

Calculation Date: Date of Report: 29-Dec-2017 15-Jan-2018

This report contains information regarding CIBC Legislative Covered Bond Programme's Cover Pool as of the indicated Calculation Date. The composition of the Cover Pool will change as Loans (and their Related Security) are added and removed from the Cover Pool from time to time and, accordingly, the characteristics and performance of the Loans (and their Related Security) in the Cover Pool will vary over time.

This material is for distribution only under such circumstances as may be permitted by applicable law. This material is published solely for informational purposes and this report does not constitute an invitation or recommendation to invest or otherwise deal in, or an offer to sell or the solicitation of an offer to buy or subscribe for, any security. Reliance should not be placed on the information herein when making any decision to buy, hold or sell any security or for

The information set forth below has been obtained and based upon sources believed by Canadian Imperial Bank of Commerce and CIBC World Markets Inc. (collectively. "CIBC") to be accurate, however, CIBC makes no representation or warranty, express or implied, in relation to the accuracy, completeness or reliability of the information contained herein. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. We assume no liability for any errors or any reliance you place on the information provided herein.

THESE COVERED BONDS HAVE NOT BEEN APPROVED OR DISAPPROVED BY CMHC NOR HAS CMHC PASSED UPON THE ACCURACY OR ADEQUACY OF THIS DISCLOSURE DOCUMENT. THESE COVERED BONDS ARE NOT INSURED OR GUARANTEED BY CMHC OR THE GOVERNMENT OF CANADA OR ANY OTHER AGENCY THEREOF.

Effective July 1, 2014, the Guarantor employs the methodology set out below to determine the indexed valuations for Properties relating to the Loans in the Covered Bond Portfolio (the "Indexation Methodology") for purposes of the Asset Coverage Test, the Amortization Test, the Valuation Calculation and in calculating the value of the covered bond collateral held as Contingent Collateral. To account for subsequent price developments, the Guarantor has chosen to adjust the original market values of the Properties securing the Loans in the Covered Bond Portfolio by using the Teranet - National Bank House Price IndexTM and the Teranet - National Bank Regional and Property Type Sub-IndicesTM, available by subscription at www.housepriceindex.ca (CIBC does not endorse or accept any responsibility for such sites or their content, privacy policy or security standards. See our terms of use at www.cibc.com/ca/terms-of-use.html for more details).

The Teranet - National Bank House Price IndexTM is an independent representation of the rate of change of Canadian single-family home prices. The measurements are based on the property records of public land registries, where sale price is available. The Teranet - National Bank Regional and Property Type Sub-IndicesTM is an independent representation of the rate of change of Canadian home prices based on property types and regional characteristics. For each region, the Teranet - National Bank Regional and Property Type Sub-IndicesTM classifies properties into three categories (condo, row housing, single family) and provides an all-types combined index. As of the indicated Calculation Date, for each region, the all-types index is available and has been used.

The relevant sub-indices are used to maintain updated market property values. At least quarterly, Property values are updated based on relative changes in sub-indices from the time of original valuation, and used in calculating the loan to value ratios. Properties in geographical areas not covered by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional Analysis of the National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index, as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index as captured by the Teranet – National Bank Regional and Property Type Sub-IndicesTM are adjusted with the national average index as captured by the Sub-IndicesTM are adjusted by the Sub-Ind correctness of the indices being relied upon, and, in the case of geographical areas not covered by the sub-indices, the risk that the Teranet - National Bank House Price IndexTM may not accurately capture idiosyncratic factors affecting local housing markets.

As per the Canadian Registered Covered Bond Programs Guide (June 23, 2017) and pursuant to the definition of Indexation Methodology in the Master Definitions and Construction Agreement, notice of any change in the Indexation Methodology must be provided to CMHC and will be reflected in the then-current Investor Report. Changes to the Indexation Methodology may only be made (i) upon notice to CMHC and satisfaction of any other conditions specified by CMHC in relation thereto, (ii) if such change constitutes a material change, subject to satisfaction of the Rating Agency Condition, and (iii) if such change is materially prejudicial to the Covered Bondholders, subject to the consent of the Bond Trustee. The Indexation Methodology must at all times comply with the requirements of the CMHC Guide.

- Notes

 1. All loans are amortizing mortgages

 2. Weighted Average Current LTV is calculated based on indexed property values as per the Indexation Methodology.

 3. Weighted Average Current LTV (unindexed), Weighted Average Authorized LTV and Weighted Average Original LTV are calculated based on appraisal amount at origination.

 4. Effective June 30, 2015, loan seasoning is calculated as the difference, in months, from Calculation Date to the loan's funding date. Previously, loan seasoning was calculated as the difference, in months, from Calculation Date to the loan's latest renewal date.

Calculation Date: Date of Report: 29-Dec-2017 15-Jan-2018

ed Bonds Outstanding vs. OSFI Limit

Covered Bonds currently outstanding (CAD Equivalent)¹: Issued prior to registration under the legacy Covered Bond Programme Issued under the Legislative Covered Bond Programme \$217,740,000 \$16,732,710,800

\$16,950,450,800 OSFI maximum (CAD Equivalent)2: \$22,179,740,160

Notes

1. Covered Bonds issued under the legacy Covered Bond Programme do not form part of the Legislative Covered Bond Programme, nor do they benefit from the Covered Bond Legislative Framework.

2. Beginning in Q1 2015, total assets for the purposes of the OSFI issuance limit calculation, are defined using a select number of data points from the Leverage Requirements Return and the Basel Capital Adequacy Return.

Asset Coverage Test (CAD) Outstanding Covered Bonds \$16,732,710,800 A = lesser of (i) LTV Adjusted True Balance 1 and \$23.327.774.957 Method for Calculating "A": (ii) Asset Percentage Adjusted True Balance B = Principal Receipts C = the sum of (i) Cash Capital Contributions, (ii) unapplied advances under the Intercompany Loan Agreement and Asset Percentage: Minimum Asset Percentage: 91.50% \$414,751,440 80.00% Maximum Asset Percentage: 93.00% (iii) unapplied proceeds from sale of Randomly Selected Guide OC Minimum²: 103.00% Loans D = Substitute Assets Level of Overcollateralization3: 109.13% \$0 E = Reserve Fund Y = Contingent Collateral Amount Z = Negative Carry Factor calculation Adjusted Aggregate Asset Amount = A+B+C+D+E-Y-Z \$0 \$0 \$23,742,526,397 Asset Coverage Test Pass

- Notes
 1. Loan-to-value ratios (LTV's) are calculated based on indexed property values as per the Indexation Methodology.
 2. "Guide OC Minimum" means 103% or such other percentage defined as the "Regulatory OC Minimum" in the CMHC Guide.
 3. Per Section 4.3.8 of the CMHC Guide, (A) the lesser of (i) the total amount of cover pool collateral required to collateralize the covered bonds outstanding and ensure the Asset Coverage Test is met, divided by (B) the Canadian dollar equivalent of the principal amount of covered bonds outstanding under the registered covered bond program.

 Valuation Calculation (CAD)

Trading Value of Covered Bonds	\$17,327,333,386		
A = LTV Adjusted Loan Present Value ¹ B = Principal Receipts C = the sum of (i) Cash Capital Contributions, (ii) unapplied advances under the Intercompany Loan Agreement and (iii) unapplied proceeds from sale of Randomly Selected Loans	\$25,187,073,894 \$414,751,440 \$0	Weighted average rate used for discounting	3.42%
D = Trading Value of Substitute Assets E = Reserve Fund F = Trading Value of Swap Collateral	\$0 \$0 \$0		
Asset Value: A+B+C+D+E+F Valuation Calculation	\$25,601,825,334 \$8,274,491,947		

nes 1. Loan-to-value ratios (LTV's) are calculated based on indexed property values as per the Indexation Methodology.
