and balance sheet resources relating to certain activities are fully allocated to other business lines. Management uses this model to assess the performance of our customer segments, products and delivery channels.

(1) Net income (loss) and average assets are allocated based on the geographic location where they are recorded.

(2) Intersegment revenue represents internal sales commissions and revenue allocations under the Manufacturer/Customer Segment/Distributor Management Model.

(3) Includes amortization of buildings, furniture, equipment, leasehold improvements and other intangible assets.

(4) Assets are disclosed on an average basis as this measure is most relevant to a financial institution and is the measure reviewed by management.

(5) Includes \$2.83 billion provision for Enron-related litigation.

Note 28**Reconciliation of Canadian and United States Generally Accepted Accounting Principles**

CIBC's consolidated financial statements have been prepared in accordance with Canadian GAAP. The following table summarizes the more significant differences that would result if U.S. GAAP were applied in the preparation of the consolidated financial statements.

We have not included a consolidated statement of cash flows prepared under U.S. GAAP because the differences from the consolidated statement of cash flows prepared under Canadian GAAP are not material.

A. Derivative instruments and hedging activities

The new Canadian GAAP derivative and hedge accounting standards became substantially harmonized with U.S. GAAP upon the adoption of the new Canadian GAAP financial instrument standards on November 1, 2006. However, U.S. GAAP reported earnings may continue to exhibit significant volatility in any given period relative to Canadian GAAP because:

- We continue to elect not to designate certain derivatives as hedges for U.S. GAAP accounting purposes;
- Canadian GAAP continues to permit the use of cash instruments for certain foreign currency hedges, which are disallowed under U.S. GAAP; and
- Our residential mortgage commitments are treated as derivatives carried at fair value only under Canadian GAAP.

Prior to November 1, 2006, there were additional differences in the accounting for derivatives that qualify for hedge accounting purposes as only U.S. GAAP had prescribed requirements for the accounting for fair value and cash flow hedges, including the requirement that all derivatives in an effective accounting hedge be carried at fair value. In addition, only U.S. GAAP required that all derivative instruments embedded in financial instruments that are not clearly and closely related to the economic characteristics of the underlying host financial instruments, be recognized at fair value in the consolidated financial statements. Under Canadian GAAP prior to November 1, 2006, only embedded derivatives within equity-linked deposit contracts, were carried at fair value on the consolidated balance sheet with changes in fair value reflected in current earnings.

B. Guidance for quantifying financial statement misstatements

As of November 1, 2006, CIBC adopted Staff Accounting Bulletin (SAB) 108, "Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements", that describes the approach that should be used to quantify the materiality of a misstatement and provides guidance on how prior year misstatements, when they are identified, should be considered in the current year financial statements. SAB 108 requires registrants to quantify misstatements using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement, when all relevant quantitative and qualitative factors are considered, as material to current or prior period financial statements. Based on SAB 108, an immaterial adjustment has been recognized to increase current year's earnings by \$50 million (\$36 million after-tax) related to the application of the effective interest rate method.

C. Fair value option

Canadian GAAP provides an entity with the option to designate certain instruments on initial recognition as instruments that it will measure at fair value through the consolidated statement of operations. As U.S. GAAP will not provide for the concept of a fair value option until we adopt SFAS 159 "The Fair Value Option for Financial Assets and Liabilities" in 2009 (see discussion below under "Future U.S. accounting policy changes" section), instruments to which we have applied the fair value option under Canadian GAAP receive different classification under U.S. GAAP. Certain securities to which we apply the fair value option under Canadian GAAP are classified as trading securities under U.S. GAAP. Certain traded loans under U.S. GAAP are also carried at fair value in Canadian GAAP under the fair value

option. Other instruments to which we have applied the fair value option under Canadian GAAP, such as certain deposit liabilities, are not currently at fair value under U.S. GAAP.

D. AFS securities

Under Canadian GAAP, prior to the implementation of the new financial instrument standards on November 1, 2006, investment securities were carried at cost or amortized cost. U.S. GAAP requires these securities to be classified as either HTM or AFS securities. Since November 1, 2006, accounting for AFS securities is consistent under both GAAPs.

E. Equity accounting adjustments

Effective November 1, 2003, the application of the equity method of accounting was substantially harmonized with U.S. GAAP for investments over which we exert significant influence. Previously, we accounted for these investments on a cost basis. Both Canadian and U.S. GAAP now require the use of the equity method to account for such investments when the investor exerts significant influence.

Under Canadian GAAP, certain of our investments in limited partnerships are accounted for on a cost basis. Canadian GAAP requires the use of the equity method of accounting when we exert significant influence over the investee, whereas U.S. GAAP requires the use of the equity method to account for such investments when the equity interest is more than minor. We record an impairment loss on these investments when there is evidence of an other-than-temporary decline in their value.

F. Variable interest entities

Effective November 1, 2004, we adopted the CICA AcG-15, "Consolidation of Variable Interest Entities", for the purpose of Canadian GAAP. Upon adoption of AcG-15, the Canadian GAAP accounting treatment of VIEs is now essentially harmonized with U.S. GAAP, under Financial Accounting Standards Board (FASB) Interpretation Number (FIN) 46R, "Consolidation of Variable Interest Entities".

G. Determination of fair value and valuation adjustments

Under the new Canadian GAAP financial instruments standards effective November 1, 2006, trading securities must now be valued based on quoted bid or ask prices, while U.S. GAAP continues to require the use of quoted closing prices. In addition, certain valuation adjustments that continue to apply under Canadian GAAP are not permitted under U.S. GAAP.

H. Employee future benefits

For Canadian GAAP purposes, we retroactively adopted the accounting requirements for "Employee Future Benefits". For U.S. GAAP purposes, we continue to recognize certain unamortized actuarial losses incurred prior to the adoption date of the Canadian standard on November 1, 2000. As a result, there will continue to be an adjustment to income until amounts, previously deferred under U.S. GAAP, have been fully amortized into income.

Under Canadian GAAP, an entity's accrued benefit asset is limited to the amount it can realize in the future by applying any surplus to reduce an entity's contributions. The valuation allowance is not included under U.S. GAAP, resulting in an adjustment to U.S. GAAP income.

In addition, actuarial gains and losses related to post-employment benefits are not permitted to be deferred under U.S. GAAP.

Prior to October 31, 2007, U.S. GAAP required that the unfunded accumulated benefit obligation be recorded as additional minimum liability and the excess of the unfunded accumulated benefit obligation over the unrecognized prior service cost be recorded in OCI for defined benefit plans. The actuarial valuation of the accumulated benefit obligation is based on current and past compensation levels and service rendered to date.

In September 2006, the FASB issued SFAS 158, "Employers' Accounting for Defined Benefit Pension Plan and Other Post-retirement Plans – an amendment of FASB Statements No. 87, 88, 106 and 132(R)". This statement does not change the current or future net income recognition related to post-retirement benefit plans, but requires an entity to recognize the full over-funded or under-funded status of a defined benefit post-retirement plan as an asset or liability in its consolidated balance sheet. As a result, the unamortized balances that were previously netted from the funded status are now reported as a component of AOCI and the concept of an additional minimum liability no longer applies. The statement also requires an entity to measure the funded status of a plan as of the date of its year-end consolidated balance sheet.

The requirement under SFAS 158 to recognize the funded status of a defined benefit post-retirement plan was applied prospectively as at October 31, 2007 and as a result, other liabilities decreased by \$180 million, other assets decreased by \$565 million, and AOCI decreased by \$385 million (net of tax of \$189 million). The requirement to measure the plan assets and benefit obligations as of the date of the entity's year-end balance sheet is effective in 2009.

I. Stock-based compensation

Effective November 1, 2005, we adopted the SFAS 123 (revised 2004), "Share-based Payment" (123-R) using the modified prospective transition method. SFAS 123-R requires companies to measure and record compensation expense for stock options and other share-based payments based on the instruments' fair value on the grant date. The new standard requires the cost of awards to be recognized in the consolidated statement of operations over the vesting period. In addition, forfeitures are required to be estimated upfront in the year an award is granted.

We had prospectively adopted the fair value method of accounting as of November 1, 2001 under SFAS 123, "Accounting for Stock-based Compensation" and the CICA handbook section 3870, "Stock-based Compensation and Other Stock-based Payments". Under Canadian GAAP and SFAS 123, we recognize compensation expense in the year of grant for past service awards regardless of the vesting provisions. However, SFAS 123-R requires the costs to be recognized over the vesting period of the award for awards granted in respect of periods commencing on or after November 1, 2005. We recognized forfeitures as they occurred under SFAS 123 as we currently do under Canadian GAAP, whereas, upon the adoption of SFAS 123-R in 2006 forfeitures are now estimated. A cumulative adjustment for a change in accounting policy was recognized for estimated forfeitures on all unvested awards totalling \$36 million after-tax. A compensation expense difference for estimated forfeitures will exist for all new awards granted subsequent to the adoption of SFAS 123-R.

Under Canadian GAAP, the cost of SARs is measured assuming that all options eligible for SARs are exercised for cash. Under U.S. GAAP, for SARs granted prior to the date of adoption of SFAS 123,

the FASB Interpretation No. (FIN) 28, "Accounting for SARs and Other Variable Stock Option or Award Plans", continues to apply, under which the accrual is determined as an estimate (based on past experience) of the proportion of stock options expected to be exercised for cash.

J. Liabilities and equity

Under Canadian GAAP, preferred shares that are convertible into a variable number of common shares at the option of the holder are presented as liabilities rather than as equity, and dividend payments and premiums on redemption arising from such preferred shares are treated as interest expense within the consolidated statement of operations rather than as dividends within the consolidated statement of changes in shareholders' equity. Under U.S. GAAP, these preferred shares are reported within the balance sheet as equity, and related dividend payments and premiums on redemption of these preferred shares have no impact on U.S. GAAP earnings.

K. Capital repatriation

Certain of our subsidiaries have repatriated capital by returning capital and distributing dividends to the Canadian domestic entity. Canadian GAAP requires that a proportionate amount of gains and losses accumulated within the foreign currency translation adjustments account be recognized in earnings when there has been a reduction in the net investment of a self-sustaining foreign operation. U.S. GAAP prohibits such recognition except where the foreign operation has either been substantially or entirely liquidated. Recording the capital repatriation based upon U.S. GAAP resulted in no change to non-interest income this year (2006: \$23 million decrease), and a decrease in the tax expense by \$22 million (2006: \$27 million). This also reduced the "Foreign currency translation adjustments" component within AOCI by \$100 million (2006: \$78 million).

L. Income taxes

Under Canadian GAAP, tax rate changes are reflected in the measurement of the future income tax balances when they are considered substantively enacted. Under U.S. GAAP, only the enacted tax rates under current legislation are required to be used.

Under U.S. GAAP certain tax benefits associated with dividends on preferred shares classified as equity must be included in income tax expenses as opposed to being included directly in equity.

M. Netting of financial instruments

Under Canadian GAAP, two or more separate financial instruments can be presented on a net basis if certain criteria are met. In addition to the same criteria, under U.S. GAAP, only financial instruments with the same party can be presented on a net basis.

N. Insurance accounting

Policy benefit liabilities and policy acquisition costs

Under U.S. GAAP, the liabilities for traditional term and accidental death insurance contracts are determined using the net level premium method, which includes assumptions for mortality, morbidity, policy lapses, surrenders, investment yields, policy dividends and direct operating expenses. These assumptions are not revised unless it is determined that existing deferred acquisition costs cannot be recovered. Under Canadian GAAP, the liabilities for insurance contracts are determined using the Canadian asset liability method, which incorporates assumptions for mortality, morbidity, policy lapses and surrenders, investments yields, policy dividends, operating and

policy maintenance expenses. To recognize the uncertainty in the assumptions underlying the calculation of the liabilities, a margin (provision for adverse deviations) is added to each assumption. These assumptions are reviewed at least annually and updated in response to actual experience and market conditions.

Under U.S. GAAP, the policy acquisition costs which vary with and are primarily related to the production of new business are deferred and amortized in proportion to the premium revenue. Under Canadian GAAP, the costs of acquiring new life insurance and annuity business are implicitly recognized as a reduction in insurance claims and policy benefit liabilities.

O. Trade date accounting

For securities transactions, the trade date basis of accounting is used under U.S. GAAP for both the consolidated balance sheet and statement of operations. However, under Canadian GAAP, the settlement date basis of accounting is used for the consolidated balance sheet whereas the trade date basis of accounting is used for the consolidated statement of operations.

P. Accounting changes

We adopted the following accounting standards in 2007, none of which had a material impact to our consolidated financial position or results of operations:

- SFAS 154, "Accounting Changes & Error Corrections" harmonized U.S. GAAP with Canadian GAAP with respect to reporting a change in accounting estimate, a change in accounting policy, correcting an error in previously issued consolidated financial statements, and reporting and disclosing accounting changes in interim-period information.
- SFAS 155, "Accounting for Certain Hybrid Financial Instruments – an amendment of FASB Statements No. 133 and 140" allows any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation under SFAS 133, "Accounting for Derivative Instruments and Hedging Activities" to be carried at fair value in its entirety, with changes in fair value recognized in earnings. We did not elect to measure any hybrid financial instrument at fair value.
- SFAS 156, "Accounting for Servicing of Financial Assets – an amendment of FASB Statement 140" requires an entity to initially measure its servicing rights and obligations at fair value and either amortize the initial fair value over the service period or revalue them each period at fair value with changes in fair value recognized in net income.
- Emerging Issues Task Force Abstract (EITF) 04-5, "Determining Whether a General Partner, or The General Partners as a Group, Controls a Limited Partnership or Similar Entity When The Limited Partners Have Certain Rights", presumes that a general partner controls a limited partnership unless the presumption can be overcome. The EITF was effective after June 29, 2005, for all newly formed limited partnerships and for any pre-existing limited partnerships that modified their partnership agreements after that date. The EITF was effective for general partners of all other limited partnerships on November 1, 2006.

Q. Future U.S. accounting policy changes

We are currently evaluating the impact of adopting the standards listed below:

Accounting for uncertainty in income taxes

In June 2006, the FASB issued FIN 48, "Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109" that provides guidance on how to recognize and measure income tax benefits. This interpretation requires that an entity recognize in its consolidated financial statements, the impact of a tax position, if that position is more likely than not to be sustained on examination by the taxing authorities, based on technical merits of the position. Tax benefits resulting from such a position should be measured as the maximum amount that is more likely than not on a cumulative basis to be sustained on examination. FIN 48 also provides guidance on derecognition, classification, interest and penalties on income taxes and accounting in interim periods. The provisions of FIN 48 are effective beginning November 1, 2007, with the cumulative effect of the change in accounting principle recorded as an adjustment to the November 1, 2007 opening retained earnings.

While we have not completed our evaluation of FIN 48, we do not expect the impact to be material.

Fair value measurement

In September 2006, the FASB issued SFAS 157, "Fair Value Measurements", which offers enhanced guidance for determining fair values to measure assets and liabilities. It provides a single definition of fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities. The statement specifies a hierarchy whereby the fair value with the highest priority is a quoted price in an active market. Under the statement, fair value measurements are disclosed by level within that hierarchy. The statement will require the use of bid and ask prices as appropriate, rather than closing prices, for valuing securities. In addition, the statement will require that the "day-1" profit on derivatives fair valued without the benefit of observable market inputs be recognized in income rather than effectively deferred and then recognized on an appropriate basis over the life of the derivatives. SFAS 157 is effective beginning November 1, 2008.

Fair value option for financial assets and liabilities

On February 15, 2007, the FASB issued SFAS 159, "The Fair Value Option for Financial Assets and Liabilities", which provides an entity the option to report selected financial assets and liabilities at fair value. Under this standard, entities may irrevocably elect to report financial instruments and certain other items at fair value on a contract by contract basis with changes in value reported in earnings. SFAS 159 is effective beginning November 1, 2008.

Note 29**Future Canadian Accounting Policy Changes**

We will be required to adopt the following accounting standards for Canadian GAAP purposes in fiscal 2008:

Leveraged leases

In July 2006, the FASB issued a FASB Staff Position (FSP) FAS 13-2, "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction", which amends SFAS 13, "Accounting for Leases", certain aspects of which are incorporated in the CICA Emerging Issues Committee Abstract (EIC) 46, "Leveraged Leases". The FSP is effective beginning November 1, 2007.

The FSP requires that a change in the estimated timing of the cash flows relating to income taxes results in a recalculation of the timing of income recognition from the leveraged lease. We currently estimate that adopting the FSP will result in an after-tax non-cash charge to opening retained earnings of between \$65 million to \$95 million. An amount approximating the non-cash charge would then be recognized into income over the remaining lease terms.

Capital disclosures

In December 2006, the CICA issued a new handbook section 1535, "Capital Disclosures", which requires an entity to disclose its objectives, policies and processes for managing capital. This new standard is effective beginning November 1, 2007.

Financial instruments

In December 2006, the CICA issued two new handbook sections 3862, "Financial Instruments – Disclosures" and 3863, "Financial Instruments – Presentation". These new standards are effective beginning November 1, 2007.

These sections replace the handbook section 3861, "Financial Instruments – Disclosure and Presentation". These new sections enhance disclosure requirements on the nature and extent of risks arising from financial instruments and how the entity manages those risks.

(1) Classification by country is based on domicile of debtor or customer.

(2) Other past due loans, which have not been classified as impaired, are described in Note 5 to the consolidated financial statements.

(3) Specific allowances for large numbers of homogeneous balances of relatively small amounts are established by reference to historical ratios of write-offs to balances in arrears and to balances outstanding; this may result in negative net impaired loans.

Fees Paid to the Shareholders' Auditors

Unaudited, \$ millions, for the year ended October 31	2007	2006	2005
Audit fees ⁽¹⁾	\$ 15.1	\$ 13.9	\$ 16.1
Audit related fees ⁽²⁾	5.5	4.3	1.5
Tax fees ⁽³⁾	0.5	0.4	0.4
Total	\$ 21.1	\$ 18.6	\$ 18.0

(1) For the audit of CIBC's annual financial statement and services normally provided by the principal auditor in connection with CIBC's statutory and regulatory filings. Audit fees also includes the audit of internal control over financial reporting under standards of the Public Company Accounting Oversight Board (United States).

(2) For the assurance and related services that are reasonably related to the performance of the audit or review of CIBC's financial statements, including accounting consultation, various agreed upon procedures and translation of financial reports.

(3) For tax compliance services.

(1) Certain prior period financial information has been restated/reclassified to conform with the presentation adopted in 2007.

(2) Common shareholders' equity divided by the number of common shares issued and outstanding at end of quarter.

(3) The high and low price during the period, and closing price on the last trading day of the period, on the TSX.

n/m – not meaningful due to the net loss over the 12-month trailing period.

(1) Represents the effect of implementing the CICA financial instruments standards, which provides guidance on recognition and measurement of financial instruments.

(2) Represents the effect of implementing the CICA AcG-15, "Consolidation of Variable Interest Entities," which provides a framework for identifying a VIE and requires a primary beneficiary to consolidate a VIE.

(3) Represents the effect of implementing the CICA AcG-17, "Equity-Linked Deposit Contracts," which introduced the requirements to bifurcate the equity-linked contracts and measure the derivative at fair value.

(4) Represents the effect of implementing the CICA handbook section 3870, "Stock-based Compensation and Other Stock-based Payments," which introduced the requirement to account for SARs based on quoted market price on an ongoing basis. Additionally, CIBC adopted the fair value-based method to account for stock transactions with employees and non-officer directors, as encouraged by section 3870.

(5) Represents the effect of implementing the CICA handbook section 3461, "Employee Future Benefits," which introduced the requirement to accrue the cost of post-retirement and post-employment benefits during the years employees provide services to CIBC.

(1) The dividends are adjusted for the number of days during the year that the share is outstanding at the time of issuance and redemption.

Glossary

Allowance for credit losses

An allowance set up in the financial statements sufficient to absorb both specifically identified and inherent credit-related losses in CIBC's portfolio of loans, acceptances, letters of credit, guarantees, and derivatives. It can be either specific or general.

Amortized cost

The amount at which a financial asset or financial liability is measured at initial recognition minus repayments, minus the cumulative recognition of interest using the effective interest method, plus or minus any basis adjustments resulting from a fair value hedge, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectability. The amount of a financial asset or liability measured at initial recognition is the cost of the financial asset or liability including capitalized transaction costs and deferred fees.

Asset/liability management (ALM)

This is essentially the management of risks in the non-trading areas of the bank. Risk management techniques are used to manage the relative duration of CIBC's assets (such as loans) and liabilities (such as deposits), in order to minimize the adverse impact of changes in interest rates.

Assets-to-capital multiple

Total assets plus specified off-balance sheet items divided by total regulatory capital.

Assets under administration (AUA)

Assets administered by CIBC that are beneficially owned by clients and are, therefore, not reported on the consolidated balance sheet. Services provided by CIBC are of an administrative nature, such as safekeeping of securities, collection of investment income, and the settlement of purchase and sale transactions.

Assets under management (AUM)

Assets managed by CIBC that are beneficially owned by clients and are, therefore, not reported on the consolidated balance sheet. The service provided in respect of these assets is discretionary portfolio management on behalf of the clients. AUM amounts are included in the amounts reported under AUA.

Basis point

One hundredth of a percentage point.

Collateral

Assets pledged as security for a loan or other obligation. Collateral is generally cash or a highly rated security.

Collateralized debt obligation (CDO)

Securitization of any combination of corporate debt, asset-backed securities, mortgage-backed securities or tranches of other collateralized debt obligations to form a pool of diverse assets that are tranches into securities that offer varying degrees of risk and return so as to meet investor demand.

Collateralized loan obligation (CLO)

Securitizations of any combination of secured or unsecured corporate loans made to commercial and industrial clients of one or more lending banks to form a pool of diverse assets that are tranches into securities that offer varying degrees of risk and return so as to meet investor demand.

Credit derivatives

Off-balance sheet arrangements that allow one party (the beneficiary) to transfer credit risk of a reference asset, which the beneficiary may or may not own, to another party (the guarantor) without actually selling the asset. CIBC commonly uses credit derivatives to manage its overall credit risk exposure.

Credit risk

Risk of financial loss due to a borrower or counterparty failing to meet its obligations in accordance with agreed terms.

Current replacement cost

The estimated cost of replacing derivative instruments that have a positive market value, representing an unrealized gain to CIBC.

Derivatives

Contracts which require little or no initial investment and whose value is derived from changes in interest rates, foreign exchange rates, equity or commodity prices, or credit spreads applied to a notional underlying amount. The use of derivatives permits the management of risk due to changes in these risk factors.

Dividend payout ratio

Common dividends paid as a percentage of net income after preferred share dividends and premium on redemptions.

Dividend yield

Dividends per common share divided by the closing common share price.

Economic capital

Economic capital is a non-GAAP measure based upon an estimate of equity capital required by the businesses to absorb losses consistent with our targeted risk rating over a one-year horizon. Economic capital comprises credit, market, operational and strategic risk capital.

Economic profit

Economic profit is a non-GAAP risk-adjusted performance measure used for measuring economic value added. It is calculated as earnings of each business less a charge for the cost of capital.

Effective interest rate method

It is a method of calculating the amortized cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability.

Efficiency ratio

Non-interest expenses as a percentage of total revenue (net interest income and non-interest income). Efficiency ratio is used as a measure of productivity.

Fair value

The amount of consideration that would be exchanged in an arm's length transaction between knowledgeable and willing parties, under no compulsion to act.

Forward contracts

A contractual commitment to buy or sell a specified commodity, currency or financial instrument at a specific price and date in the future. Forward contracts are customized contracts traded in over-the-counter markets. Forward contracts are derivatives.

Forward rate agreement

An over-the-counter contract determining an interest rate to be paid or received commencing on a particular date in the future for a specified period of time. Forward rate agreements are derivatives.

Futures

A contractual commitment to buy or sell a specified commodity, currency or financial instrument at a specific price and date in the future. Futures contracts are standardized and are traded on an exchange. Futures contracts are derivatives.

Guarantees and standby letters of credit

Primarily represent CIBC's obligation, subject to certain conditions, to make payments to third parties on behalf of clients if these clients cannot make payments or are unable to meet other specified contractual obligations.

Hedge

A risk reduction technique whereby a derivative or other financial instrument is used to reduce or offset exposure to changes in interest rates, foreign exchange rates, equity, commodity prices, or credit risk.

Interest-only strip

A financial instrument based solely on all or a portion of the interest payments from a pool of loans or other similar interest-bearing assets. As the principal on the underlying interest-bearing assets is repaid or defaults, the interest payments decline and the value of the interest-only strip falls accordingly.

Liquidity risk

Risk of having insufficient cash resources to meet current financial obligations without raising funds at unfavourable rates or selling assets on a forced basis.

Mark-to-market

Valuation at market rates, as at the balance sheet date. Market rates are generally available for most publicly traded securities and some derivatives.

Market risk

The potential for financial loss from adverse changes in underlying market factors, including interest and foreign exchange rates, credit spreads, and equity and commodity prices.

Master netting agreement

An industry standard agreement designed to reduce the credit risk of multiple derivative transactions with a counterparty through the creation of a legal right of offset of exposures in the event of a default by that counterparty.

Net interest income

The difference between interest earned on assets (such as loans and securities) and interest incurred on liabilities (such as deposits and subordinated indebtedness).

Net interest margin

Net interest income as a percentage of average assets.

Normal course issuer bid

Involves a listed company buying its own shares through a stock exchange, from time to time, and is subject to the various rules of the exchanges and securities commissions.

Notional amount

Principal amount or reference amount used for the calculation of payments under derivative contracts. In most instances, these amounts are not paid, received or exchanged under the terms of the derivative contract.

Off-balance sheet financial instruments

Assets or liabilities that are not recorded or not fully recorded on the balance sheet at notional or stated amounts, but may produce positive or negative cash flows. Such instruments include credit related arrangements.

Office of the Superintendent of Financial Institutions (OSFI)

OSFI supervises and regulates all banks, all federally incorporated or registered trust and loan companies, insurance companies, cooperative credit associations, fraternal benefit societies and pension plans in Canada.

Operational risk

The risk of loss resulting from inadequate or failed internal processes, systems, or from human error or external events.

Options

A contractual obligation under which the writer confers the right, but not the obligation, on the purchaser to either buy (call option) or sell (put option) a specific amount of a commodity, currency or financial instrument at a fixed price either at or by a set date.

Price-to-earnings multiple

Closing common share price divided by diluted earnings per common share.

Provision for credit losses

An amount charged or credited to income so as to bring the allowance for credit losses to a level that is sufficient to cover specifically identified and inherent credit-related losses in CIBC's portfolio of loans, acceptances, letters of credit, guarantees, and derivatives.

Regular workforce

Comprises regular, working full-time (counted as one) and regular part-time employees (counted as one-half), and commissioned employees.

Regulatory capital

Regulatory capital comprises Tier 1 and Tier 2 capital as defined by OSFI's Capital Adequacy Regulations. Tier 1 capital is comprised of common shares, retained earnings, qualifying Tier 1 instruments, and certain other elements. Tier 2 capital is comprised of qualifying subordinated indebtedness, qualifying general allowances, and certain other elements. Total capital is the sum of Tier 1 and Tier 2 capital, less certain specified adjustments.

Return on equity (ROE)

Net income, less preferred share dividends and premium on redemptions, expressed as a percentage of average common shareholders' equity.

Risk-weighted assets

Calculated by applying risk-weighting factors specified by OSFI to all on-balance sheet assets and off-balance sheet exposures for non-trading books plus statistically estimated risk exposures in trading books. The result is then used in the calculation of CIBC's regulatory capital ratios.

Securities borrowed

Securities are typically borrowed to cover short positions. Borrowing requires the pledging of collateral by the borrower to the lender. The collateral may be cash or a highly rated security.

Securities lent

Securities are typically lent to a borrower to cover their short positions. Borrowing requires the pledging of collateral by the borrower to the lender. The collateral provided may be cash or a highly rated security.

Securities purchased under resale agreements

A transaction where a security is purchased by the buyer and, at the same time, the buyer commits to resell the security to the original seller at a specific price and date in the future.

Securities sold short

A transaction in which the seller sells securities it does not own. The seller borrows the securities in order to deliver them to the purchaser. At a later date, the seller buys identical securities in the market to replace the borrowed securities.

Securities sold under repurchase agreements

A transaction where a security is sold by the seller and, at the same time, the seller commits to repurchase the security from the original purchaser at a specific price and date in the future.

Securitization

The process of selling assets (normally financial assets such as loans, leases, trade receivables, credit card receivables or mortgages) to trusts or other special purpose entities (SPEs). An SPE normally issues securities or other form of interests to investors and/or the asset transferor, and the SPE uses the proceeds of the issue of securities to purchase the transferred assets. The SPE will generally use the cash flows generated by the assets to meet the obligations under the securities or other interests issued by the SPE, which may carry a number of different risk profiles.

Seller swaps

Seller swaps are derivatives used in securitization transactions whereby the asset seller receives ongoing cash flows related to the assets sold and pays the funding costs of the securitization vehicle.

Stock appreciation rights (SARs)

SARs issued by CIBC are rights attached to stock options, where the excess, if any, between the market price of CIBC common shares at the time of exercise, and the strike price established at the time of grant, is paid in cash.

Swap contracts

Agreements between two parties to exchange a series of cash flows, based on a specific notional amount over a specified period. The typical swap contracts are interest rate swaps and cross currency swaps. Swap contracts are derivatives.

Taxable equivalent basis (TEB)

A non-GAAP measure that increases tax-exempt income to make it directly comparable to taxable income sources when comparing either total revenue or net interest income. There is an offsetting adjustment to the tax provision, thus generating the same after-tax income as reported under GAAP.

Tier 1 and Total capital ratios

Tier 1 and total regulatory capital as defined above, divided by risk-weighted assets, based on guidelines set by OSFI, based on Bank for International Settlements standards.

Total shareholder return (TSR)

The total return earned on an investment in CIBC's common shares. The return measures the change in shareholder value, assuming dividends are reinvested in additional shares.

Value-at-Risk (VaR)

Generally accepted risk measurement concept that uses statistical models to estimate the distribution of possible returns on a portfolio at a given level of confidence.

Variable interest entity (VIE)

An entity that does not have sufficient equity at risk to permit it to finance its activities without additional subordinated financial support, or in which equity investors do not have the characteristics of a controlling financial interest. SPEs are a type of VIE that are created for a single, well-defined and narrow purpose.

In every decision to close a branch, CIBC carefully considers the interests of the community, our clients and employees. This includes:

- Informing the community at large, including clients, employees, community leaders, politicians and government officials, of the decision to close the branch. Notice is given and CIBC holds a community meeting to discuss the decision and to hear suggestions for helping the community to adjust.
- Assisting affected individual clients and groups, identifying their needs and the most appropriate branch in the market to serve them.

Prince Edward Island	151,015	101,154	1,002
Newfoundland and Labrador	511,458	224,730	2,064
Northwest Territories, Nunavut and Yukon ⁽³⁾	139,150	81,298	944
Total Canada	\$ 89,823,498	\$ 35,350,425	163,835

(1) Authorizations, outstandings and clients for Prince Edward Island have been added to Newfoundland & Labrador for the same dollar band and have been included in Newfoundland & Labrador totals to preserve confidentiality.

(2) Authorizations, outstandings and clients for Northwest Territories, Nunavut and Yukon have been added to British Columbia for the same dollar band and have been included in British Columbia totals to preserve confidentiality.

(3) Data for Northwest Territories, Nunavut and Yukon has been consolidated to protect privacy of individual borrowers who might otherwise be identifiable.

Employment in Canada

CIBC is one of Canada's largest employers. In 2007, CIBC and its listed affiliates had approximately 39,100 full-time and part-time employees nationwide. The CIBC group of companies paid almost \$2.4 billion in base salaries and benefits to our Canadian workforce in 2007.

In addition, we indirectly supported thousands of other jobs in many sectors, from janitorial services to high-tech consultants, through the purchase of outside goods and services. The total for 2007 was \$2.1 billion worldwide, with \$1.9 billion spent in Canada.

Full-time and part-time employees

As at October 31, 2007

CIBC and its listed affiliates

Province or territory	Full-time employees	Part-time employees
British Columbia	3,193	848
Alberta	2,116	593
Saskatchewan	677	255
Manitoba	557	241
Ontario	22,488	2,702
Quebec	2,786	645
New Brunswick	544	103
Nova Scotia	811	149
Prince Edward Island	70	33
Newfoundland and Labrador	181	58
Northwest Territories	50	2
Nunavut	9	0
Yukon	26	17
Total	33,508	5,646

Taxes in Canada

In 2007, the CIBC group of companies' tax expense to all levels of government in Canada was \$1.9 billion. This total consisted of \$1.4 billion in income taxes, \$125 million in capital taxes and \$364 million in payroll taxes (employer portion), business taxes, property taxes, GST and provincial sales taxes.

Taxes – 2007

CIBC group of companies

\$ thousands	Income taxes	Capital taxes
Federal government	\$ 945,078	\$ –
Provincial and territorial government		
British Columbia	50,428	23,152
Alberta	37,024	0
Saskatchewan	6,718	5,797
Manitoba	7,600	6,140
Ontario	316,557	70,821
Quebec	34,193	11,044
New Brunswick	2,760	1,144
Nova Scotia	7,765	4,462
Prince Edward Island	918	744
Newfoundland and Labrador	2,584	1,720
Northwest Territories	836	0
Nunavut	120	0
Yukon	536	0
Total	\$ 1,413,117	\$ 125,024

Global Reporting Indicators

This Annual Accountability Report has been developed with reference to the Global Reporting Initiative (GRI) G3 Guidelines and the Financial Services Sector Supplement. The G3 Guidelines introduced Application Levels of C, B and A, a system that allows reporters to declare the level to which they have applied the GRI Reporting Framework. CIBC is reporting at the C level this year – indicating that we are reporting on the prescribed G3 Profile Disclosures along with 10 GRI Performance Indicators, including at least one from each of the social, economic, and environment areas. The following table lists the GRI indicators we are reporting on and more information can be found in the 2007 Management Proxy Circular and on our website, www.cibc.com.

GRI #	Description	Page(s)
1.1	Statement from the CEO	3-4
2.1	Name of the organization	1
2.2	Primary brands, products, and services	8-14
2.3	Operational structure of the organization	130-131, 138
2.4	Location of headquarters	160-161
2.5	Countries of operation	130-131
2.6	Nature of ownership and legal form	1
2.7	Markets served	8-14
2.8	Scale of the reporting organization	1
2.9	Significant changes during the reporting period	38-40
2.10	Awards received in the reporting period	6-7
3.1	Reporting period	1
3.2	Date of previous report	1
3.3	Reporting cycle	1
3.4	Contact point for questions regarding the report	160-161
3.5	Process for defining content	6-7, 32-34
3.6	Boundary of the report	89-96
3.7	State any specific limitations on the scope or boundary of the report	89-96
3.8	Joint ventures, subsidiaries, leased facilities, outsourced operations	89-96
3.10	Effect of any restatements of information provided in earlier reports	132-136
3.11	Significant changes from previous reporting periods	89-96
3.12	Table identifying location of GRI Standard Disclosures	159
4.1	Governance structure	32-34
4.2	Non-executive Chair of Board of Directors	32-34
4.3	Number of independent and/or non-executive Board members	32-34
4.4	Mechanisms for shareholders and employees to provide recommendations or direction	32-34
4.14	List of stakeholder groups engaged by the organization	15-31
4.15	Basis for identification and selection of stakeholders with whom to engage	15-31
EC1	Direct economic value generated and distributed	5-7
EN3	Direct energy consumption	28-31
EN4	Indirect energy consumption	28-31
EN16	Total direct and indirect greenhouse gas emissions	28-31
LA1	Total workforce	154
LA13	Senior management and workforce representation rates	20-23
HR3	Employee Training	20-23
SO2	Business units analyzed for risks related to corruption	15-31, 60-73
SO3	Employees trained in organization's anti-corruption policies and procedures	20-23
PR5	Customer satisfaction	8-14
Supplement Performance Indicators		
RB1	Social criteria applied in retail banking	16-19
RB2	Lending profile	153-154
F1	Environmental policies	28-31
F5	Improving staff competency in addressing environmental risks and opportunities	28-31
F7	Interactions with clients/business partners regarding environmental risks and opportunities	28-31

(1) All issued and outstanding Non-cumulative Class A Preferred Shares Series 24 were redeemed for cash on January 31, 2007. The redemption price was C\$26.00 per Series 24 share. The regular quarterly dividend payment of C\$0.375000 per Series 24 share for the period from November 1, 2006 to January 31, 2007 was paid on January 29, 2007 to holders of record on December 28, 2006.

(2) All issued and outstanding Non-cumulative Class A Preferred Shares Series 25 were redeemed for cash on July 31, 2007. The redemption price was C\$26.00 per Series 25 share. The regular quarterly dividend payment of C\$0.375000 per Series 25 share for the period from May 1, 2007 to July 31, 2007 was paid on July 27, 2007 to holders of record on June 28, 2007.

(3) On November 25, 2005, CIBC announced that it is making an offer to purchase for cancellation all of the outstanding Class A Series 28 Preferred Shares at a price of \$10.00 per share. The offer will remain open for acceptance until the earlier of June 17, 2009 or it is withdrawn by CIBC by providing 60 days notice, in English or in French, in a national Canadian newspaper. Holders should contact their broker for assistance in order to tender their Series 28 shares into this offer. Brokers should contact CIBC World Markets Inc. at (416) 956-6045, referencing the Series 28 shares for further information in order to tender their Series 28 shares into this offer.

(4) Initial dividend for the period from November 15, 2006 to January 31, 2007.

(5) Initial dividend for the period from February 14, 2007 to April 30, 2007.

Eligible dividends

CIBC designates any and all dividends paid or deemed for Canadian federal, provincial or territorial income tax purposes to be paid on or after January 1, 2006 to be "eligible dividends", unless indicated otherwise in respect of dividends paid subsequent to this notification, and hereby notifies all recipients of such dividends of this designation.

Incorporation

Canadian Imperial Bank of Commerce (CIBC) is a diversified financial institution governed by the Bank Act (Canada). CIBC was formed through the amalgamation of The Canadian Bank of Commerce and Imperial Bank of Canada in 1961. The Canadian Bank of Commerce was originally incorporated as Bank of Canada by special act of the legislature of the Province of Canada in 1858. Subsequently, the name was changed to The Canadian Bank of Commerce and it opened for business under that name in 1867. Imperial Bank of Canada was incorporated in 1875 by special act of the Parliament of Canada and commenced operations in that year.

Normal course issuer bid

On November 9, 2007, the TSX accepted our notice of intention to commence a normal course issuer bid. Purchases under this bid will conclude on the earlier of the termination of the bid, the date on which purchases under the bid have been completed, or October 31, 2008. Under this bid, from time to time, we may purchase for cancellation up to 9 million common shares. A copy of CIBC's Notice of Intention to make a Normal Course Issuer Bid filed with the TSX is available to any shareholder of CIBC, without charge, upon request to the Corporate Secretary at 199 Bay Street, Commerce Court West, 44th Floor, Toronto, Ontario, M5L 1A2.

Annual meeting of shareholders

Shareholders are invited to attend the CIBC Annual Meeting of Shareholders on Thursday, February 28, 2008 at 10 a.m. (Eastern Standard Time) in Toronto, Ontario at the Fairmont Royal York, The Canadian Room, 100 Front Street West, Toronto, Ontario M5J 1E3.
